

Part I

Solutions

An introduction to cost terms and concepts

Solutions to Chapter 2 questions

(1) (a); (2) (d); (3) (e); (4) (f); (5) (i); (6) (b); (7) (h).

Solution IM 2.1

(i) Direct materials 9	(ii) Direct labour 16	(iii) Direct expenses 10
(iv) Indirect production overhead 1 6 8 18 19	(v) Research and development costs 20	(vi) Selling and distribution costs 7 11 12 13 17
(vii) Administration costs 2 3 4 14 15	(viii) Finance costs 5	

Solution IM 2.2

(a) Variable cost per running hour of Machine XR1

Solution IM 2.3

	(£)
	25
Fixed cost	(£27 500/1100 hours)=
	(£20 000/1100 hours) =
	18.182

Cost of brain scan on Machine XRI:	(£)
Variable machine cost (4 hours × £25)	100
X-ray plates	40
Total variable cost	140
Fixed machine cost (4 hours × £18.182)	72.73
Total cost of a scan	212.73
Total cost of a satisfactory scan (£212.73/0.9)	236.37

(b) It is assumed that fixed costs will remain unchanged and also that they are not relevant to the decision. The relevant costs are the incremental costs of an additional scan:

Machine XR1:	(£)
Variable cost per scan	140
Variable cost per satisfactory scan (£140/0.9)	155.56
Machine XR50:	(£)

Variable machine cost per scan (£64 000/2000 hours × 1.8 hours)	57.60
X-ray plates	<u>55.00</u>
Variable cost per scan	<u>112.60</u>
Variable cost per satisfactory scan (£112.60/0.94)	119.79

The relevant costs per satisfactory scan are cheaper on Machine XR50 and therefore brain scans should be undertaken on this machine.

Solution IM 2.4

(a)

Standard cost sheet (per unit)

	(£)	(£)
Direct materials 40 m ² at £5.30 per m ²		212
Direct wages:		
Bonding dept 48 hours at £2.50 per hour	120	
Finishing dept 30 hours at £1.90 per hour	<u>57</u>	
		<u>177</u>
(i) Prime cost		389
Variable overhead: ^a		
Bonding dept 48 hours at £0.75 per hour	36	
Finishing dept 30 hours at £0.50 per hour	<u>15</u>	
		<u>51</u>
(ii) Variable production cost		440
Fixed production overhead ^b		<u>40</u>
(iii) Total production cost		480
Selling and distribution cost ^c	20	
Administration cost ^c	<u>10</u>	
		<u>30</u>
(iv) Total cost		<u>510</u>

Notes

$$^a \text{ Variable overhead rates: Bonding} = \frac{£375\,000}{500\,000 \text{ hours}} = £0.75$$

$$\text{Finishing} = \frac{£150\,000}{300\,000 \text{ hours}} = £0.50$$

$$^b \text{ Fixed production overhead rate per unit of output} = \frac{£392\,000}{9800 \text{ units}} = £40$$

The fixed production overhead rate per unit of output has been calculated because there appears to be only one product produced. Alternatively, a fixed production hourly overhead rate can be calculated and charged to the product on the basis of the number of hours which the product spends in each department.

$$^c \text{ Selling and production cost per unit of output} = \frac{£196\,000}{9800 \text{ units}} = £20$$

$$\text{Administration cost per unit of output} = \frac{£98\,000}{9800 \text{ units}} = £10$$

$$(b) \text{ Selling price per unit } £510 \times \frac{100}{85} = \underline{\underline{600}}$$
