

Student name: _____

Nishaa has been promoted and is now in charge of planning and managing her firm's long-term investments. In other words, she is in charge of:

sales planning.

asset allocation.

risk management.

capital budgeting.

working capital management.

Uptown Markets is financed with 45 percent debt and 55 percent equity. This mixture of debt and equity is referred to as the firm's:

capital structure.

capital budget.

asset allocation.

working capital.

risk structure.

Raleigh BBQ has \$48,000 in current assets and \$39,000 in current liabilities. Decisions related to these accounts are referred to as:

capital structure decisions.

capital budgeting decisions.

working capital management.

operating management.

fixed account structure.

Vera opened a used bookstore and is both the 100 percent owner and the store's manager. Which type of business entity does Vera own if she is personally liable for all the store's debts?

Sole proprietorship

Limited partnership

Corporation

Joint stock company

General partnership

Deandre and Mason both enjoy sunshine, water, and surfboards. Thus, the two friends decided to create a business together renting surfboards, paddle boats, and inflatable devices in California. Deandre and Mason will equally share in the decision making and in the business profits or losses. Which type of business did they create if they both have full personal liability for the firm's debts?

Sole proprietorship

Limited partnership

Corporation

Joint stock company

General partnership

Jordan and Carmen created a firm that is a separate legal entity and will share ownership of that firm on a 75/25 basis. Which type of entity did they create if they have no personal liability for the firm's debts?

Sole proprietorship

Limited partnership

General partnership

Corporation

Public company

The potential conflict of interest between a firm's owners and its managers is referred to as which type of conflict?

Organizational

Structural

Formative

Agency

Territorial

An employee has a claim on the cash flows of Westlake Machines. This claim is defined as a claim by one of the firm's:

residual owners.

shareholders.

financiers.

provisional partners.

stakeholders.

The shareholders of Qiang's Markets would benefit if the firm were to be acquired by Better Foods. However, Weil's board of directors rejects the acquisition offer. This is an example of:

a corporate takeover.

a capital structure issue.

a working capital decision.

an agency conflict.

a compensation issue.

When conducting a financial analysis of a firm, financial analysts:

cannot use accounting information as it is historical.

rely solely on accounting information.

frequently use accounting information.

ignore accounting information but do use marketing information.

assume the future will be a repeat of the past as reflected in the firm's accounting reports.

Silvia is employed as a currency trader in the Japanese yen market. Her job falls into which one of the following areas of finance?

International finance

Financial institutions

Corporate finance

Capital management

Personal finance

If you accept a job as a domestic security analyst for a brokerage firm, you are most likely working in which one of the following financial areas?

International finance

Private placements

Corporate finance

Capital management

Investments

Which one of the following occupations best fits into the corporate area of finance?

Mortgage broker

Treasury bill analyst

Chief financial officer

Insurance risk manager

Local bank manager

Which one of the following functions is generally a responsibility assigned to the corporate treasurer?

Cost accounting

Data processing

Corporate taxes

Financial accounting

Capital expenditures

Which one of the following functions should be assigned to the corporate treasurer rather than to the controller?

Data processing

Cost accounting

Tax management

Cash management

Financial accounting

Which one of the following correctly defines a common chain of command within a corporation?

The controller reports directly to the corporate treasurer.

The treasurer reports directly to the board of directors.

The chief financial officer reports directly to the board of directors.

The credit manager reports directly to the controller.

The controller reports directly to the chief financial officer.

Capital budgeting includes the evaluation of which of the following?

Size of future cash flows only

Size and timing of future cash flows only

Timing and risk of future cash flows only

Risk and size of future cash flows only

Size, timing, and risk of future cash flows

Which one of the following is a working capital decision?

How should the firm raise additional capital to fund its expansion?

What debt-equity ratio is best suited to the firm?

What is the cost of debt financing?

Should the firm borrow money for five or for ten years?

How much cash should the firm keep in reserve?

Which one of the following is a capital structure decision?

Determining the optimal inventory level

Establishing the preferred debt-equity level

Selecting new equipment to purchase

Setting the terms of sale for credit sales

Determining when suppliers should be paid

Working capital management includes which one of the following?

Deciding which new projects to accept

Deciding whether to purchase a new machine or fix a currently owned machine

Determining which customers will be granted credit

Determining how many new shares of stock should be issued

Establishing the target debt-equity ratio

The daily financial operations of a firm are primarily controlled by managing the:
total debt level.

working capital.

capital structure.

capital budget.

long-term liabilities.

A sole proprietorship:

provides limited financial liability for its owner.

involves significant legal costs during the formation process.

has an unlimited life.

has its profits taxed as personal income.

can generally raise significant capital from non-owner sources.

Which one of the following forms of business organization offers liability protection to some of its owners but not to all of its owners?

Sole proprietorship

General partnership

Limited partnership

Limited liability company

Corporation

Maria is the sole proprietor of an antique store that is located in a rented warehouse. The store has an outstanding loan with the local bank but no other debt obligations. There are no specific assets pledged as security for the loan. Due to a sudden and unexpected downturn in the economy, the store is unable to generate sufficient funds to pay the loan payments due to the bank. Which of the following options does the bank have to collect the money it is owed?

1. Sell the inventory and apply the proceeds to the debt
2. Sell the lighting fixtures from the building and apply the proceeds to the debt
3. Withdraw funds from Maria's personal account at the bank to pay the store's debt
4. Sell any assets Maria personally owns and apply the proceeds to the store's debt

1 only

3 only

1 and 2 only

1, 2, and 3 only

1, 3, and 4 only

Which one of the following statements correctly applies to a sole proprietorship?

The business entity has an unlimited life.

The ownership can easily be transferred to another individual.

The owner enjoys limited liability for the firm's debts.

Debt financing is easy to arrange in the firm's name.

Obtaining additional equity is dependent on the owner's personal finances.

Which one of the following applies to a general partnership?

The firm's operations must be controlled by a single partner.

Any one of the partners can be held solely liable for all of the partnership's debt.

The profits of the firm are taxed as a separate entity.

Each partner's liability for the firm's debts is limited to each partner's investment in the firm.

The profits of a general partnership are taxed the same as those of a corporation.

In a general partnership, each partner is personally liable for:

only the partnership debts that he or she personally created.

his or her proportionate share of all partnership debts regardless of which partner incurred that debt.

the total debts of the partnership, even if he or she was unaware of those debts.

the debts of the partnership up to the amount he or she invested in the firm.

all personal and partnership debts incurred by any partner, even if he or she was unaware of those debts.

Which one of the following is an advantage of being a limited partner?

Nontaxable share of any profits

Control over the daily operations of the firm

Losses limited to capital invested

Unlimited profits without risk of incurring a loss

Active market for ownership interest

Which one of the following statements about a limited partnership is correct?

All partners have their losses limited to their capital investment in the partnership.

All partners are treated equally.

There must be at least one general partner.

Equity financing is easy to obtain and unlimited.

Any partner can transfer his or her ownership interest without ending the partnership.

A corporation:

is ultimately controlled by its board of directors.

is a legal entity separate from its owners.

is prohibited from entering into contractual agreements.

has its identity defined by its bylaws.

has its existence regulated by the rules set forth in its charter.

Which one of the following is contained in the corporate bylaws?

Procedures for electing corporate directors

State of incorporation

Number of authorized shares

Intended life of the corporation

Business purpose of the corporation

One advantage of the corporate form of organization is the:

taxation of the corporate profits.

unlimited liability for its shareholders.

double taxation of profits.

ability to raise larger sums of equity capital than other organizational forms.

ease of formation compared to other organizational forms.

Corporate shareholders:

are proportionately liable for the firm's debts.

are protected from all financial losses.

have the ability to change the corporation's bylaws.

receive tax-free distributions since all profits are taxed at the corporate level.

have basically no control over the actual corporation.

A limited liability company (LLC):

is a hybrid between a sole proprietorship and a partnership.

prefers its profits be taxed as personal income to its owners.

that meets the IRS criteria to be an LLC will be taxed like a corporation.

provides limited liability for some, but not all, of its owners.

cannot be created for professional service firms, such as accountants and attorneys.

Limited liability companies are primarily designed to:

allow a portion of their owners to enjoy limited liability while granting the other portion of their owners control over the entity.

provide the benefits of the corporate structure only to foreign-based entities.

spin off a wholly owned subsidiary.

allow companies to reorganize themselves through the bankruptcy process.

provide limited liability while avoiding double taxation.

The primary goal of financial management is to maximize:

current profits.

market share.

current dividends.

the market value of existing stock.

revenue growth.

The primary goal of financial management is most associated with increasing the:

dollar amount of each sale.

traffic flow within the firm's stores.

fixed costs while lowering the variable costs.

firm's liquidity.

market value of the firm.

The goal of financial management is to increase the:

future value of the firm's total equity.

book value of equity.

dividends paid per share.

current market value per share.

number of shares outstanding.

What is the primary goal of financial management for a sole proprietorship?

Maximize net income given the current resources of the firm

Decrease long-term debt to reduce the risk to the owner

Minimize the tax impact on the proprietor

Maximize the market value of the equity

Minimize the reliance on fixed costs

The Sarbanes-Oxley Act in 2002 was primarily prompted by which one of the following from the 1990s?

Increased stock market volatility

Corporate accounting and financial fraud

Increased executive compensation

Increased foreign investment in U.S. stock markets

Increased use of tax loopholes

The Sarbanes-Oxley Act of 2002 has:

reduced the annual compliance costs of all publicly traded firms in the U.S.

decreased senior management's involvement in the corporate annual report.

greatly increased the number of U.S. firms that are going public for the first time.

decreased the number of U.S. firms going public on foreign exchanges.

essentially made officers of publicly traded firms personally responsible for the firm's financial statements.

Which one of the following best describes the primary intent of the Sarbanes-Oxley Act of 2002?

Decrease the number of corporations that can be publicly traded

Increase the protections against corporate fraud

Limit secondary issues of corporate securities

Increase the dividends paid to shareholders

Increase the number of firms that "go dark"

The Sarbanes-Oxley Act:

requires the corporate officers to personally attest that the financial statements are a fair representation of the company's financial results.

requires all corporations to fully disclose its financial dealings to the general public.

places the responsibility for a firm's financial statements solely on the chief financial officer.

requires that the board of directors be solely responsible for the firm's financial dealings.

places total responsibility for the financial statements of a firm on the auditor who certifies the statements.

Which one of the following situations is most apt to create an agency conflict?

Compensating a manager based on his or her division's net income

Giving all employees a bonus if a certain level of efficiency is maintained

Hiring an independent consultant to study the operating efficiency of the firm

Basing management bonuses on the length of employment

Laying off employees during a slack period

An agency issue is most apt to develop when:

a firm encounters a period of stagnant growth.

a firm downsizes.

the control of a firm is separated from the firm's ownership.

the firm's owner is also its key manager.

a firm is structured as a general partnership.

Which one of the following is most apt to align management's priorities with shareholders' interests?

Holding corporate and shareholder meetings at high-end resort-type locations preferred by managers

Compensating managers with shares of stock that must be held for a minimum of three years

Paying a special management bonus on every fifth year of employment

Increasing the number of paid holidays that long-term employees are entitled to receive
Allowing employees to retire early with full retirement benefits

Probably the least effective means of aligning management goals with shareholder interests is:
the potential for a proxy fight by an unhappy segment of shareholders.
basing all management bonuses on performance goals.
holding management salaries steady while increasing stock option grants.
the threat of a takeover of the firm.
automatically increasing management salaries on an annual basis.

Levi had an unexpected surprise when he returned home this morning. He found that a chemical spill from a local manufacturer had spilled over onto his property. The potential claim that he has against this manufacturer is that of a(n):

general creditor.
debtholder.
shareholder.
stakeholder.
agent.

One example of a primary market transaction would be the:
sale of 100 shares of stock by Maria to her best friend.
purchase by Theo of 5,000 shares of stock from his father.
sale of 1,000 shares of newly issued stock by Alt Company to Miquel.
sale by Terry of 50,000 shares of stock to his brother.
sale of 5,000 shares of stock owned by a corporate CEO to his son.

You contacted your stock broker this morning and placed an order to sell 300 shares of a stock that trades on the NYSE. This sale will occur in the:

dealer market.

over-the-counter market.

secondary market.

primary market.

tertiary market.

Which one of the following statements is correct?

All secondary markets are dealer markets.

All secondary markets are broker markets.

All stock trades between existing shareholders are primary market transactions.

All stock transactions are secondary market transactions.

All over-the-counter sales occur in dealer markets.

The issuer of a security must be involved in all _____ transactions involving that security.

exchange-listed

secondary market

over-the-counter

dealer market

primary market

Which one of the following parties can sell shares of ABC stock in the primary market?

ABC Company

Any corporation, other than the ABC Company

Any institutional shareholder

Any private individual shareholder

Only officers and directors of ABC Company

Security dealers:

match buyers with sellers.

buy and sell from their own inventory.

operate on a physical trading floor.

operate exclusively in auction markets.

are limited to trading non-listed stocks.

An auction market:

is an electronic means of exchanging securities.

has a physical trading floor.

handles primary market transactions exclusively.

is also referred to as an OTC market.

is dealer-based.

Which one of the following statements is correct?

Nasdaq has more listed stocks than does the NYSE.

The NYSE is a dealer market.

Nasdaq is an auction market.

Nasdaq has the most stringent listing requirements of any U.S. exchange.

The trading floor for Nasdaq is located in Chicago.

A private placement is most apt to involve:

a large number of private investors.

only foreign investors.

a life-insurance company.

several private securities dealers.

the U.S. Treasury department.

Which one of the following statements is correct?

All of the major stock exchanges are U.S. based.

The NYSE was created by the National Association of Securities Dealers in the early 1930s.

The Chicago Stock Exchange is a dealer market.

OTC markets have a physical trading floor generally located in either New York City or Chicago.

The primary purpose of the NYSE is to match buyers with sellers.

Which of the following statements is false?

Stock trading apps allow investors to trade stocks commission-free.

Acorns is a creative crowdfunding app, allowing smaller investors to join together to fund design ventures.

Apps allow small investors to participate in the stock market much more easily.

Robo-advisors provide investment advice based on mathematical rules or algorithms.

Budgeting apps allow people to keep track of income, monthly payments, expenditures, and more, right on a mobile phone.

Which of the following is not a basic area of finance as described by the text?

Corporate finance

Investments

Accounting

International finance

Fintech

Which of the following statements regarding buy now, pay later (BNPL) is most accurate?

Kickstarter is an example of a BNPL company.

BNPL is not considered to be a part of fintech.

BNPL companies can work with retailers to fund purchases made by customers.

BNPL loans often carry a higher interest rate than a credit card.

BNPL loans tend to be less personalized than a credit card loan.

Which of the following is a list of records that are used to record transactions and, by design, is resistant to alteration and thus provides an accurate record of transactions?

Blockchain

Kickstarter

Insurtech

BNPL

STEM

What was the first cryptocurrency that was released in 2009?

Bitcoin

Kickstarter

Ethereum

BNB

Tether

What is the term for a new form of business organization that is for-profit, but has three additional legal attributes: accountability, transparency, and purpose?

A Corporation

B Corporation

S Corporation

C Partnership
