CHAPTER LEARNING OBJECTIVES

- Identify the sections of a classified balance sheet. In a classified balance sheet, companies classify assets as current assets; long-term investments; property, plant, and equipment; and intangibles. They classify liabilities as either current or long-term. A stockholders' equity section shows common stock and retained earnings.
- 2. Identify tools for analyzing financial statements and ratios for computing a company's profitability. Ratio analysis expresses the relationship among selected items of financial statements data. Profitability ratios, such as earnings per share (EPS), measure aspects of the operating success of a company for a given period of time.
- 3. **Explain the relationship between a retained earnings statement and a statement of stockholders' equity.** The retained earnings statement presents the factors that changed the retained earnings balance during the period. A statement of stockholders' equity presents the factors that changed stockholders' equity during the period, including those that changed retained earnings. Thus, a statement of stockholders' equity is more inclusive.
- 4. Identify and compute ratios for analyzing a company's liquidity and solvency using a balance sheet. Liquidity ratios, such as the current ratio, measure the short-term ability of a company to pay its maturing obligations and to meet unexpected needs for cash. Solvency ratios, such as the debt to assets ratio, measure the ability of a company to survive over a long period.
- 5. **Use the statement of cash flows to evaluate solvency.** Free cash flow indicates a company's ability to generate cash from operations that is sufficient to pay debts, acquire assets, and distribute dividends.
- 6. **Explain the meaning of generally accepted accounting principles.** Generally accepted accounting principles are a set of rules and practices recognized as a general guide for financial reporting purposes. The basic objective of financial reporting is to provide information that is useful for decision making.
- 7. **Discuss financial reporting concepts.** To be judged useful, information should have the primary characteristics of relevance and faithful representation. In addition, useful information is comparable, consistency, verifiable, timely, and understandable.

The *monetary unit assumption* requires that companies include in the accounting records only transaction data that can be expressed in terms of money. The *economic entity assumption* states that economic events can be identified with a particular unit of accountability. The *periodicity assumption* states that the economic life of a business can be divided into artificial time periods and that meaningful accounting reports can be prepared for each period. The *going concern assumption* states that the company will continue in operation long enough to carry out its existing objectives and commitments.

The historical *cost principle* states that the companies should record assets at their cost. The fair value principle indicates that assets and liabilities should be reported at fair value. The *full disclosure principle* requires that companies disclose circumstances and events that matter to financial statement users.

The cost constraint weighs the cost that companies incur to provide a type of information against its benefit to financial statement users.

Solution 223 (5 min.)

- (a) Current ratio = Current assets ÷ Current liabilities = \$90,000 ÷ \$50,000 = 1.8 : 1
- (b) Working capital = Current assets Current liabilities = \$90,000 \$50,000 = \$40,000
- (c) Earnings per share = (Net income–Preferred dividends) ÷ Average common shares outstanding = \$48,000 ÷ 40,000 = \$1.20
- (d) Debt to assets ratio = Total debt ÷ Total assets = \$175,000 ÷ \$250,000 = 70%

- (a) Comment on the relative profitability of the companies by computing the net income and earnings per share for each company for 2014.
- (b) Comment on the relative solvency of the companies by computing the debt to assets ratio and the free cash flow for each company for 2014.

Ans: N/A, LO: 2, 4, 5, Bloom: AN, Difficulty: Medium, Min: 15, AACSB: Analytic, AICPA BB: Legal/Regulatory Perspective, AICPA FN: Reporting, AICPA PC: Problem Solving, IMA: Business Economics

Solution 226 (15 min.)

- (a) Arthur Company appears to be more profitable. Its net income for 2014 is \$228,000 (\$1,850,000 \$1,225,000 \$303,000 \$9,000 \$85,000). Its earnings per share is \$2.28 (\$228,000 ÷ 100,000 shares outstanding). Lancelot's net income for 2014 is \$116,400 (\$620,000 \$365,000 \$98,000 \$3,800 \$36,800). Its earnings per share is \$2.33 (\$116,400 ÷ 50,000 shares outstanding).
- (b) Arthur appears to be slightly more solvent. Arthur's 2014 debt to assets ratio of 22.4% (\$214,825 ÷ \$959,200)^a is lower than Lancelot's ratio of 24.1% (\$64,968 ÷ \$270,064)^b. The lower the percentage of debt to assets, the lower the risk that a company may be unable to pay its debts as they income due.

Another measure of solvency, free cash flow, also indicates that Arthur is more solvent. Arthur had \$27,000 (\$153,000 - \$90,000 - \$36,000) of free cash flow while Lancelot had only \$9,000 (\$44,000 - \$20,000 - \$15,000).

Solution 226 (Cont.)

*\$214,825 (\$66,325 + \$148,500) is Arthur's 2014 total liabilities
 *\$959,200 (\$427,200 + \$532,000) is Arthur's 2014 total assets.

^b\$64,968 (\$35,348 + \$29,620) is Lancelot's 2014 total liabilities \$270,064 (\$130,336 + \$139,728) is Lancelot's 2014 total assets.

Instructions

- (a) For each company, compute the following ratios:
 - 1. Current ratio
 - 2. Debt to assets ratio
 - 3. Earnings per share
- (b) Based on your calculations, discuss the relative liquidity, solvency, and profitability of the two companies.

Ans: N/A, LO: 2, 4, Bloom: AP, Difficulty: Medium, Min: 12, AACSB: Analytic, AICPA BB: Legal/Regulatory Perspective, AICPA FN: Reporting, AICPA PC: Problem Solving, IMA: Business Economics

Solution 228 (12 min.)

| (a) | | | Marin | Nance |
|-----|----|----------------------|------------------------------|------------------------------|
| | 1. | Current ratio | 1.72:1 (\$13,712 ÷ \$7,966) | 2.04:1 (\$28,447 ÷ \$13,950) |
| | 2. | Debt to assets ratio | 73% (\$16,136 ÷ 22,088) | 81% (\$29,222 ÷ \$36,167) |
| | 3. | Earnings per share | \$2.26 (\$565 ÷ 250) | \$2.54 (\$1,221 ÷ 480) |

(b) Based on the current ratio, Nance is more liquid than Marin since its current ratio (2.04:1) is 19% higher than Marin's ratio (1.72:1). However, Marin would be considered more solvent than Nance since its debt to assets ratio (73%) is 10% lower than Nance's debt ratio (81%). A lower debt to assets ratio indicates a company is more solvent and better able to survive over a long period of time.

Nance is more profitable than Marin since its earnings per share and is higher than Marin's respective vaules. Nance's earnings per share (\$2.54) is 12.4% higher than Marin's value.

IMA: Business Economics

(a) Current ratio =
$$\frac{$60,000}{$40,000}$$
 = 1.50:1

Working capital = \$60,000 - \$40,000 = \$20,000

(b) Current ratio =

What do these classes of ratios measure?

- (a) Liquidity ratios.
- (b) Profitability ratios.
- (c) Solvency ratios.

Ans: N/A, LO: 2,4, Bloom: K, Difficulty: Medium, Min: 5, AACSB: Communication, AICPA BB: Legal/Regulatory Perspective, AICPA FN: Reporting, AICPA PC: Communication, IMA: Business Economics

Solution 241

- (a) Liquidity ratios measure the short-term ability of the company to pay its maturing obligations and to meet unexpected needs for cash.
- (b) Profitability ratios measure the income or operating success of a company for a given period of time
- (c) Solvency ratios measure the company's ability to survive over a long period of time.

S-A E 242

Give the definition of current assets, current liabilities and the current ratio.

Ans: N/A, LO: 1, 4, Bloom: K, Difficulty: Medium, Min: 5, AACSB: Communication, AICPA BB: Legal/Regulatory Perspective, AICPA FN: Reporting, AICPA PC: Communication, IMA: Business Economics

Solution 242

Current assets are cash or other resources that are reasonably expected to be realized in cash or sold or consumed in the business within one year or the operating cycle, whichever is longer. Current liabilities are obligations reasonably expected to be paid from the existing current assets or through the creation of other current liabilities within the next year or operating cycle, whichever is longer. The current ratio is a measure used to evaluate a company's liquidity and short-term debt paying ability, computed by dividing current assets by current liabilities.

S-A E 243

Are short-term creditors, long-term creditors, and stockholders primarily interested in the same characteristics of a company? Explain.

Ans: N/A, LO: 2, 4, Bloom: C, Difficulty: Medium, Min: 5, AACSB: Communication, AICPA BB: Legal/Regulatory Perspective, AICPA FN: Reporting, AICPA PC: Communication, IMA: Business Economics

Solution 243

The three parties are not primarily interested in the same characteristics of a company. Short-term creditors are primarily interested in the liquidity of the enterprise. In contrast, long-term creditors and stockholders are primarily interested in the profitability and solvency of the company.

S-A E 244

Relevance and faithful representation are the fundamental qualities of useful information.

- (a) Briefly define each term.
- (b) Why are these characteristics important to users of financial statements?

Ans: N/A, LO: 7, Bloom: C, Difficulty: Medium, Min: 5, AACSB: Communication, AICPA BB: Legal/Regulatory Perspective, AICPA FN: Reporting, AICPA PC: Communication, IMA: Reporting

Solution 244

(a) Relevance is the quality of information that makes a difference in a business decision. Information is considered relevant if it provides information that provides accurate expectations about future, and confirms or corrects prior expectations.

Faithful representation means that information accurately depicts what really happened. Information must be complete, neutral and free from error to provide a faithful representation.

(b) Relevance and faithful representation are important to the users of financial statements because these users do not have first hand knowledge of the operations of the business. In order for these users to make decisions, they must have assurances that the information provided by the company is relevant – makes a difference and faithfully representative – means what the company says. Without these assurances, the users cannot have confidence in the information provided to them.

S-A E 245

You and the CEO of your company are waiting on an elevator. You are going to the 25th floor and the CEO is going to the 35th floor. The CEO says "What is the difference between consistency and comparability?" You have two minutes to respond. What will you say?

Ans: N/A, LO: 7, Bloom: C, Difficulty: Medium, Min: 2, AACSB: Communication, AICPA BB: Legal/Regulatory Perspective, AICPA FN: Reporting, AICPA PC: Communication, IMA: Reporting

Solution 245

You have asked an excellent question and I am glad to respond. Consistency means that a company uses the same accounting principles and methods each year. Decision makers can work with accounting information, knowing that the company is consistently applying with the principles and methods it has chosen. This is why it is so important that we carefully make these choices. There are procedures for making changes and communicating those changes to financial statement users.

Comparability allows users to compare accounting information of different companies. The financial statement footnotes identify many of the principles and procedures that companies use. Comparisons can be made for companies within certain industries or other groupings.

S-A E 246

Comparability and consistency are enhancing qualities that make accounting information useful for decision-making purposes. Briefly explain the difference between these two qualities and explain how they are related to each other.

Ans: N/A, LO: 7, Bloom: C, Difficulty: Medium, Min: 5, AACSB: Communication, AICPA BB: Legal/Regulatory Perspective, AICPA FN: Reporting, AICPA PC: Communication, IMA: Reporting

Solution 246

Comparability results when different companies use the same accounting principles and methods, while consistency results when one company uses the same principles and methods from year to year. The two qualities are related because information must possess relevance, faithful representation, comparability, and consistency to achieve the highest level of decision usefulness. In addition, accounting information for two entities cannot be comparable unless both companies practice consistency in their choice of principles and methods.

S-A E 247

Identify and briefly explain the two fundamental qualities of useful information.

Ans: N/A, LO: 7, Bloom: K, Difficulty: Medium, Min: 5, AACSB: Communication, AICPA BB: Legal/Regulatory Perspective, AICPA FN: Reporting, AICPA PC: Communication, IMA: Reporting

Solution 247

Relevance and faithful representation are the two fundamental qualities of useful information. Relevance is the quality of information that indicates the information makes a difference in a decision. Faithful representation is information that is complete, neutral, and free from error.

S-A E 248

What are three of the five enhancing qualities of useful information.

Ans: N/A, LO: 7, Bloom: K, Difficulty: Medium, Min: 5, AACSB: Communication, AICPA BB: Legal/Regulatory Perspective, AICPA FN: Reporting, AICPA PC: Communication, IMA: Reporting

Solution 248

The FASB and IASB describe the following enhancing qualities of useful information: comparability, consistency, verifiability, timeliness, and understandability.

S-A E 249 (Ethics)

Many bonus plans are based upon the attainment of some specified short-term goal. For example, sales personnel at Metal Crafters are given a bonus of 5% of the amount by which their sales exceed \$100,000. Sometimes the attainment of these goals is achieved by methods detrimental to the long-term needs of the company. Sales representative Sara Crown, for example, finds herself tempted to court certain customers that place large orders, even though she knows they may not be able to pay. She complains that the bonus system itself is unethical.

Required:

Is a bonus system like the one at Metal Crafters unethical? Explain.

Ans: N/A, LO: 4, Bloom: E, Difficulty: Medium, Min: 5, AACSB: Ethics, AICPA BB: Legal/Regulatory Perspective, AICPA FN: Decision Modeling, AICPA PC: Communication, IMA: Performance Measurement

Solution 249

The bonus system described is not necessarily unethical, but it may be short-sighted. When employees are able to identify and address larger concerns (such as Sara's identification of the problem regarding the ability of a customer to pay) then such issues should probably become part of the system of bonuses. It is very difficult to set a bonus plan that allows for all contingencies, however. Since sales representatives are hired to generate sales, they most often are rewarded based on generating sales. Some of the future events, such as customers defaulting on payments, may not be the fault of the sales representative. For Sara Crown to create sales by soliciting customers with a poor payment record would be unethical on her part. She is required to use integrity, even when the possibility exists of her not using it, and even when she might gain by not using it.

S-A E 250 (Communication)

Sunshine Sugar grows sugar cane in Florida, California, and Hawaii. Its investment in land to grow sugar exceeds \$2 million. Currently, land whose original cost was more than \$300,000 in Florida is threatened by plans to flood the Everglades to reclaim the wetlands. Sunshine plans to fight vigorously to keep its land in production, particularly because most of the rest of its land is in California, which is threatened by water shortages. The land in Florida is also significantly more productive than that in California, and the wages paid to workers to process the sugar cane are substantially less. Current plans include litigation to prevent government seizure of the land, an extensive public education campaign, and intense lobbying efforts.

Required:

Sunshine has determined that a footnote disclosure should be made in the financial statements to alert the investors of the threat to the land. Carefully consider how much of the above information is appropriate for inclusion in the footnote. Write the footnote.

Ans: N/A, LO: 7, Bloom: E, Difficulty: Medium, Min: 5, AACSB: Communication, AICPA BB: Legal/Regulatory Perspective, AICPA FN: Reporting, AICPA PC: Communication, IMA: Reporting

Solution 250

NOTE: A portion of the most valuable land owned by the company is the subject of plans by the Environmental Protection Agency to flood the Florida Everglades to "reclaim" the so-called wetlands. The company is working with the United States Department of Agriculture and other agencies to prevent this result. The company will be spending money to educate the public about this issue. Currently, land costing around \$300,000 is at risk.

Usually the details of exactly why the land is so valuable to the company are not appropriate for inclusion. Footnotes need not be emotional or dramatic, either. There should be a systematic listing of at least the minimum amount the public has a right to know—how much land is at risk, and the nature of the risk.
