

Chapter 02 Theory and Research

Multiple Choice Questions

1. (p. 21) Which of the following statements about theories is true?

- A. Theories change to incorporate new findings.
- B. Theories are based on certain assumptions.
- C. Theories and research are interwoven.
- D.** All of these.

APA LO: 1.2

Learning Objective: 2.1: Describe the purpose of a theory in research and two theoretical issues on which developmental scientists differ.

Topic: Basic theoretical issues

8. (p. 22) Galton's mom was surprised to hear her young son say the phrase "Holy cow!" when he saw his new toy. It is a phrase she says often, but not directed toward her son. Her son's actions are indicative of the

- A. reactive model of development.
- B. active model of development.
- C. presence of the language acquisition device.
- D. influence of siblings on young children's vocabulary.

APA LO: 1.3

Accessibility: Keyboard Navigation

Bloom's Taxonomy: Apply

Difficulty: Hard

Learning Objective: 2.1: Describe the purpose of a theory in research and two theoretical issues on which developmental scientists differ.

Topic: Issue 1: Is development active or reactive?

9. (p. 22) A mechanistic researcher would be most interested in
- A. the influence of violent video games on aggression.
 - B. the family history of a person with aggression problems.
 - C. the neurotransmitters linked to aggression.
 - D. All of these

APA LO: 1.3

Accessibility: Keyboard Navigation

Bloom's Taxonomy: Apply

Difficulty: Hard

Learning Objective: 2.1: Describe the purpose of a theory in research and two theoretical issues on which developmental scientists differ.

Topic: Issue 1: Is development active or reactive?

10. (p. 22) If Bill's behavior is viewed as passive and reactive, he would be perceived as demonstrating the _____ model of behavior.
- A. naturalistic
 - B. mechanistic
 - C. organismic
 - D. maturationistic

APA LO: 1.3

Bloom's Taxonomy: Apply

Difficulty: Medium

Learning Objective: 2.1: Describe the purpose of a theory in research and two theoretical issues on which developmental scientists differ.

Topic: Is development active or reactive?

11. (p. 22) If Troy's behavior is viewed as active and self-determining, he would be perceived as demonstrating the _____ model of behavior.

- A. naturalistic
- B. mechanistic
- C. organismic
- D. maturationistic

APA LO: 1.3

Accessibility: Keyboard Navigation

Bloom's Taxonomy: Apply

Difficulty: Medium

Learning Objective: 2.1: Describe the purpose of a theory in research and two theoretical issues on which developmental scientists differ.

Topic: Is development active or reactive?

12. (p. 23) Organismic theorists emphasize _____ change, while mechanistic theorists emphasize _____ change.

- A. quantitative; qualitative
- B. behavioral; developmental
- C. qualitative; quantitative
- D. mechanistic; organismic

APA LO: 1.2

Accessibility: Keyboard Navigation

Bloom's Taxonomy: Understand

Difficulty: Medium

Learning Objective: 2.1: Describe the purpose of a theory in research and two theoretical issues on which developmental scientists differ.

Topic: Is development continuous or discontinuous?

13. (p. 23) The quantitative changes, such as documenting the number of words added to a child's vocabulary, support which theory?

- A. Mechanistic
- B. Developmental
- C. Qualitative
- D. Organismic

APA LO: 1.2

Accessibility: Keyboard Navigation

Bloom's Taxonomy: Understand

Difficulty: Medium

Learning Objective: 2.1: Describe the purpose of a theory in research and two theoretical issues on which developmental scientists differ.

Topic: Is development continuous or discontinuous?

14. (p. 23) Most of the early pioneers in psychology, such as Sigmund Freud, Erik Erikson, and Jean Piaget, favored the _____ perspective on human development, which views development as occurring in specific stages.

- A. organismic
- B. quantitative
- C. mechanistic
- D. behavioristic

Bloom's Taxonomy: Apply

Difficulty: Hard

Learning Objective: 2.2: Summarize the main theories of human development.

Topic: Psychoanalytic

28. (p. 26) Which one of the following personality entities would be most similar to what is called "conscience"?

- A. Id
- B. Ego
- C. Superego
- D. Libido

APA LO: 1.2

Accessibility: Keyboard Navigation

Bloom's Taxonomy: Understand

Difficulty: Medium

Learning Objective: 2.2: Summarize the main theories of human development.

Topic: Psychoanalytic

29. (p. 26) Although parts of his theory have been heavily criticized, Freud's contribution to the field of human growth included all of the following EXCEPT

- A. the importance of unconscious thoughts, feelings, and motivations.
- B. the role of childhood experiences.
- C. the ambivalence of emotional responses.
- D. the importance of developing formal operational thought.

APA LO: 1.2

Accessibility: Keyboard Navigation

Bloom's Taxonomy: Understand

Difficulty: Medium

Learning Objective: 2.2: Summarize the main theories of human development.

Topic: Psychoanalytic

30. (p. 26) One of the criticisms of Freud's work is that he

- A. did not make us aware of the importance of unconscious thoughts.
- B. focused too little on childhood feelings and experiences in motivation.
- C. based his theories on patients and not the general population.

D. used too large a subject pool.

APA LO: 1.2

Accessibility: Keyboard Navigation

Bloom's Taxonomy: Understand

Difficulty: Medium

Learning Objective: 2.2: Summarize the main theories of human development.

Topic: Psychoanalytic

31. (p. 27) Unlike Freud's theory, Erikson's theory of psychosocial development

- A. sees society as a positive force.
- B. focuses on biological instincts.
- C. covers infancy and childhood but not adulthood.
- D. has much in common with behaviorism.

APA LO: 1.2
