  - c. were innately endowed with a favorable happiness set-point (*arête*)
  - d. lived in a monastery away from social affairs
43. In response to Parmenides’ rationalism arose Empedocles’ empiricism, which argued that:
- a. we do not perceive the world accurately
  - b. we possess innate ideas which must be true
  - c. **perception creates copies of perceived objects in our minds**
  - d. there is no physical world

44. According to Plato, we call a cat a *cat* because:
- by seeing many cats, we have figure out what they all have in common
  - we can see its essential cause
  - it resembles our innate knowledge of the Form of the Cat**
  - they're cute and furry
45. Plato's image of the soul as a charioteer driving two horses resembles to some degree parts of whose later theory?
- Carl Roger's
  - Carl Jung's
  - Sigmund Freud's**
  - B. F. Skinner's
46. According to Aristotle, human intellectual appetite, or *wish*, arises from:
- innate ideas of right and wrong
  - our uniquely human ability to form universals**
  - learning social rules of morality
  - human curiosity
47. The doctrine that one should not invoke gods, spirits, souls, demons or the like to explain events in the world is called:
- naturalism**
  - functional analysis
  - metaphysics
  - the Socratic method
48. Someone who thinks that soul and body are separate and distinct entities is a(n):
- materialist
  - determinist
  - dualist**
  - atomist
49. According to Aristotle, the faculty responsible for forming and storing universal knowledge was
- common sense
  - memory
  - imagination
  - mind**
- 50-52 Match Aristotelian soul to its function.
- |                                  |              |
|----------------------------------|--------------|
| 50. vegetative soul ( <b>c</b> ) | a. sensation |
| 51. animal soul ( <b>a</b> )     | b. reason    |
| 52. human soul ( <b>b</b> )      | c. nutrition |
53. You buy and are about to watch The Avengers movie on DVD. Which of the following is the best example of an **EFFICIENT CAUSAL EXPLANATION** of a DVD of the movie The Avengers?
- A laser cuts divots into the surface of a DVD, encoding the movie**
  - the DVD disk is made of plastic
  - it's shaped like all DVDs, resembling the Form of the DVD
  - the movie and DVD were made to entertain audiences and make money for the producers, investors, and cast
54. Aristotle explained phenomena such as the growth of a tree from a seed by:
- appealing only to mechanistic processes inside the seed and growing tree

- a. cynicism
  - b. **Neoplatonism**
  - c. epicureanism
  - d. humanism
57. Plato proposed that learning universal concepts such as “cat” is based on:
- a. observing the similarities and differences between things
  - b. **innate knowledge from the soul’s sojourn with the Forms**
  - c. learning how one’s culture chooses to categorize things
  - d. proper steering of the Spirited Soul
58. Aristotle distinguished four forms of causation. Applying these to explaining why a given animal is what it is (e.g., a cat as opposed to a dog), the soul fulfills all of the 4 causes **EXCEPT**:
- a. **material cause**
  - b. formal cause
  - c. efficient cause
  - d. final cause
69. In contrast to Plato, but anticipating today’s cognitive psychology, Aristotle defined soul in terms of:
- a. personal immortality
  - b. a separate substance (*res cogitans*)
  - c. the transcendental Form it resembles
  - d. **the life functions it carries out**

#### Essay Questions

1. Summarize XAM’s argument that today’s postmodern way of life looks in many respects like life in the Era of Evolutionary Adaptation, (give details).
2. In discussing the complexity behind the history of philosophy, science and psychology the author of the text states, “Not only is the past another country- it sometimes tries to hide”. Summarize the meaning of this statement and give examples.
3. Discuss several reasons why our intellectual history from the past is mysterious.
4. The author of the text mentions three things that humans want to know. (What is the good life? How do we achieve happiness and virtue? What are the limits on human knowledge and happiness?) Compare and contrast how the Early Bronze Age Greeks answered these questions with the later Greek Spartans.
5. Briefly describe the Greek warrior ethos. How did it influence the development of Greek philosophy, science, and psychology?
6. Why did the Greeks reject doing things for a profit and why was being called “a fisheater” an insult to the Greeks?
7. Explain why the Greek system of thought is considered an open system.

8. In what ways was Sparta the clearest and most extreme embodiment of Greek social, moral, and political values?
9. Why were the earliest Greek philosophers appropriately called physicists? What is Naturalism and what relationship does it have with social science?
10. Contrast Being and Becoming and Rationalism and Empiricism.
11. How does atomism deepen the divide between Appearance and Reality? What ethical problem is raised by atomism?
12. Why does XAM's Blog call Socrates the first Modern? Why do many consider Socrates to be at the heart of the "Greek miracle"?
13. Describe several novel features of Socrates' practice of philosophy?
14. Explain why Plato regarded the Forms as the highest form of human knowledge.
15. Describe any three of Plato's metaphors for knowing the Forms.
16. Describe Aristotle's four causes and his "natural scale," with specific reference to the souls of living things.
17. Summarize Aristotle's view of the relationship between soul and body. How is it different from Plato's?
18. Draw a diagram representing the structure of the human (sensitive and rational) soul according to Aristotle and summarize his ideas of the special and interior senses.
19. In terms of the Greek Legacy, the Greeks affected a miracle in helping us on the road to philosophy, science and psychology. Yet today as students of psychology we no longer share all their values and ideas. Give several examples of these points of disagreement.
