Question Type: Qualitative

5) The following accounts represent the financial status of Fandango Company as of October 1. The business has cash of \$100,000. It must pay its suppliers \$250,000 within 60 days. It has a mortgage outstanding of \$3.1 million, of which \$100,000 is owed within the next 12 months. Inventory totals \$700,000 and the net book value of its land, building and equipment is \$3.6 million. Income tax payable equals \$50,000. It has \$1 million in shareholder's equity. The value of the Company's working capital is

- A) \$300,000
- B) \$350,000
- C) \$800,000
- D) \$400,000
- E) \$1 million

Answer: D

Diff: 2 Type: MC Page Ref: 21

Skill: Applied

Question Type: Quantitative

6) Fandango company reported current liabilities of \$520,000, total assets of \$10,560,000, and shareholders equity of \$4,750,000 on its July balance sheet. Which of the following would the business have to have reported to complete the balance sheet equation?

- A) \$14,790,000 in long-term liabilities
- B) \$5,290,000 in long-term liabilities
- C) \$10,040,000 in long-term liabilities
- D) \$10,040,000 in accumulated amortization
- E) \$14,790,000 in accumulated amortization

Answer: B

Question Type: Quantitative

7) On May 15 RAJ Inc. received prepayment of \$132,000 representing the total amount to cover a purchase order requiring delivery of the custom blended product in four equal monthly shipments. The first shipment was scheduled for June 23. RAJ Inc.'s income statement showed

- A) The full amount on the September statement
- B) The full amount on the May statement
- C) The full amount on the June statement
- D) \$33,000 on the May statement
- E) \$33,000 on the June statement

Answer: E

Diff: 2 Type: MC Page Ref: 22

Skill: Applied

Question Type: Quantitative

8) Fandango Co. Ltd. uses straight-line amortization. If the book value of a new piece of equipment is \$36,000 and is expected to last five years with no salvage value, the monthly amortization expense will be

- A) \$360
- B) \$600
- C) \$3,000
- D) \$7,200
- E) \$36,000

Answer: B

Question Type: Quantitative

9) The Matching Principle used in accounting is consistent with

- A) Cash based accounting practices
- B) The timing of cash inflows and outflows
- C) Calendar based accounting practices
- D) Accrual based accounting practices
- E) Standard credit and collections practices

Answer: D

Diff: 2 Type: MC Page Ref: 24-25

Skill: Applied

Question Type: Qualitative

10) In the previous year, company XYZ had 500,000 shares outstanding, and an EPS of \$1.50 a share. This year, the company performed a buyback of 20% of the outstanding shares and by year end EPS had risen to \$1.60 per share. The remaining shareholders should be

- A) Positive because the company's earnings increased
- B) Positive because shareholder earnings increased
- C) Concerned because the company's earnings declined
- D) Concerned because the number of shares decreased
- E) Unconcerned because share price is not affected by company earnings

Answer: C

Diff: 3 Type: MC Page Ref: 24

Skill: Applied

Question Type: Quantitative

11) CapiCal Enterprises recorded net income of \$20 million for the year. The company has 1,500,000 preferred shares outstanding, with a stated dividend of \$.80. It also has 5 million common shares outstanding. If the company wishes its total dividend payout for the year to equal 20% of its net income, what will be the dividend paid on each common share?

- A) \$.43
- B) \$.56
- C) \$.62
- D) \$.80
- E) \$.82

Answer: B

Question Type: Quantitative

23) A Terminal Loss occurs when the selling price of a company's asset is

- A) Equal to the undepreciated capital cost (UCC)
- B) Higher than the undepreciated capital cost (UCC)
- C) Less than the undepreciated capital costs (UCC)
- D) Higher than the book value of the asset
- E) Less than book value, but higher than the undepreciated capital costs (UCC)

Answer: C

Diff: 2 Type: MC Page Ref: 41,42

Skill: Recall

Question Type: Qualitative

24) A factory was gutted by fire and none of its machinery was salvaged. The machinery was underinsured. The closing balance of the undepreciated capital cost (UCC) account to which the machinery had belonged was \$9,750,000 of which \$1,113,500 represented the lost assets. The CCA rate on this asset class is 30%. On the year's income tax return, the company

- A) Can claim \$3,704,450 to realize the full CCA on the lost assets
- B) Can claim \$2,590,950
- C) Cannot use any portion of the \$1,113,500 nor can it use it in the future as the assets no longer exist
- D) Can claim \$2,925,000
- E) Cannot use any portion of the \$1,113,500 until replacement assets have been purchased

Answer: D

Diff: 3 Type: MC Page Ref: 40,41

Skill: Applied

Question Type: Quantitative

25) When an asset, which had been in use for several years, is sold at a price that exceeds the balance in the UCC account but is less than book value

- A) The excess amount is called CCA
- B) The excess amount is called is a capital gain
- C) The excess amount is called recaptured CCA
- D) The excess amount reduce taxable income
- E) The excess amount is not considered income

Answer: C
