E/FALSE. Write 'T' if the statement is true and 'F' if the statement is false.	
1) Property, plant and equipment are assets held for sale.	1)
Answer: True • False	
2) Non-current assets are any liabilities that are used in the operations of a business.	2)
Answer: True • False	
3) Non-current assets can be divided into two groups including tangible and intangible assets. These assets are generally used in operations of a business and have useful lives extending over more than one accounting period.	3)
Answer: • True False	
4) Land purchased as a building site is a tangible asset called property, plant and	4)
equipment and is classified under the "Long-term Investments" section on the balance sheet.	
Answer: True • False	
5) The cost of an asset includes all normal and reasonable expenditures necessary to get it	5)
in place and ready for its intended use.	·
Answer: • True False	
https://selldocx.com/products. 6)est backmannends.chanpagedsduring unpacking, the repairs are added to its cost.	6)
Answer: True • False	
7) To be charged to and reported as part of the cost of property, plant and equipment, an expenditure must be normal, reasonable, and necessary in preparing the asset for its intended use.	7)
Answer: • True False	
8) The purchase of real estate that includes land, building, and land improvements is called	8)
a lump-sum purchase. Answer: • True False	
A TISWELL VITAC TAISE	
9) Any expenditures for legal fees, surveying, and accrued property taxes should not be included in the cost of land.	9)
Answer: True • False	
10) Revenue expenditures are additional costs of property, plant and equipment that provide	10)
material benefits extending beyond the current period.	
Answer: True • False	

11) Revenue expenditures are expenditures to keep assets in normal operating condition.	11)
Answer: • True False	
12) Capital expenditures are also called balance sheet expenditures.	12)
Answer: • True False	
13) SportsWorld spent \$17,000 to remodel its store. This cost will be recognized with a debit to Store Building.	13)
Answer: • True False	
14) Treating small-dollar-amount capital expenditures as revenue expenditures is likely to mislead users of financial statements.	14)
Answer: True • False	
15) The cost principle requires that an asset be recorded at the cash or cash equivalent amount given in exchange.	15)
Answer: • True False	
16) Subsequent expenditures are purchases made after the acquisition of equipment to operate, maintain, repair, and improve it.	16)
Answer: • True False	
17) Because land has unlimited life, it is not subject to depreciation. Therefore, items that increase the usefulness of the land such as parking lots are also not depreciated.	17)
Answer: True • False	
18) Depreciation is the process of allocating the cost of a tangible asset in a rational and systematic manner over the asset's estimated useful life. Answer: • True False	18)
19) Residual value is an estimate of an asset's value at the end of its useful life. Answer: • True False	19)
20) Inadequacy refers to the condition where the capacity of a property, plant and equipment item is too small to meet the company's productive demands. Answer: • True False	20)
21) Depreciation should always be recorded as soon as an asset is purchased.	21)
Answer: True • False	,
22) Depreciation measures the decline in market value of an asset.	22)
Answer: True • False	
23) On the balance sheet, it is not necessary to report both the cost and the accumulated depreciation of an asset.	23)
Answer: True • False	

24)	Accumulated depreciation represents funds set aside to buy new assets when the assets currently owned are replaced.	24)
	Answer: True • False	
25)	The full disclosure principle allows us to record an asset costing \$50 as a revenue expenditure.	25)
	Answer: True • False	
26)	Regardless of the method of depreciation, total depreciation expense will be the same over an asset's useful life.	26)
	Answer: • True False	
27)	Financial accounting and tax accounting require the same recordkeeping; therefore, there should be no difference in results between the two accounting systems. Answer: True • False	27)
28)	Companies are required to use the straight line depreciation method for tax purposes because this method yields the lowest depreciation expense and results in the highest	28)
	payment of tax. Answer: True • False	
29)	The Income Tax Act requires that companies use a declining-balance method for calculating the maximum capital cost allowance that may be claimed in any period. Answer: • True False	29)
30)	The most frequently used method of depreciation is the straight-line method. Answer: • True False	30)
31)	The cost of an asset plus its accumulated depreciation equals the asset's book value. Answer: True • False	31)
32)	The units of production method of depreciation charges a varying amount of expense for each period of an asset's useful life depending on its usage. Answer: • True False	32)
33)	An accelerated depreciation method yields smaller depreciation expense in the early years of an asset's life and larger charges in later years. Answer: True • False	33)
34)	The double-declining balance method is applied by (1) calculating the asset's straight-line depreciation rate, (2) doubling it, (3) subtracting residual value from cost, and (4) multiplying the rate times the cost. Answer: True • False	34)

35)	SportsWorld purchased store equipment for \$65,000. The equipment has an estimated	35)
	residual value of \$6,000, with an estimated useful life of 10 years. The annual	
	depreciation using the straight-line method will be \$3,900 per year.	
	Answer: True • False	
36)	A company is required to purchase all assets at the beginning of an accounting period so	36)
,	that a full year's worth of depreciation can be taken.	,
	Answer: True • False	
37)	Machinery having a four-year useful life and a residual value of \$5,000 was acquired for \$65,000 cash on June 28. Using the pagest whole month method, the company	37)
	for \$65,000 cash on June 28. Using the nearest whole month method, the company would recognize \$11,250 for depreciation expense at the end of the first year, December	
	31.	
	Answer: True • False	
38)	A depreciable asset that is purchased on March 18 would be depreciated for nine	38)
	months of the first year, if the fiscal year ends on December 31 using nearest whole month method.	
	Answer: True • False	
	Alliswell. True Vituise	
39)	The half year rule is the partial-year depreciation method that calculates depreciation by	39)
	determining if the asset was used for more than half of the month.	
	Answer: True • False	
40)	Because depreciation is based on predictions of residual value and useful life,	40)
10)	depreciation is an estimate.	
	Answer: • True False	
41)	Machinery after two years worth of depreciation has an opening book value of \$6,400.	41)
	At the beginning of the third year, the predicted number of years remaining in its useful life changes from three years to four years and its estimated residual value changes from	
	the original \$1,000 to \$400. The revised annual depreciation using the straight-line	
	method is \$1,500.	
	Answer: • True False	
40\	An exact that east \$5,000 has a symment book value of \$2,000. A maxision of the yeaful	42)
42)	An asset that cost \$5,000 has a current book value of \$2,000. A revision of the useful life of the asset estimates the asset has a remaining useful life of four years and will	42)
	have a residual value of \$400. Using the straight-line method, the revised depreciation	
	will be \$500 per year.	
	Answer: True • False	
42 \	When the cost of the esset changes because of a subsequent conited expanditure married	12)
43)	When the cost of the asset changes because of a subsequent capital expenditure, revised depreciation for current and future periods must be calculated and adjusted.	43)
	Answer: • True False	

44)	Depreciation amounts can be revised because of changes in the estimates for residual value, useful life or because of subsequent revenue expenditures.	44)
	Answer: True • False	
45)	An asset with a current book value of \$5,000 has a current market value of \$2,000. The	45)
	company should recognize an impairment loss of \$3,000. Answer: • True False	
46)	If the book value of a property, plant and equipment item is less than the amount to be	46)
10)	recovered through the asset's use or sale, the difference is an impairment loss and the asset is described as impaired.	
	Answer: True • False	
47)	Impairment can result from a variety of situations that include a significant decline in an asset's market value or a major adverse effect caused by technological, economic, or legal factors.	47)
	Answer: • True False	
48)	Impairment losses must be assessed by companies on an annual basis.	48)
	Answer: • True False	
49)	The gain or loss from disposal of property, plant and equipment is the difference between an asset's book value and the value received.	49)
	Answer: • True False	
50)	Property, plant and equipment can be disposed of by discarding, sale, or exchange of the asset.	50)
	Answer: • True False	
51)	The first step in accounting for the disposal of property, plant and equipment is calculating the gain or loss on disposal.	51)
	Answer: True • False	
52)	Equipment costing \$14,000 with accumulated depreciation of \$10,000 was sold for \$3,000. The company should recognize a \$1,000 loss on disposal of the equipment.	52)
	Answer: • True False	
53)	At the time a plant asset is being discarded or sold, it is necessary to update the accumulated depreciation of the plant asset to the date of disposal.	53)
	Answer: • True False	
54)	When accumulated depreciation equals the asset's cost, the asset is fully depreciated. The entry to record the removal of the asset is called exchanging the equipment.	54)
	Answer: True • False	

55)	When assigning values to an exchange of assets you should use the fair value of the	55)
	asset given up.	
	Answer: • True False	
56)	When assigning values to an exchange of assets you should always use the fair value of	56)
·	the asset received.	
	Answer: True • False

Answer: A	
86) A machine originally had an estimated service life of 5 years, and after 3 years, it was	86)
decided that the original estimate should have been for 10 years. The remaining cost to	,
be depreciated should be allocated over the next:	
•	
A) 2 years. B) 10 years. C) 6 years. D) 7 years. E) 5 years.	
Answer: D	

87) A change in accounting estimate is:	87)
A) Reflected in current and future financial statements and also requires modification	
of past statements. B) Reflected only in current and future financial statements.	
C) Both reflected only in current and future financial statements and a change in a calculated amount used in the financial statements resulting from new information or subsequent developments and from better insight or improved judgment.	
D) A change in a calculated amount used in the financial statements resulting from new information or subsequent developments and from better insight or improved judgment.E) None of these answers is correct.	
Answer: C	
Allswell. C	
88) Creek Construction owned a bulldozer which was destroyed by fire. The bulldozer	88)
originally cost \$38,000. The accumulated depreciation recorded to the date of loss was \$20,000. The proceeds from the insurance company were \$20,000. Creek Construction should recognize:	
A) A loss of \$38,000.	
B) A gain of \$2,000.	
C) An expense of \$2,000. D) A loss of \$2,000.	
E) A gain of \$20,000.	
Answer: B	
89) A main accounting issue for property, plant and equipment is:	89)
A) Testing property, plant and equipment for impairment.	
B) Disposal of property, plant and equipment.	
C) The cost of property, plant and equipment. D) Accounting for repairs and improvements to property, plant and equipment.	
D) Accounting for repairs and improvements to property, plant and equipment. E) All of these answers are correct.	
Answer: E	
ATISVOI. L	
90) If the book value (or carrying amount) of a PPE item is greater than the amount to be	90)
recovered through the asset's use or sale, the asset is said to be:	
A) Exchanged.	
B) Declined.	
C) Improved.	
D) Impaired.	
E) Accumulated.	
Answer: D	

91) Inadequacy refers to:	91)
A) An asset that is no longer useful.	
B) An asset that is worn out.	
C) The same as obsolescence.	
D) The condition where the capacity of a property, plant and equipment asset is too	
small to meet the company's productive demands.	
E) All of these answers are correct.	
Answer: D	
92) Residual value is:	92)
A) The cost of an asset minus its accumulated depreciation.	,
B) The same as an asset's service life.	
C) An estimate of the asset's value at the end of its useful life.	
D) Another name for market value.	
E) All of these answers are correct.	
Answer: C	
71137701. 3	
93) Once the estimated depreciation for an asset is calculated:	93)
A) The estimate itself cannot be changed, however, new information should be	
disclosed in financial statement footnotes.	
B) It may be revised based on new information and any changes are accumulated and recognized when the asset is sold.	
C) It may be revised based on new information.	
D) It cannot be changed due to the historical cost principle.	
E) Any changes are accumulated and recognized when the asset is sold.	
Answer: C	
94) Subsequent capital expenditures:	94)
A) Are expenditures making a property, plant and equipment asset more efficient.	
B) Are added to the cost of the asset.	
C) Are often called improvements.	
D) Often extend an asset's useful life.	
E) All of these answers are correct.	
Answer: E	
95) Natural resources:	95)
A) Include trees, mineral deposits, and oil and gas fields.	
B) Can be amortized.	
C) Are consumed when used.	
D) Are long-term assets.	
E) All of these answers are correct.	
Answer: E	

96) Property, plant and equipment include:	96)
A) Buildings.	
B) Machinery and equipment.	
C) Land.	
D) Land improvements.	
E) All of these answers are correct.	
Answer: E	
97) Intangible assets:	97)
A) Are rights, privileges, and competitive advantages to the owner, used in operations, having no physical substance.	
B) Can be amortized.	
C) Are rights, privileges, and competitive advantages to the owner, used in operations, having no physical substance and can be amortized.	
D) Include patents, leaseholds, and land improvements.	
E) All of these answers are correct.	
Answer: C	
98) Additional subsequent expenditures that result in future economic benefits and can be	98)
reliably measured should be treated as a(n):	,
A) Asset expenditure.	
B) Revenue expenditure.	
C) Capital expenditure.	
D) Contributed capital expenditure.	
E) Balance sheet expenditure.	
Answer: C	
00) Factor(s) that might limit an intensible asset's useful life include:	00)
99) Factor(s) that might limit an intangible asset's useful life include: A) Regulatory.	99)
B) Contractual.	
C) Economic.	
D) Legal.	
E) All of the above answers are correct.	
Answer: E	
100) The cost of land can include:	100)
A) Purchase price.	
B) Real estate commissions.	
C) Costs of removing existing buildings.	
D) Back property taxes.	
E) All of these answers are correct.	

Answer: E

101) Each year goodwill is examined to see if its value has been impaired. If the value has	101)
been impaired goodwill will:	
A) Decrease.	
B) Not change.	
C) Increase.	
D) Be depreciated.	
E) Be amortized.	
Answer: A	
102) The formula for calculating straight-line depreciation is:	102)
A) Cost divided by useful life in years.	
B) Depreciable cost divided by the useful life in years.	
C) Cost plus residual value divided by the useful life in years.	
D) Depreciable cost divided by useful life in units.	
E) Cost divided by useful life in units.	
Answer: B	
103) Ordinary repairs:	103)
A) Maintain an asset.	
B) Do not extend an asset's useful life.	
C) Are expenditures to keep an asset in normal operating condition.	
D) Do not materially increase the asset's life or productive capabilities.	
E) All of these answers are correct.	
Answer: E	
104) The straight-line method and the double-declining-balance method of depreciation:	104)
A) Produce the same total depreciation over an asset's useful life.	
B) Allocate an asset's cost in a systematic and rational manner.	
C) Are both acceptable for GAAP.	
D) Do not produce the same book value each year.	
E) All of these answers are correct.	
Answer: E	
105) The appropriate way to amortize goodwill is:	105)
A) Goodwill is not amortized or depreciated.	
B) Straight-line over a maximum of 40 years.	
C) Double-declining-balance over a period not to exceed 20 years.	
D) Straight-line over a maximum of 20 years.	
E) Over the estimated useful life of the goodwill.	

Answer: A

106) Legal permissions for the extraction of oil and gas from the earth are known as:	106)
A) Drilling rights.	
B) Trademarks.	
C) Copyrights.	
D) Leaseholds.	
E) Patents.	
Answer: A	
107) An asset can be disposed of by:	107)
A) Donating it to charity.	
B) Selling.	
C) Exchanging.	
D) Discarding.	
E) All of these answers are correct.	
Answer: E	
108) Revenue expenditures:	108)
A) Benefit future periods.	
B) Are additional costs related to property, plant and equipment that do not materially	
increase the asset's life.	
C) Are balance sheet expenditures.	
D) Extend the asset's useful life.	
E) Are debited to asset accounts.	
Answer: B	
109) Depreciation is usually recorded:	109)
A) From the actual date of purchase.	
B) From the beginning of the accounting year in which an asset is purchased.	
C) From the end of the month nearest the actual purchase date.	
D) From the first of the month nearest the actual purchase date.	
E) By any of the above methods.	
Answer: D	
110) Land improvements are:	110)
A) Assets that increase the usefulness of land, and like land are not depreciated.	
B) Never depreciated.	
C) Included in the land account.	
D) Expensed in the period incurred.	
E) Assets that increase the usefulness of land, but that have a limited useful life.	

Answer: E

 111) Which of the following statements is true with respect to intangible assets? A) Goodwill is an intangible asset that is amortized and tested for impairment. B) Intangible assets are amortized over a period of 50 years. C) An intangible asset is recorded at market value when the asset is acquired. D) Intangible assets should be evaluated each year to determine if there has been any impairment in their value. E) Intangible assets are expensed to income in the year they are acquired. 	111)
Answer: D	
112) A patent:	112)
 A) Is an exclusive right granted to its owner to manufacture and sell a machine or device, or to use a process, for 50 years. B) Gives the owner the exclusive right to publish and sell a musical or literary work 	
during the life of the creator plus 50 years. C) Gives the owner the exclusive right to publish and sell a musical or literary work during the life of the creator plus 20 years.	
D) The amount by which the value of a company exceeds the fair market value of a company's net assets if purchased separately.E) Is an exclusive right granted to its owner to manufacture and sell a machine or device, or to use a process, for 20 years.	
Answer: E	
113) A copyright:	113)
 A) Gives the owner the exclusive right to publish and sell a musical or literary work during the life of the creator plus 50 years. B) Gives the owner the exclusive right to publish and sell a musical or literary work during the life of the creator plus 20 years. C) Is an exclusive right granted to its owner to manufacture and sell a machine or device, or to use a process, for 50 years. D) The amount by which the value of a company exceeds the fair market value of a company's net assets if purchased separately. E) Is an exclusive right granted to its owner to manufacture and sell a machine or device, or to use a process, for 20 years. Answer: A 	
114) Capital cost allowance:	114)
 A) Is not required for tax reporting. B) Is not used in Canada. C) Is acceptable for financial reporting. D) Is the income tax act equivalent of depreciation. E) All of these answers are correct. Answer: D	

115) Depreciation:	115)
A) Is a cause of obsolescence.	
B) Measures physical deterioration of an asset.	
C) Measures the decline in market value of an asset.	
D) Is the process of allocating to expense the cost of property, plant and equipment.	
E) All of these answers are correct.	
Answer: D	
116) SportsWorld paid \$140,000 for a property. The property included land appraised at	116)
\$67,500, land improvements appraised at \$25,000, and a building appraised at \$55,500.	
What should be the allocation of costs in the accounting records (round calculations to	
3 decimals)?	
A) Land \$62,000; land improvements, \$23,800; building, \$46,200.	
B) Land \$79,500; land improvements, \$32,600; building, \$47,700.	
C) Land \$63,840; land improvements, \$23,660; building, \$52,500.	
D) Land \$62,000; land improvements, \$23,000; building, \$45,000.	
E) Land \$87,500; land improvements; \$35,000; building; \$52,500.	
Answer: C	
117) Property, plant and equipment are:	117)
A) Long-term investments.	
B) Intangible assets used in the operations of a business having a useful life of more	
than one accounting period.	
C) Current assets.	
D) Tangible assets used in the operation of business having a useful life of less than	
one accounting period.	
E) Tangible assets used in the operation of a business having a useful life of more than	
one accounting period.	
Answer: E	
118) Treating low-cost asset purchases as expenses is allowed by which principle?	118)
A) Matching.	
B) Cost.	
C) Materiality.	
D) Timeliness.	
E) Prudence.	
Answer: C	
119) The useful life of a property, plant and equipment asset is:	119)
A) Is impossible to estimate.	,
B) Measured by its potential inadequacy.	
C) Another term for its residual value.	
D) The length of time it is productively used in a company's operations.	
E) All of these answers are correct.	
Answer: D	

120) Property, plant and equipment are:	120)
A) Used in business operations.	
B) Long-term investments.	
C) Natural resources.	
D) Current assets.	
E) Never depreciated.	
Answer: A	
121) The original cost of an asset minus accumulated depreciation is called:	121)
A) Book value.	
B) Replacement cost.	
C) Current value.	
D) Historical cost.	
E) Present value.	
Answer: A	
122) Obsolescence:	122)
A) Occurs when an asset is at the end of its useful life.	
B) Refers to a condition where a property, plant and equipment asset is no longer	
useful in producing goods and services.	
C) Is the same as inadequacy.	
D) Refers to a condition where the capacity of a property, plant and equipment asset is too small to meet the company's productive demands.	
E) None of these answers is correct.	
Answer: B	
123) A leasehold:	123)
A) Is initially recorded as rent expense.	
B) Is not an intangible asset.	
C) Is an investment.	
D) Is a short-term rental agreement.	
E) Refers to the rights granted to the lessee by the lessor in a lease.	
Answer: E	
124) A method that allocates an equal portion of the total depreciation for a property, plant	124)
and equipment asset to each accounting period during its useful life is called:	
A) Double-declining-balance depreciation.	
B) Capital cost allowance.	
C) Straight-line depreciation.	
D) Units-of-production depreciation.	
E) Accelerated depreciation.	

Answer: C

125) A method that allocates an equal portion of the total depreciation for a property, plant	125)
and equipment asset to each unit produced is called:	
A) Double-declining-balance depreciation.	
B) Straight-line depreciation.	
C) Accelerated depreciation.	
D) Capital cost allowance.	
E) Units-of-production depreciation.	
Answer: E	
126) A depreciation method in which a property, plant and equipment asset's depreciation	126)
expense for the period is determined by applying a constant depreciation rate each year	
to the asset's beginning book value is called:	
A) Double-declining-balance depreciation.	
B) Capital cost allowance.	
C) Straight-line depreciation.	
D) Book value depreciation.	
E) Units-of-production depreciation.	
Answer: A	
127) A depreciation method that produces larger depreciation charges during the early years	127)
of an asset's life and smaller charges in the later years is:	
A) Accelerated depreciation.	
B) Book value depreciation.	
C) Capital cost allowance.	
D) Units-of-production depreciation.	
E) Straight-line depreciation.	
Answer: A	
128) CamCo Ltd. leased floor space in a new office building. Rent will cost \$10,000 per	128)
month for a ten-year lease, but some renovations are needed and will be paid by CamCo	
to customize the space. The renovations include installing walls to create a new office	
and boardroom (cost \$8,000), new flooring (cost \$5,800), painting (cost \$1,500) and	
updated wiring to accommodate computer servers (cost \$8,700). How should these	
costs be handled for accounting purposes by CamCo?	
A) They should all be charged to rent expense.	
B) They should be capitalized as development costs.	
C) They should all be capitalized as leasehold improvements.	
D) Painting costs should be capitalized to leasehold improvements and other costs	
should be charged to rent expense.	
E) Painting costs should be charged to rent expense and the other costs should be	
capitalized to leasehold improvements.	
Answer: C	

129) Intangible assets do not include:	129)	
A) Leaseholds.		
B) Copyrights.		
C) Patents.		
D) Trademarks.		
E) Goodwill.		
Answer: E		
130) The relevant factor(s) in calculating depreciation is(are):	130)	
A) Residual value.		
B) Cost.		
C) Useful life.		
D) Both cost and useful life.		
E) All of these answers are correct.		
Answer: E		
SHORT ANSWER. Write the word or phrase that best completes each statement or answers the q	μuestion.	
131) Discuss the four issues in accounting for property, plant and equipment.	131)	
Answer: Property, plant and equipment are tangible assets used in the operations of		
a company and have a useful life of more than one accounting period. The		
four main accounting issues include		
(1) calculating their costs		
(2) allocating their costs to the periods they benefit		
(3) accounting for subsequent expenditures such as repairs and		
improvements, and		
(4) recording their disposal.		
132) Explain the difference between revenue and capital expenditures and how they	132)	
are recorded in the accounting system.		
Answer: Revenue expenditures such as repairs expire in the current accounting		
period. They are debited to expense and are thus matched with current revenues.		
Capital expenditures such as subsequent capital expenditures benefit future		
periods. They are debited to asset accounts and are matched with future		
periods through depreciation expense.		
Immaterial long-term expenditures are treated as current period expenses		
(materiality principle).		

133) Mandy Manufacturing purchased a machine on August 1, 2014, and it was installed and ready to run on January 1, 2015. The following costs were incurred in the purchase and installation of the machine.

133)

Invoice price	\$ 1,300,000
Freight costs	7,000
Purchase discount	2,500
Installation costs	66,000
Electrical and power connections	32,000
Repairs to correct damage incurred during uncrating	12,000
Adjustment costs	36,000
Spare parts for future use	25,000
Provincial sales tax	91,000
Fines incurred during the transport and unloading of the machine	500
Cost of special foundation for the machine	6,500

Calculate the depreciable cost of the machine.

Answer:

Invoice price	1,300,000
Freight costs	7,000
Purchase discount	(2,500)
Installation costs	66,000
Electrical and power connections	32,000
Adjustment costs	36,000
Provincial sales tax	91,000
Cost of special foundation for the machine	6,500
Total	\$ 1,536,000

NOTE ALL OTHER COSTS WOULD BE EXPENSED.

134)	Primadonna Company paid \$870,000 plus \$10,000 in legal costs for a parcel of
	real estate. This included land appraised at \$350,000; land improvements
	appraised at \$80,000; and a building appraised at \$370,000. The plan is to use the
	building as a manufacturing plant. Determine the amounts that should be debited
	to:

134)		

(a) Land	\$
(b) Land Improvements	\$
(c) Building	\$

Take all percentages to two decimals, e.g. 12.35% Answer:

		Appraised Cost I	Percent Tot	al	Apportioned Cost
(a)	Land	350,000	43.75%	(350,000/800,000)	385,000
(b)	Land Improvements	80,000	10.00%	(80,000/800,000)	88,000
(c)	Building	370,000	46.25%	(370,000/800,000)	407,000
	Total	800,000	100%		880,000

- 135) Prepare journal entries to record the following transactions of Salem Sales Co. during the current year:
- 135)
- Mar 1 Purchased a truck for \$50,000 with a 5 year useful life and a \$10,000 residual value. Salem also paid 7% provincial sales tax, a \$500 annual truck license, \$3,000 to paint the truck and \$1,300 for spare parts. All payments were in cash.
- May 12 Purchased a garage from a neighbouring business with a \$50,000 note payable. The seller's book value for the garage was \$47,000 and the garage was appraised at \$58,000. The estimated useful life is 12 years. Salem also paid \$3,000 cash for real estate commission.
- Jun 5 Paid \$550 to replace garage windows broken during a hail storm.
- Aug 23 Purchase used office equipment for \$12,500 plus provincial sales tax of \$875, terms 2/10, n30 from Great West Office Supplies. As well, Salem paid freight of \$200 and reconditioning costs of \$950 on credit. Estimated useful life of 4 years and a residual value of \$1,000.
- Sep 12 Paid for office equipment purchased on August 23.
- Oct 5 Purchased store equipment for \$26,700 plus \$1,869 provincial sales tax. As well, Salem paid \$750 for repairs incurred from an accident during installation, \$4,200 for a special base for the equipment and \$3,700 of supplies to be used for regular preventive maintenance. Estimated useful life is 9 years and residual value is \$1,300.

Answer:			135)
Mar 1	Trucks Spare Parts Inventory Licence Expense Cash \$50,000 + (50,000 x 7%) + 3,000 = \$56,500	56,500 1,300 500	
May1	2 Garage Notes Payable Cash	53,000	
Jun 5	Repairs and Maintenance Expens Cash	550	
Aug 2	Office Equipment Accounts Payable \$12,500+875+200+950= \$14,525	14,525	
Sep 1	2 Accounts Payable Cash	14,525	
Oct 0	Store Equipment Repairs and Maintenance Expense Supplies Cash \$26,700+1,869+4,200=\$32,769	32,769 750 3,700	

¹³⁶⁾ Shady Lanes installed automatic sprinkler systems. The electrical work for the installation was \$24,000. The invoice price of the sprinkler equipment was \$280,000. Additional costs were \$5,000 for delivery and \$800 for insurance during transportation. During installation a sprinkler line was punctured and was replaced for \$200. What is the cost of the sprinkler equipment?

136)

Answer: \$24,000 + 280,000 + 5,000 + 800 = \$309,800

137) Twin Investments purchased land with a building for a total cost of \$5,500,000 (\$500,000 paid in cash and the balance on a long-term note). The appraised cost of the land and building were \$3,000,000 and \$2,100,000, respectively. Calculate the costs to be allocated to the land and the building and prepare the appropriate journal entry to record the acquisition. (Round all calculations to two decimals)

137) _____

Answer:

	Appraised Cost	Percent Total	Apportioned Cost
Land	3,000,000	58.82% (3,000,000/5,100,00	00) 3,235,100
Building	2,100,000	41.18% (2,100,000/5,100,00	2,264,900
Total	5,100,000	100.00%	5,500,000
Land	3,235,100		
Building	2,264,900		
Cash		500,000	
Notes Payable		5,000,000	

138) Pink Lady Co needed a new building, and found a suitable piece of land which had an old building on it. Pink Lady made an agreement to buy the land and the building for \$960,000 cash. The old building was demolished to make way for the new building.

138)

6,8:

The following is information regarding the demolishing of the old building and construction of the new one:

Cost of construction of new building, which included \$700,000 for a	\$ 5,560,000
parking lot	
Demolition of old building	350,000
Proceeds from salvage materials	20,000

Prepare a single journal entry to record the above costs (assume all paid cash).

Answer:

 Land **
 1,290,000

 Building *
 4,860,000

 Land Improvements
 700,000

 Cash

* 5,560,000- 700,000

** 960,000+350,000-20,000

139) Alpha Co paid \$180,000 to purchase a piece of land on which to build a new building. Additional costs incurred were:

139) _____

Real estate broker's commissions	\$10,800
Legal fees of purchasing the real estate	1,400
Landscaping expenses	6,000
Expense to demolish old house located on land	1,500
Proceeds from selling materials salvaged from old	900
house	

What dollar amount of the above costs should be allocated to Land and what amount should be allocated to the new Building?

Answer: \$180,000 + \$10,800 + \$1,400 + \$6,000 + \$1,500 - \$900 = \$198,800 to Land; \$-0- to the new Building account.

140) SASA Company made the following expenditures in connection with the construction of its new soccer facility:

140) _____

Architect's fees	8,000
Cash paid for land and old building	130,000
Removal of old building	19,000
Survey to site the new building	(6,000)
Legal fees for title search	900
Excavation for construction of basement	1,500
Machinery purchased	71,000
Storage charges on machinery because building was not ready when	500
machinery was delivered	
Freight on machinery purchased	1,500
Hauling charges to deliver machinery from storage to new building	500
Construction costs of new building	612,000
Landscaping	6,500
Installation of machinery	8,500

Prepare a schedule showing the amounts to be recorded as Land, Building, and Machinery and Equipment and Expenses.

Answer:

140)

			Machinery and	
	Land	Building	Equipment	Expense
Architect's fees		8,000	3770-377	***
Cash paid for land and old building	130,000			
Removal of old building	19,000			
Survey to site the new building	(6,000)			
Legal fees for title search	900			
Excavation for construction of basement		1,500		
Machinery purchased			71,000	
Storage charges on machinery because building was not ready				
when machinery was delivered				500
Freight on machinery purchased			1,500	
Hauling charges to deliver machinery from storage to new				
building				500
Construction costs of new building		612,000		
Landscaping	6,500			
Installation of machinery	25		8,500	
	150,400	621,500	81,000	1,000

141) How is the cost principle app	ied to property, plan	and equipment?
------------------------------------	-----------------------	----------------

141)

Answer: Property, plant and equipment should be recorded at cost when acquired. Cost includes all normal and reasonable expenditures necessary to get the asset in place and ready for its intended use. The cost of a lump-sum purchase is allocated among its individual assets based on their relative market values.

142) RoboCop Company paid \$31,400 for a machine that was expected to last 5 years 142) ____ and have a residual value of \$5,000.

142) _____

During the third year of the machine's life, \$3,700 was paid for replacement parts that were expected to increase the machine's productivity by 20% each year. Prepare the general journal entry to record this transaction.

Answer:

Machinery 3,700 Cash

143) RoboCop Company paid \$31,400 for a machine that was expected to last 5 years 143) _____ and have a residual value of \$5,000.

3,700

During the fourth year of the machine's life, \$5,400 was paid for repairs that were expected to increase the service life of the machine from 5 to 7 years. Prepare the general journal entry to record this transaction.

Answer:

Machinery 5,400 Cash 5,400

145)

8-Jan-14 Purchased a machine for \$55,000 cash, and also paid \$3,000 cash to have it installed.

Estimated useful life is 10 years and residual value is \$5,000. Straight line depreciation is used.

- 1-Jan-15 The machine's useful life was changed from 10 years to 9.
- 5-Jan-15 General maintenance on the machine was completed for \$800.
- 1-Jan-16 Paid \$3,800 to replace a motor in the machine. This was considered a major overhaul, but it did not alter the machine's useful life

Xeno Co uses the calendar year as its fiscal year.

Prepare the journal entry to record depreciation expense for 2014. Prepare the journal entry to record depreciation expense for 2015. Prepare the journal entry to record depreciation expense for 2016. Round all values to the nearest dollar.

Answer:

31-Dec-14 Depreciation Expense, Machine	5,300	
Accumulated Depreciation, Machine		5,300
(\$58,000-5,000)/10 years		
31-Dec-15 Depreciation Expense, Machine	5,963	
Accumulated Depreciation, Machine		5,963
(58,000-5,300-5,000)/8 years		
31-Dec-16 Depreciation Expense, Machine	6,505	
Accumulated Depreciation, Machine		6,505
[(58,000-5,300-5,963+3,800)-5,000]/7 yea	ars	

- 145) On January 1, 2014, Friar Company purchased a machine for \$175,000 that was expected to last 6 years and have a residual value of \$16,000. On January 4, 2017, Friar Company paid \$25,000 for improvements to the machine, which increased the total estimated useful life from 6 to 10 years and increased the residual value to \$19,500. Friar uses straight-line depreciation.
 - (1) What account should be debited in the journal entry to record the \$25,000 improvements?
 - (2) What amount of depreciation expense should be recorded for 2017? Answer:
 - (1) Machinery

(2)
$$(\$175,000 - (3x (175,000 - 16,000)/6) + \$25,000 = 120, (\$120,500 - 19,500)/7 = 14,$$

146)	Explain depreciation and the elements affecting its calculation.	146)
	Answer: Depreciation is the process of allocating to expense the cost of property, plant and equipment over the accounting periods benefiting from the use of the assets. Three factors determine depreciation: cost, residual value, and useful life.	
	Compare the three different depreciation methods: straight-line, units of production, and double-declining balance.	147)
	Answer: The amount of depreciation expense per period is usually different for different methods. Yet total depreciation expense is the same for all methods. The straight-line method results in the same amount of depreciation for each accounting period. The units-of-production method results in depreciation expense that increases or decreases with the amount of asset usage. The double-declining-balance method is an accelerated method and yields more depreciation expense in the first years of ownership and less in later years than straight-line depreciation.	
•	Explain how each of the following depreciation methods is calculated: straight-line, units-of-production, and double-declining-balance.	148)
	Answer: Straight-line depreciation is calculated by subtracting residual value from the cost of a property, plant and equipment item and dividing the result by the useful life in years. The resulting amount is the annual depreciation expense for the asset.	
	Units-of-production depreciation is calculated by subtracting residual value from the cost of a property, plant and equipment item and dividing the result by the estimated number of units to be produced. The resulting amount is the depreciation expense per unit. That amount is multiplied by the number of units used during each accounting period in order to determine the total amount of depreciation expense for the period. The double-declining-balance method uses twice the straight-line percent times the beginning book value of the asset. The resulting amount is the annual depreciation expense.	
-	Chervinski Industries recently paid \$460,000 to buy a building that has an estimated useful life of 40 years and a residual value of \$116,000. Calculate the depreciation expense for the third year after acquisition using	149)
	double-declining-balance depreciation. Assume a full year of depreciation in the	

Answer:

first year.

Annual rate is $2/40 \times 100 = 5\%$

Year	Annual Depreciation Calculation	Annual Depreciation Expense	Remaining Book Value
1	460,000 x 0.05	23,000.00	437,000.00
2	437,000 x 0.05	21,850.00	415,150.00
3	415,150 x 0.05	20,757.50	394,392.50

150) Dersch Co. purchased a machine on January 1, 2014, for \$1,500,000. Using the table below, calculate the annual depreciation expense for each year of the machine's life (estimated at 5 years or 50,000 hours with a residual value of \$150,000). During the machine's life it was used 15,000; 14,000; 10,000; 9,000; and 6,000 hours.

Year	Straight Line	Units of Production	Declining Balance
2014			
2015			
2016			
2017			
2018			

Answer:

(a) (b)

150)

Double-Dec			
I	Units of Production	Straight Line	Year
\$6	\$405,000	\$270,000	2014
3	378,000	270,000	2015
2	270,000	270,000	2016
1	243,000	270,000	2017
	54,000	270,000	2018
\$1,3	\$1,350,000	\$1,350,000	Totals

- (a) (\$1,500,000-150,000)/5 years= 270,000
- (b) Rate=(\$1,500,000-150,000)/50,000 hours= \$27/hour

	Annual Depreciation	Annual Depreciation	Remainin
Year	Calculation	Expense	
2014	15,000 hrs x \$27/hr	405,000	1,0
2015	14,000 hrs x \$27/hr	378,000	7
2016	10,000 hrs x \$27/hr	270,000	4
2017	9,000 hrs x \$27/hr	243,000	2

2017	$324,000 \times 0.40$	129,600	1
2018	194,400 x 0.40	Max 44,400	1

151) Twilight Manufacturing's property, plant and equipment records reveal the following information:

151) _____

						Units
Equip		Residual	Purchase	Depreciation	Estimated	Produced in
ment	Cost	Value	Date	Method	Useful Life	2014
			Dec 1,			
(1)	50,000	12,000	2013	Straight Line	5 years	2,000
			Oct 18,	Units of		
(2)	60,000	8,000	2014	Production	50,000 units	5,000
				Double		
			June 12,	Declining		
(3)	120,000	none	2014	Balance	10 years	6,000
			May 3,			
(4)	90,000	10,000	2014	Straight Line	8 years	8,000

Calculate the depreciation expense for each equipment item for the year ended December 31, 2014, using the nearest whole month method.

Answer:

Equipment	
(1)	(50,000-12,000)/5 years =
(2)	(60,000-8,000)/50,000 x 5,000 units=
(3)	$2/10 \times 120,000 \times 7/12 =$
(4)	(90,000-10,000)/8 years x $8/12 =$

- 152) On January 2, 2014, Far Co. purchased a machine for \$525,000. The company expects the machine to last for 10 years or 50,000 hours of operation, with an estimated residual value of \$15,000. During 2014 the machine was operated for 3,000 hours, while in 2015 it was operated for 2,600 hours. Calculate the depreciation expense for the machine for 2014 and 2015 using the following depreciation methods:
- 152)

- (a) Straight-line.
- (b) Double-declining-balance.
- (c) Units-of-production.

Answer: (a) (\$525,000 - 15,000)/10 years = \$51,000

(b) Double Declining Rate is 2/10 = 20%

		Annual	Remaining
	Annual Depreciation	Depreciation	Book
Year	Calculation	Expense	Value
2014	525,000 x 0.20	105,000	420,000
2015	$420,000 \times 0.20$	84,000	336,000

(c) (\$525,000 - 15,000)/50,000 hours = \$10.20/hour

		Annual	Remaining
	Annual Depreciation	Depreciation	Book
Year	Calculation	Expense	Value
2014	3,000 hrs x \$10.20/hr	30,600	494,400
2015	2,600 hrs x \$10.20/hr	26,520	467,880

- 153) On January 1, 2014, a machine costing \$230,000 with a 4-year service life and an estimated \$3,000 residual value was purchased. It was also estimated that the machine would produce 50,000 units during its life. The actual units produced during its first 2 years of operation were 9,000 and 10,000 respectively. Calculate the amount of depreciation expense for calendar years 2014 and 2015 under each of the following assumptions:
- 153) _____

- (a) The company uses the straight-line method of depreciation.
- (b) The company uses the units-of-production method of depreciation.
- (c) The company uses the double-declining-balance method of depreciation.

Answer:

(a) (\$230,000-3,000)/4 years = \$56,750

(b) Double Declining Rate is 2/4 = 50%

		Annual	Remaining
	Annual Depreciation	Depreciation	Book
Year	Calculation	Expense	Value
2014	230,000 x 0.50	115,000	115,000
2015	$115,000 \times 0.50$	57,500	57,500

(c) (\$230,000-3,000)/50,000 units= \$4.54/unit

		Annual	Remaining
	Annual Depreciation	Depreciation	Book
Year	Calculation	Expense	Value
2014	9,000 hrs x \$4.54/unit	40,860	189,140
2015	10,000 hrs x \$4.54/unit	45,400	143,740

- 154) On October 1, 2014, Fisherman Company purchased a light truck, at a cost of \$62,000. The truck is expected to last six years and have a residual value of \$5,200. Fisherman Company uses the calendar year as their fiscal year, and the nearest whole month method for depreciation.
- 154)
- (a) What is the depreciation expense for 2014, assuming the straight-line method is used?
- (b) What is the depreciation expense for 2014 and 2015, assuming the double-declining-balance method is used (round double declining rate to 4 decimals)?

Answer:

(a) (\$62,000-5,200)/6 years x 3/12 = \$2,366.67

(b) Double Declining Rate is 2/6 = 33.33%

	Annual Depreciation	Annual Depreciation	Remaining Bo
Year	Calculation	Expense	Value
2014	62,000 x 0.3333 x 3/12	5,166	56,834
2015	56,834 x 0.3333	18,943	37,891

155)	A new machine is expected to produce 60,000 units of product during its 5-year	155)
	life. The machine cost \$180,000 and is estimated to have a \$20,000 residual value.	
	If the machine produces 7,200 units of product during its first year, what is the depreciation for the year calculated by the units-of-production method (round rate to 2 decimals)?	
	Answer: Rate is $(\$180,000-20,000)/60,000$ units= $\$2.67/\text{unit }\$2.67/\text{unit }x$ 7,200 units = $\$19,224$ depreciation for the first year	
156)	A new machine is expected to produce 40,000 units of product during its 5-year	156)
	life. The machine cost \$180,000 and is estimated to have a \$20,000 residual value.	
	If depreciation on the machine is calculated by the double-declining-balance method, what is the depreciation for the first year?	
	Answer: $2/5 \times 100 = 40\% \$180,000 \times 40\% = \$72,000$ depreciation for the first year	
157)	A new machine is expected to produce 40,000 units of product during its 5-year life. The machine cost \$38,000 and is estimated to have a \$6,000 residual value.	157)
	What is the first year's depreciation on the machine calculated by the straight-line method?	
	Answer: (\$38,000-6,000)/5 years= \$6,400	
158)	On January 1, 2014, High Flying Airways acquired and placed in service a plane	158)
	that cost \$8,000,000. The plane's service life and residual value were estimated at 5 years and \$1,500,000, respectively. Calculate depreciation for 2014-2018,	
	assuming the following alternative depreciation methods are used:	
	(a) Straight-line.	
	(b) Double-declining-balance.	
	Answer: (a) $(\$8,000,000-1,500,000)/5$ years = $1,300,000$ per year	
	(b) Double Declining Rate is $2/5 = 40\%$	
	Annual Depreciation Annual Depreciation Remaining B	(

	Annual Depreciation	Annual Depreciation	Remaining Bo
Year	Calculation	Expense	Value
2014	8,000,000 x 0.40	3,200,000	4,800,000
2015	4,800,000 x 0.40	1,920,000	2,880,000
2016	2,880,000 x 0.40	1,152,000	1,728,000
2017	1,728,000 x 0.40	Max 228,000	1,500,000
2018	0	Max 0	1,500,000

159)	59) On July 1, 2014, Delta Company purchased and placed in service a machine that cost \$360,000. Delta estimated the service life to be 5 years or 25,000 units of output, with an estimated residual value of \$6,000. During 2014, 2,600 units were produced.			159)
	Prepare the necessary December 31, 2014, adjusting depreciation assuming Delta uses:	journal entr	y to record	
	(a) The straight-line method of depreciation.(b) The units-of-production method of depreciation.			
	Answer:			
	(a) (\$360,000-6,000)/5 years x 6/12= 35,400			
	31-Dec-14 Depreciation Expense, Machine Accumulated Depreciation, Machine	35,400	35,400	
	(b) (\$360,000-6,000)/25,000 units= \$14.16/unit 2,600 units x \$14.16/unit= 36,816			
	31-Dec-14 Depreciation Expense, Machine	36,816		
	Accumulated Depreciation, Machine		36,816	
160)	On July 1, 2014, Delta Company purchased and plac	ed in servic	e a machine with	160)
	a cost of \$340,000. Delta estimated the service life to of output, with an estimated residual value of \$80,00 were produced.	•	·	
	Prepare the necessary December 31, 2014, adjusting journal entry to record depreciation for 2014 assuming Delta uses the double-declining-balance method to the nearest whole month.			
	Answer:			

31-Dec-14 Depreciation Expense, Machine 56,667 Accumulated Depreciation, Machine 56,667 $(\$340,000 \times 2/6) \times 6/12 = 56,666.67$

161) On September 30, 2014, Sabena Industries acquired and placed in service a machine that cost \$850,000. It was estimated that the machine has a service life of five years and a residual value of \$69,400.

161)

Using the double-declining-balance method of depreciation, prepare a schedule showing the depreciation amounts for the years 2014 through 2019 (use the nearest whole month method and round answers to the nearest dollar). Sabena closes its books on December 31 of every year.

Answer: Rate = $2/5 \times 100 = 40\%$

	Annual Depreciation	Annual Depreciatio	nRemaining Book
Year	Calculation	Expense	Value
2014	850,000 x 0.40 x 3/12	85,000	765,000
2015	765,000 x 0.40	306,000	459,000
2016	459,000 x 0.40	183,600	275,400
2017	275,400 x 0.40	110,160	165,240
2018	165,240 x 0.40	66,096	99,144
2019	99,144 x 0.40 x 9/12	29,744	69,400

- 162) Jelly Bean had the following property, plant and equipment purchases during 2014:
- 162)

163)

- (1) On April 4, equipment costing \$150,000 with a 5-year service life and an estimated \$40,000 residual value was purchased.
- (2) On October 4, a machine costing \$230,000 with a 5 year service life and an estimated \$50,000 residual value was purchased.

Assuming Jelly Bean has a December 31 year end, prepare the necessary adjusting journal entries at December 31, 2014 to record depreciation under the following depreciation methods (using the nearest whole month method):

- (a) Straight-line.
- (b) Double-declining-balance.

Answer:

163) On January 1, 2014, Boone Company purchased a machine for \$75,000 that had a 6-year life and a residual value of \$6,000. After 3 years of use, on January 1, 2017, Boone Company paid \$7,500 to improve the efficiency of the machine. The effect of the expenditure was to increase the productivity of the machine without increasing its remaining useful life or changing its residual value. Boone uses straight-line depreciation.

- (1) What account should be debited in recording the \$7,500 expenditure?
- (2) What amount of depreciation expense should be reported for 2017?

(2)
$$(\$75,000 - [(75,000-6,000)/6 \times 3] + \$7,500) = \$48,000 \text{ (NBV at Jan } 1/17)$$
 $(\$48,000-6,000)/3 = \$14,000$

164) Explain (1) depreciation for partial years and (2) revision of depreciation when estimates change.

164) _____

Answer: (1) Partial years' depreciation is often required because assets are bought and sold throughout the year. Depreciation for assets owned for less than one year can be based on the number of months owned during the year (nearest whole month method) or the half-year convention may be used. (2). Depreciation is revised when changes in estimates such as residual value and useful life occur. For example, if the useful life of a property, plant and equipment item changes, the remaining cost to be depreciated is spread over the remaining revised useful life of the asset.

165) _____

165) A machine was purchased for \$37,000 and depreciated for 5 years on a straight-line basis under the assumption it would have a 10-year life and a \$1,000 residual value. At the beginning of the machine's sixth year, it was recognized that it had 3 years of remaining life left, instead of five, and that at the end of the 3 years its residual value would be \$1,600. What should the annual depreciation be for the machine's remaining years?

Answer:

$$(\$37,000 - \$1,000)/10 = \$3,600$$

 $\$3,600 \times 5 = \$18,000$
 $\$37,000 - \$18,000 = \$19,000$
 $(\$19,000 - \$1,600)/3 = \$5,800$

166)

166) On January 1, 2015, Bailey Company purchased a machine for \$106,000 that was expected to last five years and has a residual value of \$6,000. At the beginning of 2018, Bailey decided that the machine's estimated useful life should be revised to a total of 6 years instead of 5. Also, the residual value was now estimated to be \$5,500. Straight-line depreciation was used. Calculate the depreciation expense for 2018.

Answer: (\$106,000 - \$6,000)/5 = \$20,000 (annual depreciation) $\$106,000 - (3 \times \$20,000) = \$46,000$ (NBV at Jan 1/18) (\$46,000 - \$5,500)/3 = \$13,500

- 167) Wildcat Company purchased a heating system on January 2, 2003, for \$625,000. 167)

 The system had an estimated useful life of 15 years, with no residual value. On
 January 2, 2015, the company paid \$33,000 cash for a complete renovation of
 the system, and now expects the system to last 5 years beyond the original
 estimate. The company uses the straight-line method of depreciation.
 - (a) Prepare the journal entry at January 2, 2015, to record the renovation of the heating system.
 - (b) Prepare the journal entry at December 31, 2015, to record the depreciation for 2015.

Answer:

(a)

2-Jan-15 Heating System 33,000

Cash 33,000

(b)

Depreciation Expense, Heating

31-Dec-15 System 19,750

Accumulated Depreciation, Heating System 19,750

Annual Depreciation 2003-2014 = 625,000/15 years x 12 years = 500,000 At January 2, 2015, book value is 625,000 + 33,000 - 500,000 = 158,000 New annual depreciation 158,000/8 years = 19,750 (15 years - 12 years + 5 years) = 8 years remaining

FNT renovated the building from January 1 to March 31, 2018, at a cost of \$125,000. It also paid the local government an assessment of \$55,000 to have a sidewalk and improved sewer system put into place. The new building opened or April 1, 2018, with a customer reception that cost JMT \$7,000.

FNT estimates the building will be used for 25 years and will use the straight line method to depreciate the asset

Required:

Prepare all journal entries relating to the land, building, and related activities, for JMT's January 1 to December 31, 2018, fiscal year. Round the final answer to the nearest dollar.

Answer: Jan 1, 2018 - purchase:

Land	135,714	
Building	814,286	
Cash		950,000

Costs subsequent to purchase:

Land	55,000	
Building	125,000	
Promotion Expense	7,000	
Cash		187,000

December 31, 2018 - depreciation:

]	Depreciation Expense	28,719	
	Accumulated depreciation		28,179

On January 1, 2018, 2018, PetraCo ordered a new machine to help increase production for one of its most popular products. The machine had an invoice price of \$30,000 and PetraCo was required to pay shipping (\$1,200) and insurance during shipping (\$300) by boat from British Columbia to Toronto. The machine arrived on January 5, 2019 and was installed at a cost of \$800 and calibrated and tested for a cost of \$200. On February 1, 2019 it was put into operation. PetraCo's fiscal year runs from January to December. Round all final answers to the nearest dollar.

169) Prepare a journa	al entry (or en	tries) to record	all costs a	associated with	the new
machine					

169) _____

Answer:

Machine	32,500	
Cash		32,500

170) The machine was expected to last 10 years with a salvage value of \$2,500. Prepare the journal entry to record depreciation for 2019 using the double-declining balance method of depreciation.

170) _____

Answer:

Depreciation expense	5,958	
Accumulated depreciation		5,958

171) PetraCo sold the machine on July 1, 2020 for \$19,000. Prepare all journal entries 171) ______ required by HRO in 2020 relating to the machine and its disposal.

Answer: Depreciation to July 1, 2020 date of sale

Depreciation expense	2,654

Cash (12,800-1,500)

189) Upside Down Company purchased new office equipment for \$4,300, by trading in old equipment with a cost of \$2,000 and accumulated depreciation to the date of trade of \$1,900. Upside Down received a \$50 trade-in allowance for the old equipment. This transaction has commercial substance. Prepare the journal entry to record the transaction.

Answer:

Office Equipment (new)	4,300	
Accumulated Depreciation, Office Equipment	1,900	
Loss on Asset Exchange	50	
Office Equipment (old)		2,000
Cash		4,250

190) On April 1, Fog Company traded an old machine that originally cost \$32,000 and 190) had been depreciated \$24,000 for a new machine that had a cash price of \$40,000.

Assuming that this transaction has commercial substance,

- (1) Prepare the journal entry to record the exchange under the assumption that a \$5,000 trade-in allowance was received and the balance was paid in cash.
- (2) Prepare the journal entry to record the exchange under the assumption that instead of a \$5,000 trade-in allowance, a \$12,500 trade-in allowance was received and the balance was paid in cash.

Answer:

(1)		
Apr-01 Machinery	40,000	
Accumulated Depreciation, Machinery	24,000	
Loss on Asset Exchange	3,000	
Machinery		32,000
Cash (\$40,000-\$5,000)		35,000
(2)		
Apr-01 Machinery	40,000	
Accumulated Depreciation, Machinery	24,000	
Gain on Asset Exchange		4,500
Machinery		32,000
Cash (\$40,000-\$12,500)		27,500

191)	Natsuko Company traded an old forklift for a new forklift, receiving a \$10,500
	trade-in allowance and paying the remaining \$37,200 in cash. The old forklift
	cost \$39,000, and straight-line depreciation of \$27,200 had been recorded to the
	date of trade under the assumption it would last 5 years and have a \$5,000
	residual value. At the date of trade, the fair value of the old forklift is \$11,000,
	however the fair value of the new forklift is not known

191) _____

- (1) What was the book value of the old forklift?
- (2) At what amount should the new forklift be recorded?

```
Answer: (1) $39,000 - $27,200 = $11,800
(2) $11,000 + 37,200 = 48,200
(fair value of old asset plus cash paid)
```

192) Hertzog Company purchased and installed a machine on February 1, 2014, at a total cost of \$72,000. Straight-line depreciation was calculated based on the assumption of a five-year life and no residual value. The machine was disposed of on July 31, 2017.

192) _____

Assuming the machine was sold for \$22,000, prepare the general journal entry to record the disposal.

Answer:

Jul-31 Cash	22,000
Accumulated Depreciation, Machinery	50,400
Gain on Disposal of Equipment	400
Machinery	72,000
$72,000/5 \times 3.5 \text{ years} = 50,400$	

193) Hertzog Company purchased and installed a machine on February 1, 2014, at a total cost of \$72,000. Straight-line depreciation was calculated based on the assumption of a five-year life and no residual value. The machine was disposed of on July 31, 2017.

193) _____

Assuming the machine was sold for \$15,000, prepare the general journal entry to record the disposal.

Answer:

 Jul-31 Cash

196) Discuss	accounting to	r an imnairm	nent of property	v niant and	Leauinment
170) Discuss	accounting 10.	an impairi	ioni of propert	y, prame amo	equipment

196) _____

Answer: If the book value or carrying amount of a PPE item is greater than the amount to be recovered through the asset's use or sale, the difference is an impairment loss and the asset is described as impaired. To account for the impairment of an asset a company must record a debit to impairment loss and a credit to the impaired asset. When a loss is recorded, revised depreciation must be calculated and recorded in future periods because of the decrease in the carrying amount of the asset caused by the impairment loss.

197) Matador & Company was preparing the annual financial statements and, as part of its year-end procedures, prepared the following schedule based on adjusted values at March 31, 2015:

197) _____

		Acc	cumulated	Re	coverable
Asset	Cost	De	preciation	I	Amount
Furniture	\$ 25,000	\$	20,000	\$	15,000
Computer	\$ 2,000	\$	1,000	\$	-
Land	\$ 105,000	\$	-	\$	125,000
Machine	\$ 90,000	\$	25,000	\$	45,000

Record the entry for any impairment loss assuming that Matador & Company recorded no impairment losses in previous years.

Answer:

			Acc	cumulated			Re	coverable	Im	pairment
Asset		Cost	De	preciation	\mathbf{B}	ook Value		Amount		Loss
Furniture	\$	25,000	\$	20,000	\$	5,000	\$	15,000	\$	-

199) Discuss accounting for intangible assets.

Answer: Intangible assets are recorded at acquisition cost and are debited to asset accounts. Allocation of the cost of an intangible asset to expense is done by using the straight-line method and is called amortization. Theoretically, a contra account should be used for the accumulated amortization (as with tangible property, plant and equipment and accumulated depreciation), but a credit directly to the asset account is also done in practice.

200) On January 4, 2015, SportsWorld purchased a patent for \$35,000 with a useful	200)
life of 10 years. Prepare the journal entry to amortize the patent for the calendar year 2015.	
Answer:	
Amortization Expense, Patent (35,000/10) 3,500 Accumulated Amortization, Patent 3,500	
201) Hawaii Kai purchased a leasehold property for \$8,500,000. The leasehold	201)
expires in 15 years. Prepare the journal entry to record the first year's depreciation expense.	,
Answer:	
Rent Expense 566,667 Leasehold 566,667	
202) GenX Music purchased a music distributor's collection of songs for \$1,423,000.	202)
The copyrights are expected to last another 34 years. Prepare the journal entry to record the amortization expense for the first year.	
Answer:	
Amortization Expense, Copyrights 41,853 Accumulated Amortization, Copyrights 41,853	
1,423,000/34 = 41,853 rounded	
203) Explain what could cause the impairment of goodwill. How often should goodwill be tested to see if it is impaired?	203)
Answer: Goodwill could be impaired by an ongoing past or potential cash flow losses or negative changes in variables supporting original calculations of goodwill. Testing for impairment should be done at least annually.	
204) The following information is available for a piece of A Company's machinery:	204)

Machine:						
						Accum.
						Dep. at
						Dec. 31,
	Date of	Depreciation		Est.	Est.	2016,
Component	Purchase	Method	Cost	Residual	Life	Year-End
Electronic	April 1/16	Straight-line	\$ 5,000	\$ 0	5 years	\$750
Controller						
Motor	April 1/16	Units of	100,000	10,000	50,000	2,700
		Production			hours	
			\$105,000			\$3,450

On November 1, 2017, the electronic controller was replaced with a new one costing \$8,000 purchased for cash. The new controller had an estimated residual value of \$1,000 and an estimated useful life of 5 years. During 2017 the machinery was used for 3,200 hours from January 1 to October 31 and 650 hours from November 1 to December 31.

Required: Record depreciation on machinery and the controller replacement for 2017. Round depreciation amounts to the nearest dollar.

Answer: Step 1: Update depreciation on the machinery to October 31, 2017: Using original rates of depreciation:

October 31, 2017:

Depreciation expense, Machinery		
Accumulated Depreciation, Machinery		6593

Step 2: Record the capital expenditure and remove the old controller being replaced:

November 1, 2017:

Machinery (new controller)		8,000
Accumulated depreciation, machinery		1,583
(750 + 8333)		
Loss on Disposal of Machinery		3,417
	Machinery (old	
	controller)	
	Cash	

Step 3: record depreciation from November 1 - December 31, 2017

December 31, 2017:

Depreciation expense, Machinery		1,403	
	Accumulated Depreciation, Machinery		1,403
