<b>Chapter 1: Understanding marketing</b>
1. Which of the following is not a dimension of the holistic marketing concept?
a. relationship marketing
b. integrated marketing
c. social marketing
d. performance marketing
Ans: C
2. The use of marketing to drive social change in behaviours that benefit individuals and
society is referred to as
a. cause marketing
b. cause-related marketing
c. sustainability marketing
d. social marketing

- 3. All the following are examples of Industry 4.0 innovations EXCEPT

  a. internet connectivity
- b. virtual reality headsets
- b. Virtual Tearity Headset
- c. self-driving cars
- d. smartphones

Ans: A

Ans: D

- 4. The decisions and activities related to bringing an offer to market is referred to as
- a. value
- b. marketing
- c. production
- d. delivering
- Ans: B

5. Markets can be identified by all of the following EXCEPT .
a. product category
b. geographic region
c. type of buyer
d. branded rewards
Ans: D
6. An offer targeted to consumers and sold by consumers is referred to as .
<u>a. C2C</u>
<u>b. B2C</u>
<u>c. C2B</u>
<u>d. B2B</u>
Ans: A
7. The value of making a product available when it is needed is referred to as
a. form utility
<u>b. time utility</u>
c. place utility
<u>d. possession utility</u>
<u>Ans: B</u>
8. Which of the following is not one of the 4Ps in the classic marketing mix?
<u>a. product</u>
<u>b. purpose</u>
<u>c. price</u>
<u>d. place</u>
Ans: B
9. Product, place, price, and promotion known collectively as the 4Ps were expanded to
<u>include</u> .
a. position, process, and presence
<u>b. people, position, and placement</u>
c. position, process, and placement

d. people	process, and presence
Ans: D	
10. An er	tity for sale is referred to as
a. produc	<u>€</u>
b. price	
c. place	
d. promot	ion
Ans: A	
11. Mark	eters use all of the following design elements to suggest sensory perceptions in
virtual en	vironments EXCEPT
a. touch	
b. sounds	
c. aesthet	<u>cs</u>
d. scents	
Ans: A	
12. Proce	ssing data close to the source is known as .
a. edge co	mputing
b. living s	ervices
c. machin	<u>e learning</u>
d. metada	<u>ta</u>
Ans: A	
13. Digita	al elements of Industry 4.0 driving the era of marketing convergence include all of
	ving EXCEPT .
	t of everything
b. digital	
	e manufacturing
d. robotic	
Ans: D	=

14. Cognitive technologies include all of the following EXCEPT .
a. big data analytics
b. artificial intelligence
c. machine learning
d. language processing
Ans: A
15. The set of technology tools used to support and operate marketing activities is referred to
<u>as .</u>
a. marketing convergence
b. marketing mix
c. marketing technology stack
d. marketing concept process
Ans: C

Chapter 2: Understanding buyers
1. How prospective customers evaluate, buy, use, and dispose of products is known as
a. buyer cognition
<u>b. buyer remorse</u>
<u>c. buyer behaviour</u>
<u>d. buyer characteristics</u>
Ans: C
2. Buyers include all of the following EXCEPT .
a. individuals
<u>b. platforms</u>
c. families
d. organizations
<u>Ans: B</u>
3. Buyer behaviour is influenced by
a. individual characteristics, sociocultural factors, and environmental factors
b. group characteristics, cultural factors, and environmental factors
c. individual characteristic, social factors, and cultural factors
d. group characteristics, sociocultural factors, and macro-environmental factors
Ans: A
A. Commonsial transactions according and in a sure language.
4. Commercial transactions occurring online are known as .
a. a-commerce
<u>b. online commerce</u>
<u>c. e-commerce</u>
d. C2C commerce
Ans: C
5. All of the following are a consumer decision-making model stage EXCEPT

a. information search

b. purchase

<u>c. need recognition</u>
d. pre-purchase decisions
<u>Ans: D</u>
6. Marketers can interrupt the stages of the consumer decision-making process with .
a. push communications
b. push-pull communications
c. pull communications
d. pull-push communications
<u>Ans: A</u>
7. Changes in buyer behaviour due to the digital age include
a. search is limited to search engines
b. connected customers are not influenced by many resources
c. consumers discover products and research purchases offering same day shipping
d. consumers may see a benefit in researching all kinds of products
Ans: D
8. The interactions people have with brands before, during, and after purchase is known as
a. touchpoints
a. touchpoints b. customer journey mapping
b. customer journey mapping
b. customer journey mapping c. decision triggers
b. customer journey mapping c. decision triggers d. formative attitudes
b. customer journey mapping c. decision triggers d. formative attitudes
b. customer journey mapping c. decision triggers d. formative attitudes Ans: A
b. customer journey mapping c. decision triggers d. formative attitudes Ans: A  9. Why do companies engage in the research activity of customer journey mapping?
b. customer journey mapping c. decision triggers d. formative attitudes Ans: A  9. Why do companies engage in the research activity of customer journey mapping? a. to increase their market share by targeting specific customers
b. customer journey mapping c. decision triggers d. formative attitudes Ans: A  9. Why do companies engage in the research activity of customer journey mapping? a. to increase their market share by targeting specific customers b. to influence buyer behaviour
b. customer journey mapping c. decision triggers d. formative attitudes Ans: A  9. Why do companies engage in the research activity of customer journey mapping? a. to increase their market share by targeting specific customers b. to influence buyer behaviour c. to capture details of the consumer decision-making process

10. The Second Moment of Truth occurs at the point of .
a. sale
b. experience evaluation
c. product return
d. product research
Ans: B
11. What stage of the consumer decision-making process do post-purchase satisfied
customers bypass?
a. need recognition
b. post-purchase outcomes
c. evaluation of alternatives
d. information search
Ans: C
12. Differences between B2B buyers and B2C buyers include all of the following EXCEPT
a. independence
b. the relevance of hard and soft costs
c. characteristics of the decision unit
d. partner buying relationships
Ans: A
13. The B2B buyer decision-making model, comprising six stages, includes .
a. vendor selection and order
b. pre-purchase evaluation
c. solution recognition
d. evaluation of alternative proposals
Ans: D
14. Which source of information do B2B buyers use to add and eliminate alternatives?
a. the first moment of truth
b. the second moment of truth

- c. the third moment of truth
- d. the zero moment of truth

Ans: D

- 15. What is the number one pain point affecting the B2B buyer journey experience?
- a. lack of customer base knowledge
- b. lack of speed in interactions with their supplier
- c. lack of internal framework to facilitate transactions
- d. lack of effective communication among in-house marketing teams

Ans: B

## **Test Bank**

#### Chapter 1: Understanding marketing

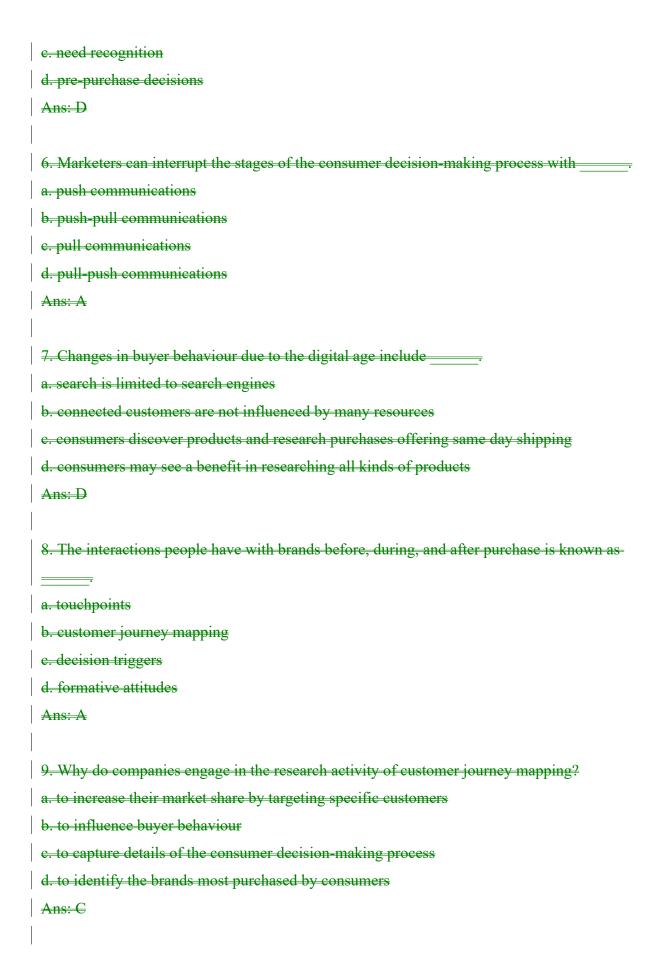

1. Which of the following is not a dimension of the holistic marketing concept?
a. relationship marketing
b. integrated marketing
e. social marketing
d. performance marketing
Ans: C
2. The use of marketing to drive social change in behaviours that benefit individuals and
society is referred to as
a. cause marketing
b. cause-related marketing
e. sustainability marketing
d. social marketing
Ans: D
3. All the following are examples of Industry 4.0 innovations EXCEPT
a. internet connectivity
b. virtual reality headsets
e. self-driving cars
d. smartphones
Ans: A
4. The decisions and activities related to bringing an offer to market is referred to as
a. value
b. marketing
e. production
d. delivering
Ans: B

5. Markets can be identified by all of the following I	EXCEPT
a. product category	
b. geographic region	
c. type of buyer	
d. branded rewards	
Ans: D	
6. An offer targeted to consumers and sold by consumers	mers is referred to as
a. C2C	
b. B2C	
e. C2B	
d. B2B	
Ans: A	
7. The value of making a product available when it is	s needed is referred to as
a. form utility	
b. time utility	
e. place utility	
d. possession utility	
Ans: B	
8. Which of the following is not one of the 4Ps in the	e classic marketing mix?
a. product	
b. purpose	
e. price	
d. place	
Ans: B	
9. Product, place, price, and promotion known collection	tively as the 4Ps were expanded to
include	
a. position, process, and presence	
b. people, position, and placement	
e. position, process, and placement	

d. people, process, and presence
Ans: D
10. An entity for sale is referred to as
a. product
b. price
e. place
d. promotion
Ans: A
11. Marketers use all of the following design elements to suggest sensory perceptions in
virtual environments EXCEPT
a. touch
b. sounds
e. aesthetics
d. scents
Ans: A
12. Processing data close to the source is known as
a. edge computing
b. living services
c. machine learning
d. metadata
Ans: A
13. Digital elements of Industry 4.0 driving the era of marketing convergence include all of
the following EXCEPT
a. internet of everything
b. digital reality
c. additive manufacturing
d. robotics
Ans: D

14. Cognitive technologies include all of the following EXCEPT
a. big data analytics
b. artificial intelligence
c. machine learning
d. language processing
Ans: A
15. The set of technology tools used to support and operate marketing activities is referred to-
as
a. marketing convergence
b. marketing mix
c. marketing technology stack
d. marketing concept process

Chapter 2: Understanding buyers
1. How prospective customers evaluate, buy, use, and dispose of products is known as
<del></del>
a. buyer cognition
b. buyer remorse
c. buyer behaviour
d. buyer characteristics
Ans: C
2. Buyers include all of the following EXCEPT
a. individuals
b. platforms
e. families
d. organizations
Ans: B
3. Buyer behaviour is influenced by
a. individual characteristics, sociocultural factors, and environmental factors
b. group characteristics, cultural factors, and environmental factors
e. individual characteristic, social factors, and cultural factors
d. group characteristics, sociocultural factors, and macro-environmental factors
Ans: A
4. Commercial transactions occurring online are known as
a. a-commerce
b. online commerce
e. e-commerce
d. C2C commerce
Ans: C
5. All of the following are a consumer decision-making model stage EXCEPT
a. information search
b. purchase

10. The Second Moment of Truth occurs at the point of
a. sale
b. experience evaluation
e. product return
d. product research
Ans: B
11. What stage of the consumer decision-making process do post-purchase satisfied
eustomers bypass?
a. need recognition
b. post-purchase outcomes
e. evaluation of alternatives
d. information search
Ans: C
12. Differences between B2B buyers and B2C buyers include all of the following EXCEPT
a. independence
b. the relevance of hard and soft costs
e. characteristics of the decision unit
d. partner buying relationships
Ans: A
13. The B2B buyer decision-making model, comprising six stages, includes
a. vendor selection and order
b. pre-purchase evaluation
e. solution recognition
d. evaluation of alternative proposals
Ans: D
14. Which source of information do B2B buyers use to add and eliminate alternatives?
a. the first moment of truth
b. the second moment of truth

e. the third moment of truth
d. the zero moment of truth
Ans: D

15. What is the number one pain point affecting the B2B buyer journey experience?
a. lack of customer base knowledge
b. lack of speed in interactions with their supplier
c. lack of internal framework to facilitate transactions
d. lack of effective communication among in-house marketing teams

Ans: B

Chapter 3: Segmentation, targeting, and positioning
1. The process of dividing the total market into market segments is referred to as
a. personalized marketing
b. market divisibility
c. market segmentation
d. marketing strategy
Ans: C
2. Without a focus on segmentation, organizations in competitive markets become
a. efficient by avoiding unnecessary expenses
b. inefficient and risk failure
c. efficient and more competitive
d. inefficient and avoid misclassifying prospective customers
Ans: B
3. Members of a market segment are
a. heterogenous
b. isogamous
e. amalgamous
d. homogenous
Ans: D
4. Forrester's Empowered Customer Segmentation Framework includes all of the following
characteristics EXCEPT
a. willingness to purchase
b. self-efficacy
e. information savviness
d. device usage
Ans: A
5. A disadvantage of the firmographics market segmentation bases is
a. limited understanding of buyer behaviour and purchasing patterns
b. limited insights into the underlying motives and needs driving market behaviour

c. inaccessible data
d. grouping markets by descriptive characteristics, answering "how" questions
Ans: B
6. The segmentation procedure includes
a. setting segmentation focuses
b. identifying objectives relevant for the project scope
c. assessing segmentation ineffectiveness
d. identifying data sources and collecting data
Ans: D
7. All of the following are stages in a job map for the Jobs-To-Be-Done-Theory EXCEPT
a. monitor
b. determine
e. locate
d. prepare
Ans: B
8. Which of the following targeting strategies is most commonly used?
a. marketing automation strategy
b. mass marketing
c. multi-segment strategy
d. concentration strategy
Ans: C
9. The target market relative attractiveness of segments can be assessed using all of the
following characteristics EXCEPT
a. inaccessible
<del>b. substantial</del>
<del>c. durable</del>
d. actionable
Ans: A

10. Customer journeys and buyer personas are developed for each target segment once target
segments are
a. differentiated
<del>b. selected</del>
e. identified
d. accessible
Ans: B
11. Which technology makes personalization at the individual level possible?
a. artificial intelligence
b. cloud computing
e. digital analytics
d. edge computing
Ans: C
12. An assertion of the reasons the target market should choose a brand's offer is known as a
a. positioning statement
b. value proposition
c. mission statement
d. target proposition
Ans: B
13. Which of the following are required to identify the positioning strategy?
a. points of differentiation and points of parity
b. unique selling proposition and competitive frame of reference
c. points of parity and points of differentiation
d. competitive frame of reference and points of differentiation
Ans: D
14. The positioning base with brand image, ideal self, and symbolism descriptive options is
referred to as

a. emotion	
b. transformational	
c. values	
d. principles	
Ans: B	

- 15. Creating a positioning map requires which three steps?
- a. define the market, choose the two dimensions, and plot the positions of each brand
  b. define the market, choose the four quadrants, and plot the positions of each competing brand
- c. define the market, choose the two dimensions, and plot the positions of each competingbrand
- d. define the market, choose the four quadrants, and plot the positions of each brand Ans: C

Chapter 4: Marketing research and analysis
1. Marketing research includes which two types of research?
a. demographic and geographic research
b. economic and behavioural research
e. social and opinion research
d. psychographic and values research
Ans: C
2. Marketing managers use marketing research for all of the following EXCEPT
a. assess the ineffectiveness of marketing activities
b. identify trends
c. reduce risk and uncertainty
d. inform marketing mix decisions
Ans: A
3. Marketing decision support system modelling software can answer questions related to all
of the following EXCEPT
a. budget optimization
b. sales promotion optimization
e. process optimization
d. price optimization
Ans: C
4. Which of the following is a marketing information systems source of information?
a. market research
b. market knowledge
e. market data
d. market intellect
Ans: A
5. Analyzing and synthesizing the meaning of patterns and relationships is a key function of
<del>a. wisdom</del>

b. knowledge
c. information
d. data
Ans: B
6. All of the following can be guided by information from an organization's marketing-
information system EXCEPT
a. segmentation
b. targeting
c. positioning
d. marketing mix operational decisions
Ans: B
7. The articulation of what information is needed and how it can be obtained efficiently and
effectively is referred to as
a. research problem
b. syndicated research
e. coordinated research
d. request for proposal
Ans: A
8. Which of the following is not a general research role?
a. predictive
b. analytical
e. descriptive
d. diagnostic
Ans: B
9. Information sources created for some other purpose is known as
a. secondary material
b. secondary information
c. secondary data
d. secondary research

	10. Which of the following is not a basic stage of the focus group process?
	a. conducting
1	b. projecting
	<del>c. planning</del>
	d. analyzing
	Ans: B
	11. Projective research techniques can be categorized into all of the following types EXCEPT
-	a. completion
1	b. elicit ordering
	c. expressive
	d. construction
-	Ans: B
	12. Which one of the following is not a neuromarketing research technique?
-	a. functional magnetic resonance imaging
1	b. electroencephalography
4	c. electromagnetic positron scanning
4	d. steady state topography
	Ans: C
	13. Which type of research may complement or replace qualitative research?
	a. descriptive research
1	b. ethnographic research
	c. scanner-based research
	d. exploratory research
	Ans: A

a. accuracy
b. trustworthiness
c. credibility
d. reliability
Ans: D

15. A survey report should include which of the following?
a. the research technique
b. the vision statement of the survey
c. a definition of study variables
d. the target population's gender and ages
Ans: A

Chapter 5: Marketing strategy
1. Marketing strategy results in
a. organizational strategic fit
b. organizational strategic perspective
e. organizational goal achievement
d. organizational strategic intent
Ans: C
2. The term used to describe a clear, concise expression of the organization's reason for being
is referred to as a(n)
a. aspirational statement
b. strategic statement
e. vision statement
d. mission statement
Ans: D
3. Value chain processes are
a. intradependent
b. self-dependent
e. interdependent
d. independent
Ans: C
4. All of the following are cited, by some experts, as strategic planning process limitations
EXCEPT
a. contingency assessment
b. ambition
e. innovation
d. future competitive advantage
Ans: A
5. Porter's Five Forces Model is useful for assessing
a. weaknesses and identifying possible partnerships

b. strengths and identifying possible partnerships
c. opportunities and identifying possible partnerships
d. threats and identifying possible partnerships
Ans: D
6. Which one of the following describes Ansoff's Matrix market development strategic
option?
a. new products and new markets
b. new products and existing markets
e. existing products and new markets
d. existing products and existing markets
Ans: C
7. Which one of the following strategies does not offer a competitive advantage?
a. discrete strategy
b. disruptive strategy
e. differentiated strategy
d. sustaining strategy
Ans: D
8. All of the following are objectives marketers pursue EXCEPT
a. improve brand or product awareness
b. expand perceived customer value
e. generate sales leads
d. improve search engine rankings
Ans: B
9. Which step of the strategic planning process operationalizes the overall marketing
strategy?
a. formulate a marketing strategy
b. identify the target market
c. determine the marketing objectives
d. identify a strategic opportunity

: 	Ans: A
	10. An obsession for winning that infiltrates every level of an organization is known as
	a. strategic purpose
	b. strategie vision
.	e. strategic intent
	d. strategic fit
:	Ans: C
	11. Expanding into parallel products is referred to as
,	a. perpendicular integration
	b. vertical integration
	e. parallel integration
	d. horizontal integration
:	Ans: D
	12. As part of the strategic planning process, formulating a marketing strategy includes all of
	the following EXCEPT
	a. product strategies
	b. pricing strategies
	e. promotional strategies
	d. purpose strategies
 	Ans: D
   	13. Organizations typically target a mass market with which one of the following-
	approaches?
	a. impersonalized
	b. undifferentiated
	e. differentiated
	d. concentrated
	Ans: B

14. A marketing plan outline includes all of the following EXCEPT
a. performs a situational analysis
b. identifies strategic opportunities
e. implements flexibility strategies
d. describes the target market
Ans: C
15. Marketing objectives can be expressed using the acronym SMART. What does the M
15. Marketing objectives can be expressed using the acronym SMART. What does the M-stand for?
stand for?
stand for?  a. measurable
stand for?  a. measurable  b. marketing plan
stand for?  a. measurable  b. marketing plan  c. market creation

## **Chapter 6: Creating value: Products and services** 1. Intangible products exist in the synchronous moments of ... a. experiences and ideas b. production and consumption c. development and enhancement d. connectivity and capabilities Ans: B 2. All of the following are SaaS Services EXCEPT a. DropBox b. Zoom c. Uber d. Google apps Ans: C 3. Which of the following is a useful tool to identify a core product? a. Bain's Elements of Value b. Forrester's Empowered Customer Segmentation Framework c. Jobs-To-Be-Done Theory d. Porter's Five Forces Model Ans: C 4. Which of the following products are not considered substitutable? a. shopping products b. specialty products c. convenience products d. unsought products Ans: B 5. Product development can be valuable in all of the following circumstances EXCEPT when a. customers develop brand loyalty b. flagship products are successful

e. market trends change
d. localities demand specific tastes
Ans: A
6. Which company does not market product ecosystems?
a. Facebook
<del>b. Apple</del>
e. Amazon
d. Dell
Ans: D
7. Which type of innovation introduces "new to the world" products?
a. social innovations
b. discontinuous innovations
e. disruptive innovations
d. continuous innovations
Ans: B
8. Which one of the following is NOT a characteristic of the scrum method?
a. incremental improvements to existing products
b. complex problem solving through creative and adaptive teamwork
c. lean development
d. Kanban
Ans: A
9. What does the design-to-value process use to ensure objectivity?
a. product research data, competitive intelligence, and cost analysis
b. consumer research data, artificial intelligence, and statistical analysis
e. product research data, artificial intelligence, and statistical analysis
d. customer research data, competitive intelligence, and cost analysis
Ans: D

10. What does the design-to-cost component of strategic product value management
safeguard?
a. brand equity and margins
b. margins and profitability
e. primary demand and brand equity
d. profitability and primary demand
Ans: B
11. Which stage of the product life cycle will experience increased sales and new
competition?
a. introduction phase
b. growth stage
e. maturity stage
d. decline
Ans: B
12. Which type of positioning, in the maturity stage of the product life cycle, associates a
product with a different category?
a. reverse positioning
b. differentiated positioning
e. breakaway positioning
d. stealth positioning
Ans: C
13. Which adopter category represents the smallest percentage of the population?
a. early adopters
b. early majority
e. innovators
d. laggards
Ans: C
14. Which of the following is not a factor that drives product adoption?
a. compatibility

b. observability
c. trialability
d. complexity
Ans: D
15. What motivates innovators and early adopters to be among the first to acquire an
innovation?
a. product scarcity
b. social proof
c. media hype
d. decreased risk
Ans: A

### **Chapter 7: Offering value: Price** 1. Which one of the following terms is not synonymous with price? a. premium b. fee c. seller's investment d. rent Ans: C 2. The single most important decision in evaluating a business is \_\_ a. purchasing power b. pricing power c. product power d. sales power Ans: B 3. Price strategy is designed to achieve all of the following objectives EXCEPT a. sales b. margin c. product trial d. brand identity Ans: D 4. At what level of price management is price strategy determined? a. product market level b. industry level c. transaction level d. supply level Ans: A 5. Which pricing objective drops sets prices to optimize earnings? a. maximize profit b. maximize revenue

c. maximize sales growth

d. maximize profit margin
Ans: B
6. Which type of pricing orientation relies upon benchmarking?
a. cost-based pricing orientation
b. customer value-based pricing orientation
e. competition-based pricing orientation
d. price-based pricing orientation
Ans: C
7. Which of the following factors do companies utilizing a combined pricing orientation no
consider?
a. substitutable alternatives
b. competitive intensity
e. gross profitability of the transaction
d. attributes and benefits customers value
Ans: C
8. Which of the following pricing tactics sets price at double the cost?
a. target-return pricing
b. keystone pricing
e. cost-plus pricing
d. prestige pricing
Ans: B
9. How do organization's using customer-value based pricing score on price orientation?
a. weak
b. medium
e. semi-strong
d. strong
Ans: D
10. Which one of the following does not encourage price leaks?

a. cash discounts for prompt payment
b. the cost of carrying accounts payable
c. freight expenses
d. cooperative advertising allowances
Ans: B
11. While shopping for shoes, you can use the assortment in the store as
a. internal reference prices
b. price transparency
c. price cues
d. external reference prices
Ans: D
12. Which of the following harm a buyer's ability to make an optimized purchase decision?
a. belief and perception
b. emotion and value
c. substitutes and alternatives
d. price and quality
Ans: A
13. A brands position in the market in relative to its
a. marketing channel
b. perceived value
c. competition
d. psychological influence on customers
Ans: C
14. Which variable is not used in dynamic pricing algorithms?
a. product supply
b. competitor prices
c. demographics
d. current spending patterns
Ans: D

15. Which dynamic pricing model estimates how much each product affects consumer price-perception, using actual market data?

a. long-tail model

b. omnichannel model

c. KVI model

d. competitive-response model

Ans: C

Chapter 8: Distributing value: Place
1. A channel of distribution is a path a firm's product takes including all of the following
EXCEP
a. transforming inputs
b. the suppliers involved
c. transporting inputs
d. the firm's involved
Ans: B
2. A distribution channel can be depicted as a
a. linear chain
b. horizontal chain
c. vertical chain
d. parallel chain
Ans: A
3. Which one of the following is not a primary category of intermediaries?
a. supplier
b. wholesaler
c. retailer
d. marketer
Ans: D
4. Which of the following is not an example of how an intermediary provided facilitating
services for other channel members?
a. providing sales support
b. transportation and delivery
c. forecasting supply
d. managing warranties
Ans: C

5. Which of the following intermediaries does not have the infrastructure, systems, or

resources to perform all of the necessary supply chain activities?

a. wholesaler
b. distributor
c. manufacturer
d. retailer
Ans: D
6. The channel strategy specifies which of the following?
a. distribution
<del>b. structure</del>
e. procurement process
d. warehousing
Ans: B
7. The channel level is also known as the of the distribution channel.
a. length
b. width
c. height
d. scope
Ans: A
8. What type of channel mode integrates sales channels and sales modes across an entire-
channel strategy?
a. multi-channel mode
b. omnichannel mode
c. cross-channel mode
d. single channel mode
Ans: B
9. Which type of distribution intensity decision is common for convenience goods like snacks
and beverages?
a. moderate distribution
b. exclusive distribution
c. selective distribution

d. intensive distribution
Ans: D
10. A major decision included in the channel strategy is
a. sales platforms
b. channel width
c. channel partnerships
d. transporting inputs
Ans: A
11. Market demand for integrated shopping experiences has driven market demand for
a. cross-channel distribution
b. multi-channel distribution
c. single channel distribution
d. omnichannel distribution
Ans: D
12. What is the most expensive part of the shipping process?
a. picking orders from warehouse shelves
b. last-mile delivery
c. packaging of orders
d. loading packages on transportation systems
Ans: B
13. Which of the following is a characteristic of an adaptable distribution network?
a. Products are available to consumers how they want them.
b. Products are available to consumers when they want them.
c. Products are available to consumers why they want them.
d. Products are available to consumers from whom they want them.
Ans: A

14. Real-time and in-store inventory management capabilities are made possible by all of the
following EXCEPT
a. algorithmic modelling
b. internet of things sensors
c. data capture and management
d. block chain
Ans: D
15. Which one of the following is not a digitization of supply chain benefit?
a. higher margins
b. improved decision-making
c. lower inventory warehousing costs
d. better product and service quality partner to partner
Ans: A

## Chapter 9: Communicating value: Promotion

1. Organizations rely upon strategically developed marketing mixes to ensure a strong
a. mission statement for customers
b. value proposition for customers
e. distribution channel for customers
d. marketing plan for customers
Ans: B
2. Media content can be expressed using the acronym PESO. What does the S stand for?
a. sensor media
b. supply media
e. shared media
d. social media
Ans: C
3. Which element in the promotional mix may be expressed using any of the media types in
the PESO model?
a. personal selling
b. direct marketing
c. sales promotion
d. advertising
Ans: C
4. Which one of the below is not an example of social media marketing?
a. video content
<del>b. blogs</del>
e. shared photos
d. online video ads
Ans: D
5. Most digital advertising is purchased and delivered using
a an ad network

b-programmatic advertising e-advertising publishers d-content marketing Ans: B  6. A viewable display impression is defined as an ad-that loads a-at-60% or more and remains present for at-least three seconds b- at-50% or more and remains present for at-least one second e-at-70% or more and remains present for at-least one second d-at-100% and remains present for at-least three-seconds Ans: B  7. Which one of the following is not a type or topic of branded content? a-nonfiction b-instructions e-opinions d-poetry Ans: A  8. The two primary players in the communications process are a-encoding and decoding b-channels and mediums e-responses and feedback d-senders and receivers Ans: D  9. Which of the following is not a characteristic of a politely interrupted marketing-communication? a-They persist for an amount of time controlled by the receiver. b-They enable receiver engagement. e-They are interruptive. d-They turn on a prospect to a brand idea. Ans: D	Tall the state of	
d-content marketing Ans: B  6. A viewable display impression is defined as an ad that loads a. at 60% or more and remains present for at least three seconds b. at 50% or more and remains present for at least one second c-at 70% or more and remains present for at least one second d. at 100% and remains present for at least three seconds Ans: B  7. Which one of the following is not a type or topic of branded content? a. nonfiction b. instructions c. opinions d. poetry Ans: A  8. The two primary players in the communications process are a. encoding and decoding b. channels and mediums e. responses and feedback d. senders and receivers Ans: D  9. Which of the following is not a characteristic of a politely interrupted marketing-communication? a. They persist for an amount of time controlled by the receiver. b. They enable receiver engagement. e. They are interruptive. d. They turn on a prospect to a brand idea.	b. programmatic advertising	
Ans: B  6. A viewable display impression is defined as an ad that loads a. at 60% or more and remains present for at least three seconds b. at 50% or more and remains present for at least one second e. at 70% or more and remains present for at least one second d. at 100% and remains present for at least three seconds Ans: B  7. Which one of the following is not a type or topic of branded content? a. nonfiction b. instructions e. opinions d. poetry Ans: A  8. The two primary players in the communications process are a. encoding and decoding b. channels and mediums e. responses and feedback d. senders and receivers Ans: D  9. Which of the following is not a characteristic of a politely interrupted marketing-communication? a. They persist for an amount of time controlled by the receiver. b. They enable receiver engagement. e. They are interruptive. d. They turn on a prospect to a brand idea.	c. advertising publishers	
6. A viewable display impression is defined as an ad that loads a. at 60% or more and remains present for at least three seconds b. at 50% or more and remains present for at least one second e. at 70% or more and remains present for at least one second d. at 100% and remains present for at least three seconds Ans: B  7. Which one of the following is not a type or topic of branded content? a. nonfiction b. instructions e. opinions d. poetry Ans: A  8. The two primary players in the communications process are a. encoding and decoding b. channels and mediums e. responses and feedback d. senders and receivers Ans: D  9. Which of the following is not a characteristic of a politely interrupted marketing-communication? a. They persist for an amount of time controlled by the receiver. b. They enable receiver engagement. e. They are interruptive. d. They turn on a prospect to a brand idea.	d. content marketing	
a. at 60% or more and remains present for at least three second b. at 50% or more and remains present for at least one second c. at 70% or more and remains present for at least one second d. at 100% and remains present for at least three seconds Ans: B  7. Which one of the following is not a type or topic of branded content? a. nonfiction b. instructions c. opinions d. poetry Ans: A  8. The two primary players in the communications process are a. encoding and decoding b. channels and mediums c. responses and feedback d. senders and receivers Ans: D  9. Which of the following is not a characteristic of a politely interrupted marketing communication? a. They persist for an amount of time controlled by the receiver. b. They enable receiver engagement. c. They are interruptive. d. They turn on a prospect to a brand idea.	Ans: B	
a. at 60% or more and remains present for at least three second b. at 50% or more and remains present for at least one second c. at 70% or more and remains present for at least one second d. at 100% and remains present for at least three seconds Ans: B  7. Which one of the following is not a type or topic of branded content? a. nonfiction b. instructions c. opinions d. poetry Ans: A  8. The two primary players in the communications process are a. encoding and decoding b. channels and mediums c. responses and feedback d. senders and receivers Ans: D  9. Which of the following is not a characteristic of a politely interrupted marketing communication? a. They persist for an amount of time controlled by the receiver. b. They enable receiver engagement. c. They are interruptive. d. They turn on a prospect to a brand idea.		
b. at 50% or more and remains present for at least one second e. at 70% or more and remains present for at least one second d. at 100% and remains present for at least three seconds Ans: B  7. Which one of the following is not a type or topic of branded content? a. nonfiction b. instructions e. opinions d. poetry Ans: A  8. The two primary players in the communications process are a. encoding and decoding b. channels and mediums e. responses and feedback d. senders and receivers Ans: D  9. Which of the following is not a characteristic of a politely interrupted marketing communication? a. They persist for an amount of time controlled by the receiver. b. They enable receiver engagement. e. They are interruptive. d. They turn on a prospect to a brand idea.	6. A viewable display impression is defined as an ad that loads

b. They enable receiver engagement. c. They are interruptive. d. They turn on a prospect to a brand idea.	communication?	
c. They are interruptive.  d. They turn on a prospect to a brand idea.	a. They persist for an amount of time controlled by the receiver.	
d. They turn on a prospect to a brand idea.	b. They enable receiver engagement.	
	c. They are interruptive.	
	d. They turn on a prospect to a brand idea.	
	Ans: D	

10. Which one of the following is not a stage of an effective communications campaign?
a. campaign planning
b. execution
e. campaign media concepting
d. campaign design
Ans: C
11. All of the following are hierarchy of effects stages EXCEPT
a. conative
b. innovative
c. cognitive
d. affective
Ans: B
12. A client brief includes
a. brand positioning
b. media planning
e. research
d. public relations
Ans: A
13. A disadvantage of the MARCOM mix advertising element is
a. negative perception of some modes
b. cost per contact can be high
e. lack of control over outcome
d. difficulty cutting through clutter
Ans: D
14. Which campaign executional style depicts the way a consumer group lives?
a. testimonial
b. lifestyle
c. demonstration

d. slice of life
Ans: B

15. Which of the following is a television media channel advantage?
a. visual impact
b. measurability
c. high reach possible
d. variety of ad formats possible
Ans: A

## Chapter 10: Extending value: People, process, and presence in the customer experience

1. The interdependent service relationship between buyers and sellers is consistent with
<del></del>
a. customer benefits managements
b. value-added marketing
e. consumer relationship management
d. relationship marketing
Ans: D
2. All of the following are characteristics of intangibles EXCEPT
a. low in search qualities
b. low in attribute qualities
e. high in experience qualities
d. high in credence qualities
Ans: B
3. Which of the following is most reflective of the service exchange between brands and
<del>customers?</del>
a. touchpoints
b. moments
c. episodes
d. efforts
Ans: C
4. All of the following are TRUE about sources of friction EXCEPT
a. friction is felt as pain
b. friction can harm the relationship between brand and buyer
e. friction occurs when a customer depreciates the value of the experience with the brand
d. friction cannot be eliminated
Ans: D
5. The people dimension in the marketing mix refers to

a. employees and eustomers
b. service providers and marketers
c. boundary spanners and employees
d. customers and marketers
Ans: A
6. Which of the following can speed up service episodes by predicting what will be needed
using recognized patterns?
a. service blueprinting
b. robotic process automation
c. machine learning
d. intelligent process automation
Ans: C
7. Which of the following does not illustrate the power of presence indicators to relay
meaning?
a. a brand's name
b. a brand's values
c. a brand's logo
d. a brand's color choices
Ans: B
8. Knowledge friction can be experienced by
a. customer care representatives
b. self-service customers
c. employees
d. third-party partners
Ans: B
9. Which of the following is not a method used to deliver a more personalized and enhanced
service to customers?
a. artificial intelligence
b. data modelling

d. language processing  Ans:-D  10. When marketers use presence to design servicescapes, it is referred to as		
10. When marketers use presence to design servicescapes, it is referred to as a. design elements b. evidence management e. interior design d. impression management Ans: B  11. The backstage actions element of the service blueprint are performed by a. a frontstage employee and/or a technical support employee b. a backstage employee e. a frontstage employee d. a backstage employee d. a backstage employee and/or a frontstage employee Ans:  12. Which of the following is not an element of the service design principles? a. It is interdisciplinary. b. It is a systematic approach. c. It is a heuristic approach. d. It is an iterative process. Ans: C  13. Which of the following techniques can be useful for evaluating the value proposition for new service offerings? a. episode economics	d. language processin	<del>g</del>
a. design elements b. evidence management e. interior design d. impression management Ans: B  11. The backstage actions element of the service blueprint are performed by a. a frontstage employee and/or a technical support employee b. a backstage employee e. a frontstage employee d. a backstage employee d. a backstage employee Ans:  12. Which of the following is not an element of the service design principles? a. It is interdisciplinary. b. It is a systematic approach. e. It is a heuristic approach. d. It is an iterative process. Ans: C  13. Which of the following techniques can be useful for evaluating the value proposition for new service offerings? a. episode economics	Ans: D	
b. evidence management e. interior design d. impression management Ans: B  11. The backstage actions element of the service blueprint are performed by a. a frontstage employee and/or a technical support employee b. a backstage employee e. a frontstage employee d. a backstage employee d. a backstage employee and/or a frontstage employee Ans:  12. Which of the following is not an element of the service design principles? a. It is interdisciplinary. b. It is a systematic approach. e. It is a heuristic approach. d. It is an iterative process. Ans: C  13. Which of the following techniques can be useful for evaluating the value proposition for new service offerings? a. episode economics	10. When marketers u	use presence to design servicescapes, it is referred to as
e. interior design d. impression management Ans: B  11. The backstage actions element of the service blueprint are performed by a. a frontstage employee and/or a technical support employee b. a backstage employee e. a frontstage employee d. a backstage employee Ans:  12. Which of the following is not an element of the service design principles? a. It is interdisciplinary. b. It is a systematic approach. e. It is a heuristic approach. d. It is an iterative process. Ans: C  13. Which of the following techniques can be useful for evaluating the value proposition for new service offerings? a. episode economics	a. design elements	
d. impression management  Ans: B  11. The backstage actions element of the service blueprint are performed by  a. a frontstage employee and/or a technical support employee b. a backstage employee c. a frontstage employee d. a backstage employee and/or a frontstage employee  Ans:  12. Which of the following is not an element of the service design principles? a. It is interdisciplinary. b. It is a systematic approach. c. It is a heuristic approach. d. It is an iterative process.  Ans: C  13. Which of the following techniques can be useful for evaluating the value proposition for new service offerings? a. episode economics	<del>b. evidence managem</del>	<del>ent</del>

It is an iterative process.  Ans: C  13. Which of the following techniques can be useful for evaluating the value proposition for new service offerings?  a. episode economics	d. a backstage employ	<del>yee and/or a frontstage employee</del>
a. It is interdisciplinary. b. It is a systematic approach. c. It is a heuristic approach. d. It is an iterative process. Ans: C  13. Which of the following techniques can be useful for evaluating the value proposition for new service offerings? a. episode economics	Ans:	
b. It is a systematic approach. c. It is a heuristic approach. d. It is an iterative process.  Ans: C  13. Which of the following techniques can be useful for evaluating the value proposition for new service offerings? a. episode economics	12. Which of the follo	owing is not an element of the service design principles?
c. It is a heuristic approach.  d. It is an iterative process.  Ans: C  13. Which of the following techniques can be useful for evaluating the value proposition for new service offerings?  a. episode economics	a. It is interdisciplina	<del>-y.</del>
d. It is an iterative process.  Ans: C  13. Which of the following techniques can be useful for evaluating the value proposition for new service offerings?  a. episode economics	o. It is a systematic ap	<del>oproach.</del>
Ans: C  13. Which of the following techniques can be useful for evaluating the value proposition for new service offerings?  a. episode economics	e. It is a heuristic app	<del>roach.</del>
13. Which of the following techniques can be useful for evaluating the value proposition for new service offerings?  a. episode economics	d. It is an iterative pro	ocess.
new service offerings?  a. episode economics	Ans: C	
a. episode economics	13. Which of the follo	owing techniques can be useful for evaluating the value proposition for
	new service offerings	<del>?</del>
b. episode frequency	a. episode economics	
	b. episode frequency	
<del>c. episode quality</del>	c. episode quality	
d. episode experience map	d. episode experience	<del>- map</del>

14. A service episode blueprint encourages all of the following EXCEPT
a. creativity
b. preemptive problem solving
c. controlled implementation
d. selected service development
Ans: D
15. Service design was born from the culture of
a. interaction
b. design
e. desirability
d. service
Ans: B

Chapter 11: Maintaining value through branding	g and brand management
1. Brand names and logos are trademarked assets used as	to relay meaning.
a. sensory cues	
b. intangible cues	
e. service cues	
d. tangible cues	
Ans: D	
2. As part of the associative network memory, a set of node	s represent
a. brand associations	
b. stored information	
e. brand assets	
d. memory structure	
Ans: B	
3. A person's ability to identify a brand is referred to as	·
a. brand awareness	
b. brand recognition	
e. brand image	
d. brand concept	
Ans: A	
4. Which of the following is not a component of customer e	<del>quity?</del>
a. brand equity	
b. offer equity	
e. attribute-based equity	
d. relationship equity	
Ans: C	
5. The two primary variables of the Customer-Based Brand	Equity Framework, image
associations and brand awareness, result in	
a. brand assets	
b. brand equity	

c. brand value
d. brand knowledge
Ans: D
6. Which of the following could cause a major disruption in the distribution of market share
by brand?
a. language processing assistants
b. voice-command-driven purchases
e. artificial intelligence assistants
d. voice technology
Ans: B
7. Which of the following is not one of the 3Cs in the comprehensive brand identity system?
a. consumer characteristics
b. company context
c. consumer confidence
d. competitive rivalry
Ans: C
8. Brands that contribute to an existential search for meaning as a sustainable legacy may
earn
a. heart share
b. legend share
c. mind share
d. value share
Ans: B
9. Which type of brand purpose seeks to provide a solution to a problem?
a. emotional brand purpose
b. societal brand purpose
e. aspirational brand purpose
d. functional brand purpose
Ans: D

10. Which of the following is not a characteristic of effective purpose-led branding?
a. meaningful
<del>b. unique</del>
e. sustainable
d. coherent
Ans: C
11. All of the following are components of the brand identity planning model EXCEPT
a. brand image
b. brand purpose
e. brand offers in the market
d. brand identity imprint
Ans: A
12. Brand as platform acknowledges the brand identity implications tied to
a. brand ecosystems
b. brand identity
e. brand awareness
d. brand positioning
Ans: A
13. Which effective brand asset usage characteristic means the brand reinforces relevant
brand purpose, principles, and messaging?
a. consistency
b. communication
e. clarity
d. coherent
Ans: B
14. All of the following are TRUE about the branded house strategy option EXCEPT that it

a. is the most autonomous option
