ESSAY

13. Define profit. Explain why you agree or disagree with the following statement: "The success of a business is measured only by the profit it earns."

ANS:

Profit is the financial reward received by successful businesspeople who take the risks involved in blending people, technology, and information to create and market want-satisfying goods and services. In order to be successful in a private enterprise system, a business must earn a satisfactory profit; otherwise, the owners and investors will turn to more attractive opportunities. However, businesses today are expected to do more than earn a satisfactory profit—they also have social and ethical responsibilities. In other words, businesses must behave responsibly in their dealings with employees, customers, suppliers, the general public, and even with their competitors.

DIF: HARD LO: 1.1 What Is Business?
Pg. 4 AACSB: Analytic BT: C

14. Describe technology as a capital source.

ANS:

Technology is a broad term that refers to such machinery and equipment as computers and software, telecommunications, and inventions designed to improve production. Information, frequently improved by technological innovations, is another critical factor because both managers and operating employees require accurate, timely information for effective performance of their assigned tasks. Technology plays an important role in the success of many businesses. Sometimes technology results in a new product, such as hybrid autos that run on a combination of gasoline and electricity. Most of the major car companies have introduced hybrid models in recent years.

DIF: MEDIUM LO: 1.2 What Is Business? Pg. 6 AACSB: Analytic BT: K

15. Explain how consumers benefit from business competition.

ANS:

Competition forces a business that wants to continue to be profitable to constantly find acceptable ways to satisfy customers' needs. Customers benefit from new products, more services, and more economical strategies and operations that are continuously offered by firms as they strive for customer acceptance. These tactics often bring lower prices, better quality, and more convenience to the customers. The ability to buy more raises the standard of living, increases demand, and subsequently creates more jobs.

DIF: HARD LO: 1.3 The Private Enterprise System

Pg. 8 AACSB: Analytic BT: C

16. List and describe the four basic rights in the private enterprise system.

ANS:

The right to private property guarantees every participant the right to own, use, buy, sell, and bequeath most forms of property. The right to profits ensures business owners the right to all profits (after taxes) they earn through their activities. Freedom of choice means that a private enterprise system relies on the potential for citizens to choose their own employment, purchases, and investments. Finally, the private enterprise system permits fair competition by allowing the public to set rules for competitive activity, including laws that prohibit "cutthroat" competition.

DIF: HARD LO: 1.3 The Private Enterprise System

Pg. 8 AACSB: Analytic BT: K

17. List the six eras of business history. Name and describe the era used by businesses today.

ANS:

The six eras are the Colonial period, the Industrial Revolution, the age of industrial entrepreneurs, the production era, the marketing era, and the relationship era. Today's era, the relationship era, focuses on taking a long-term approach to relationships with customers. Firms seek ways to gain customer loyalty by managing each transaction.

DIF: MEDIUM LO: 1.4 Six Eras in the History of Business

Pg. 12 AACSB: Analytic BT: C

18. Explain how business owners enhance productivity by building connections with their customers in the relationship era.

ANS:

In the <u>relationship era</u>, businesses are taking a different, longer-term approach to their interactions with customers. Firms now seek ways to actively nurture customer loyalty by carefully managing every interaction. They earn enormous paybacks for their efforts. A company that retains customers over the long haul reduces its advertising and sales costs. Because customer spending tends to accelerate over time, revenues also grow. Companies with long-term customers often can avoid costly reliance on price discounts to attract new business, and they find that many new buy-

ers come from loyal customer referrals. Because it is much less expensive to serve existing customers than to find new ones, businesses that develop long-term customer relationships can reduce their overall costs. Long-term relationships with customers enable businesses to improve their understanding of what customers want and prefer from the company. As a result, businesses enhance their chances of sustaining real advantages through competitive differentiation.

DIF: HARD LO: 1.4 Six Eras in the History of Business

Pg. 12 AACSB: Analytic BT: C

19. Explain the difference between transaction management and relationship management.

ANS:

Building and promoting products with the hope that the sales will cover costs and earn an acceptable profit is known as transaction management. Actively promoting long-term relationships with customers by carefully managing each interaction is known as relationship management. Potential benefits of relationship management include higher revenues and lower marketing expenses.

DIF: MEDIUM LO: 1.4 Six Eras in the History of Business

Pg. 12 AACSB: Analytic BT: C

20. Briefly describe the Industrial Revolution and its contribution to the evolution of business.

ANS:

The Industrial Revolution began in England around 1750. It moved business operations from an emphasis on independent, skilled workers who specialized in building products one by one to a factory system that mass-produced items by bringing together large numbers of semiskilled workers. The factories profited from the savings created by large-scale production, bolstered by increasing support from machines over time. As businesses grew, they could often purchase raw materials more cheaply in larger lots than before. Specialization of labor, limiting each worker to a few specific tasks in the production process, also improved production efficiency. Influenced by these events in England, business in the United States began a time of rapid industrialization. Agriculture became mechanized, and factories sprang up in cities. During the mid-1800s, the pace of the revolution was increased as newly built railroad systems provided fast, economical transportation. In California, for example, the combination of railroad construction and the gold rush fueled a tremendous demand for construction.

DIF: MEDIUM LO: 1.4 Six Eras in the History of Business

Pg. 12 AACSB: Technology BT: K

21. Explain how e-business has created a new type of strategic alliance among companies.

ANS:

An e-business strategic alliance enables online companies, such as Amazon.com or Overstock.com, to work with traditional retail stores for the benefit of both companies. Traditional companies bring their merchandise and knowledge of distribution, whereas online companies provide increased opportunities for sales and additional return on their dollars.

DIF: MEDIUM LO: 1.4 Six Eras in the History of Business

Pg. 12 AACSB: Technology BT: C

22. Describe how the aging population in the United States and abroad directly affects changes in the workforce.

ANS:

Employers must deal with issues such as retirement, disability programs, retraining, and insurance benefits. Additionally, teenagers are entering the workforce sooner, and some seniors are staying longer or seeking new careers after retiring from their primary careers.

DIF: MEDIUM LO: 1.5 Today's Business Workforce

Pg. 17 AACSB: Analytic BT: C

23. What are the advantages of a diverse workforce?

ANS:

Studies show that diverse employee teams and workforces tend to perform tasks more effectively and develop better solutions to business problems than homogeneous employee groups. Also, a diverse workforce may improve management's understanding of customer needs and relationships with consumer groups.

DIF: MEDIUM LO: 1.5 Today's Business Workforce

Pg. 17 AACSB: Diversity BT: K

24. Describe offshoring and related trends.

ANS:

Offshoring is the relocation of business processes to lower-cost locations overseas. This can include both production and services. In recent years, China has emerged as a dominant location for production offshoring for many firms, while India has become the key player in offshoring services. Some U.S. companies are now structured so that entire divisions or functions are developed and staffed overseas—the jobs were never in the United States to start with.

DIF: MEDIUM LO: 1.5 Today's Business Workforce

Pg. 17 AACSB: Analytic BT: K

25. Explain the new employer-employee relationship in business.

ANS:

Many firms now recognize the value of a partnership with employees that encourages creative thinking, problem solving, and innovation. Managers are being trained to listen to and respect employees, and companies routinely share financial data and reward employees with benefits, such as stock options. Additionally, employees often receive training geared toward career advancement. Employees are no longer likely to remain with a single company throughout their entire careers and do not necessarily expect lifetime loyalty from the companies they work for. They do not expect to give that loyalty either. Instead, they build their own careers however and wherever they can.

DIF: MEDIUM LO: 1.5 Today's Business Workforce

Pg. 17 AACSB: Analytic BT: C

26. Define the term vision. Why is vision an important skill today?

ANS:

Vision is the ability to perceive marketplace needs and what an organization must do to satisfy them. Vision and the ability to turn ideas into action enhance a firm's chances of success.

DIF: EASY LO: 1.6 The 21st-Century Manager

Pg. 20 AACSB: Analytic BT: C

27. What are some examples of external and internal forces that would require a manager to lead organizational change?

ANS:

External forces might include feedback from customers, developments in the international marketplace, economic trends, and new technologies. Internal factors might arise from new company goals, emerging employee needs, labor union demands, or production problems.

DIF: MEDIUM LO: 1.6 The 21st-Century Manager

Pg. 20 AACSB: Analytic BT: C

28. Describe critical thinking and creativity and why they are important qualities for the 21st century manager.

ANS:

<u>Critical thinking</u> is the ability to analyze and assess information to pinpoint problems or opportunities. The critical-thinking process includes activities such as determining the authenticity, accuracy, and worth of information, knowledge, and arguments. It involves looking beneath the surface for deeper meaning and connections that can help identify critical issues and solutions. Without critical thinking, a firm may encounter serious problems. <u>Creativity</u> is the capacity to develop novel solutions to perceived organizational problems. Although most people think of it in relation to writers, artists, musicians, and inventors, that is a very limited definition. In business, creativity refers to the ability to see better and different ways of doing business. A computer engineer who solves a glitch in a software program is executing a creative act.

DIF: MEDIUM LO: 1.7 What Makes a Company Admired?

Pg. 22 AACSB: Ethics BT: K

29. Explain how business ethics differs from social responsibility.

ANS:

Business ethics refers to standards of conduct and moral values involving right and wrong actions in the work environment. Social responsibility is the actions taken by an organization that lead to social and economic benefits to society as a whole, such as supporting charitable organizations and protecting the environment.

DIF: MEDIUM LO: 1.7 What Makes a Company Admired?

Pg. 22 AACSB: Ethics BT: C
