

Fundamentals of Corporate Finance, 2nd Cdn. Ed. (Berk et al.)
Chapter 2 Introduction to Financial Statement Analysis

2.1 Firms' Disclosure of Financial Information

1) In Canada, publicly traded companies can choose whether or not they wish to release periodic financial statements.

Answer: FALSE

Diff: 1 Type: TF

Skill: Conceptual

Objective: 2.1 Know why the disclosure of financial information through financial statements is critical to investors

2) Financial statements are accounting reports issued periodically by a firm that present information on the past performance of the firm, a summary of the firm's assets and the financing of those assets, and a prediction of the firm's future performance.

Answer: FALSE

Diff: 1 Type: TF

Skill: Conceptual

Objective: 2.1 Know why the disclosure of financial information through financial statements is critical to investors

3) International Financial Reporting Standards are taking root throughout the world. However, it is unlikely that the Canada will report according to IFRS before the second half of the twenty-first century.

Answer: FALSE

Diff: 1 Type: TF

Skill: Conceptual

Objective: 2.1 Know why the disclosure of financial information through financial statements is critical to investors

4) What is the main reason that it is necessary for public companies to follow the rules and format set out in the Generally Accepted Accounting Principles (GAAP) when creating financial statements?

A) It is easier to find specific information in such a report if it is laid out in a clear and consistent manner.

B) It ensures that information on the performance of private companies is readily available to the public.

C) It ensures that important information is not omitted and superfluous information is not included.

D) It makes it easier to compare the financial results of different firms.

E) To make sure they satisfy the auditor.

Answer: D

Diff: 1 Type: MC

Skill: Conceptual

Objective: 2.1 Know why the disclosure of financial information through financial statements is critical to investors

5) Which of the following best describes why firms produce financial statements?

- A) to use as a tool when planning future investments within the firm
- B) to provide a means of enticing new investors to a firm
- C) to provide interested parties, both inside and outside the company, with an overview of the short- and long-term financial condition of a business
- D) to show what activities the company has undertaken in the previous financial year, and what activities are planned for the near future
- E) to determine managerial performance

Answer: C

Diff: 1 Type: MC

Skill: Conceptual

Objective: 2.1 Know why the disclosure of financial information through financial statements is critical to investors

6) The third party who checks annual financial statements to ensure that they are prepared according to Generally Accepted Accounting Principles (GAAP) and verifies that the information reported is reliable is the

- A) TSX Enforcement Board.
- B) Accounting Standards Board.
- C) provincial securities commission.
- D) auditor.
- E) GAAP commission.

Answer: D

Diff: 1 Type: MC

Skill: Definition

Objective: 2.1 Know why the disclosure of financial information through financial statements is critical to investors

7) What is the role of an auditor in financial statement analysis?

Answer: Key points:

- 1. to ensure that the annual financial statements are prepared accurately
- 2. to ensure that the annual financial statements are prepared according to Generally Accepted Accounting Principles (GAAP)
- 3. to verify that the information used in preparing the annual financial statements is reliable

Diff: 2 Type: ES

Skill: Conceptual

Objective: 2.1 Know why the disclosure of financial information through financial statements is critical to investors

8) What are the four financial statements that all public companies must produce?

Answer:

- 1. statement of financial position (or balance sheet)
- 2. statement of comprehensive income
- 3. statement of cash flows
- 4. statement of changes in equity

Diff: 2 Type: ES

Skill: Conceptual

Objective: 2.1 Know why the disclosure of financial information through financial statements is critical to investors

2.2 The Statement of Financial Position or Balance Sheet

1) The statement of financial position shows the assets, liabilities, and stockholders' equity of a firm over a given length of time.

Answer: FALSE

Diff: 2 Type: TF

Skill: Conceptual

Objective: 2.2 Understand the function of the statement of financial position

2) Shareholders' equity is the difference between a firm's assets and liabilities, as shown on the statement of financial position.

Answer: TRUE

Diff: 1 Type: TF

Skill: Conceptual

Objective: 2.2 Understand the function of the statement of financial position

3) Which of the following amounts would be included on the right side of a statement of financial position?

A) the value of government bonds held by the company

B) the cash held by the company

C) the amount of deferred tax liability held by the company

D) the amount of money owed to the company by customers who have not yet paid for goods and services they have received

E) the value of inventories held by the company

Answer: C

Diff: 2 Type: MC

Skill: Conceptual

Objective: 2.2 Understand the function of the statement of financial position

4) Which of the following best describes why the left and right sides of a statement of financial position are equal?

A) In a properly run business, the value of liabilities will not exceed the assets held by the company.

B) By definition, the assets plus the liabilities will be the same as the stockholders' equity.

C) The assets must equal liabilities plus stockholders' equity, because stockholders' equity is the difference between the assets and the liabilities.

D) By accounting convention, the assets of a company must be equal to the liabilities of that company.

E) Assets must always exceed liabilities or the company will be bankrupt.

Answer: C

Diff: 1 Type: MC

Skill: Conceptual

Objective: 2.2 Understand the function of the statement of financial position

5) A company that produces drugs is preparing a statement of financial position. Which of the following would be most likely to be considered a long-term asset on this statement of financial position?

- A) commercial paper held by the company
- B) the inventory of chemicals used to produce the drugs made by the company
- C) a patent for a drug held by the company
- D) the cash reserves of the company
- E) money owed to the firm by customers who have purchased goods on credit

Answer: C

Diff: 1 Type: MC

Skill: Conceptual

Objective: 2.2 Understand the function of the statement of financial position

6) A delivery company is creating a statement of financial position. Which of the following would most likely be considered a short-term liability on this statement of financial position?

- A) the depreciation over the last year in the value of the vehicles owned by the company
- B) revenue received for the delivery of items that have not yet been delivered
- C) a loan which must be paid back in two years' time
- D) prepaid rent on the offices occupied by the company
- E) money owed to the firm by customers who have purchased goods on credit

Answer: B

Diff: 1 Type: MC

Skill: Conceptual

Objective: 2.2 Understand the function of the statement of financial position

7) A small company has current assets of \$112,000 and current liabilities of \$117,000. Which of the following statements about that company is most likely to be true?

- A) Since net working capital is negative, the company will not have enough funds to meet its obligations.
- B) Since net working capital is high, the company will likely have little difficulty meeting its obligations.
- C) Since net working capital is very high, the company will have ample money to invest after it meets its obligations.
- D) Since net working capital is nearly zero, the company is well run and will have little difficulty attracting investors.
- E) Since net working capital is negative, the company will likely have little difficulty meeting its obligations.

Answer: A

Diff: 1 Type: MC

Skill: Conceptual

Objective: 2.2 Understand the function of the statement of financial position

- 8) What is the main problem in using a statement of financial position to provide an accurate assessment of the value of a company's equity?
- A) Valuable assets such as the company's reputation, the quality of its work force, and the strength of its management are not captured on the statement of financial position.
 - B) The statement of financial position does not accurately represent the book value of assets held by the company.
 - C) The equity shown on the statement of financial position does not reflect the market capitalization of the company.
 - D) Knowing at a single point in time what assets a firm possesses and the liabilities a firm owes does not give any indication of what those assets can produce in the future.
 - E) The statement of financial position does not provide enough detail about the company's equity.

Answer: A

Diff: 2 Type: MC

Skill: Conceptual

Objective: 2.2 Understand the function of the statement of financial position

- 9) The major components of shareholders' equity are
- A) cash, common stock, and paid-in surplus.
 - B) common stock, paid-in surplus, and net income.
 - C) common stock, paid-in surplus, and retained earnings.
 - D) common stock, liabilities, and retained earnings.
 - E) cash, paid-in surplus, and retained earnings.

Answer: C

Diff: 2 Type: MC

Skill: Conceptual

Objective: 2.2 Understand the function of the statement of financial position

Use the table for the question(s) below.

Statement of Financial Position

Assets		Liabilities	
<u>Current Assets</u>		<u>Current Liabilities</u>	
Cash	50	Accounts payable	42
Accounts receivable	22	Notes payable/short-term debt	7
Inventories	17		
Total current assets	89	Total current liabilities	49
<u>Long-Term Assets</u>		<u>Long-Term Liabilities</u>	
Net property, plant, and equipment	121	Long-term debt	128
Total long-term assets	121	Total long-term liabilities	128
		Total Liabilities	177
		Shareholders' Equity	33
Total Assets	210	Total Liabilities and Shareholders' Equity	210

10) The above diagram shows a statement of financial position for a certain company. All quantities shown are in millions of dollars. What is the company's net working capital?

- A) \$7 million
- B) \$32 million
- C) \$33 million
- D) \$40 million
- E) \$20 million

Answer: D

Explanation: D) Net working capital = total current assets - total current liabilities, which = $89 - 49 = \$40$ million as all quantities are expressed in millions of dollars on the table.

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.2 Understand the function of the statement of financial position

11) The above diagram shows a statement of financial position for a certain company. All quantities shown are in millions of dollars. How would the balance sheet change if the company's long-term assets were judged to depreciate at an extra \$5 million per year?

- A) Net property, plant, and equipment would rise to \$126 million, and Total Assets and Stockholders' Equity would be adjusted accordingly.
- B) Net property, plant, and equipment would fall to \$116 million, and Total Assets and Stockholders' Equity would be adjusted accordingly.
- C) Long-Term Liabilities would rise to \$182 million, and Total Liabilities and Stockholders' Equity would be adjusted accordingly.
- D) Long-Term Liabilities would fall to \$172 million, and Total Liabilities and Stockholders' Equity would be adjusted accordingly.
- E) Net property, plant, and equipment would be unchanged, and Total Assets and Stockholders' Equity would also remain the same.

Answer: B

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.2 Understand the function of the statement of financial position

12) The above diagram shows a statement of financial position for a certain company. All quantities shown are in millions of dollars. If the company has 4 million shares outstanding, and these shares are trading at a price of \$8.24 per share, what does this tell you about how investors view this firm's book value?

- A) Investors consider that the firm's market value is worth very much less than its book value.
- B) Investors consider that the firm's market value is worth less than its book value.
- C) Investors consider that the firm's market value and its book value are roughly equivalent.
- D) Investors consider that the firm's market value is worth more than its book value.
- E) Investors consider that the firm's market value is worth much more than its book value.

Answer: C

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.2 Understand the function of the statement of financial position

13) Which of the following statement of financial position equations is correct?

- A) $\text{Assets} - \text{Liabilities} = \text{Shareholders' Equity}$
- B) $\text{Assets} + \text{Liabilities} = \text{Shareholders' Equity}$
- C) $\text{Assets} - \text{Current Liabilities} = \text{Long Term Liabilities}$
- D) $\text{Assets} + \text{Current Liabilities} = \text{Long Term Liabilities} + \text{Shareholders' Equity}$
- E) $\text{Assets} + \text{Current Liabilities} = \text{Long Term Liabilities} - \text{Shareholders' Equity}$

Answer: A

Diff: 2 Type: MC

Skill: Conceptual

Objective: 2.2 Understand the function of the statement of financial position

Use the table for the question(s) below.

Luther Corporation Consolidated Statement of Financial Position December 31, 2015 and 2014 (in \$ millions)					
Assets	2015	2014	Liabilities and Stockholders' Equity	2015	2014
<i>Current Assets</i>			<i>Current Liabilities</i>		
Cash	63.6	58.5	Accounts payable	87.6	73.5
Accounts receivable	55.5	39.6	Notes payable / short-term debt	10.5	9.6
Inventories	45.9	42.9	Current maturities of long- term debt	39.9	36.9
Other current assets	6.0	3.0	Other current liabilities	6.0	12.0
Total current assets	171.0	144.0	Total current liabilities	144.0	132.0
<i>Long-Term Assets</i>			<i>Long-Term Liabilities</i>		
Land	66.6	62.1	Long-term debt	239.7	168.9
Buildings	109.5	91.5	Capital lease obligations	---	---
Equipment	119.1	99.6	Total Debt	239.7	168.9
Less accumulated depreciation	(56.1)	(52.5)	Deferred taxes	22.8	22.2
Net property, plant, and equipment	239.1	200.7	Other long-term liabilities	---	---
Goodwill	60.0	--	Total long-term liabilities	262.5	191.1
Other long-term assets	63.0	42.0	Total liabilities	406.5	323.1
Total long-term assets	362.1	242.7	Shareholders' Equity	126.6	63.6
Total Assets	533.1	386.7	Total liabilities and Shareholders' Equity	533.1	386.7

14) Refer to the statement of financial position above. What is Luther's net working capital in 2014?

- A) \$12 million
- B) \$27 million
- C) \$39 million
- D) \$45 million
- E) \$63.6 million

Answer: A

Explanation: A) NWC = Current assets - Current liabilities = 144 - 132 = \$12 million

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.2 Understand the function of the statement of financial position

15) In general, a successful firm will have a market-to-book ratio that is substantially greater than 1.

Answer: TRUE

Diff: 1 Type: TF

Skill: Conceptual

Objective: 2.2 Understand the function of the statement of financial position

16) A public company has a book value of \$128 million. They have 20 million shares outstanding, with a market price of \$4 per share. Which of the following statements is true regarding this company?

A) Investors may consider this firm to be a growth company.

B) Investors believe the company's assets are not likely to be profitable since its market value is worth less than its book value.

C) The firm's market value is more than its book value.

D) The value of the firm's assets are greater than their liquidation value.

E) The firm's market-to-book ratio is greater than 1.

Answer: B

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.2 Understand the function of the statement of financial position

17) A stock has 94 million shares outstanding, with a current share price of \$3.53 per share. If the firm's book value of equity is \$120 million, what is its market-to-book ratio?

A) 2.77

B) 0.38

C) 1.28

D) 0.78

E) 3.53

Answer: A

Explanation: A) Market-to-book = $(94 \times 3.53)/120 = 2.77$

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.2 Understand the function of the statement of financial position

18) Ivanhoe Energy Inc has 36 million shares outstanding, with a current share price of \$21.45 per share. If the firm's book value of equity is \$80 million, what is its market-to-book ratio?

A) 0.45

B) 2.22

C) 9.65

D) 0.10

E) 3.73

Answer: C

Explanation: C) Market-to-book = $(36 \times 21.45)/80 = 9.65$

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.2 Understand the function of the statement of financial position

19) Secure Energy Services has 20 million shares outstanding, with a current share price of \$12.15 per share. If the firm's market-to-book ratio is 4.5, what is the firm's book value of equity?

- A) \$7.4 million
- B) \$54 million
- C) \$20 million
- D) \$90 million
- E) \$243 million

Answer: B

Explanation: B) Market-to-book = Market cap / book value of equity

Book value of equity = $(20 \times 12.15) / 4.5 = 54$ million

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.2 Understand the function of the statement of financial position

20) CIBC has 110 million shares outstanding, with a current share price of \$94.50 per share. If the firm's market-to-book ratio is 7.85, what is the firm's book value of equity?

- A) \$5.6 billion
- B) \$0.9 billion
- C) \$10.4 billion
- D) \$1.3 billion
- E) \$2.75 billion

Answer: D

Explanation: D) Market-to-book = Market cap / book value of equity

Book value of equity = $(110 \times 94.5) / 7.85 = \1.3 billion

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.2 Understand the function of the statement of financial position

21) MTS has 83 million shares outstanding with a current share price of \$19.25. The firm has a market-to-book ratio of 4.17 and a book debt-equity ratio of 1.59. If MTS currently has \$24 million in cash, what is its enterprise value?

- A) \$0.968 billion
- B) \$4.115 billion
- C) \$1.598 billion
- D) \$2.183 billion
- E) \$1.013 billion

Answer: D

Explanation: D) Market value of equity = 83 million $\times$ 19.25 = 1.598 billion

Book value of equity = $1.598 / 4.17 = 383$ million

Debt = $383 \times 1.59 = 609$ million.

Enterprise value = 1.598 billion + 609 million - 24 million = \$2.183 billion

Diff: 3 Type: MC

Skill: Analytical

Objective: 2.2 Understand the function of the statement of financial position

22) A firm has 12 million shares outstanding with a current share price of \$8.50. The firm has a market-to-book ratio of 3.55 and a book debt-equity ratio of 0.8. If the firm currently has \$4 million in cash, what is its enterprise value?

- A) \$121 million
- B) \$83 million
- C) \$180 million
- D) \$102 million
- E) \$125 million

Answer: A

Explanation: A) Market value of equity = 12 million $\times$ 8.50 = 102 million

Book value of equity = 102/3.55 = 29 million

Debt = 29 $\times$ 0.8 = 23 million

Enterprise value = 102 + 23 - 4 = \$121 million.

Diff: 3 Type: MC

Skill: Analytical

Objective: 2.2 Understand the function of the statement of financial position

23) A firm has 41 million shares outstanding with a current share price of \$4.30. The firm has a market-to-book ratio of 8.5 and a book debt-equity ratio of 2.2. If the firm currently has \$18 million in cash, what is its enterprise value?

- A) \$176 million
- B) \$204 million
- C) \$148 million
- D) \$49 million
- E) \$240 million

Answer: B

Explanation: B) Market value of equity = 41 million $\times$ 4.3 = 176 million

Book value of equity = 176/8.5 = 21 million

Debt = 21 $\times$ 2.2 = 46 million

Enterprise value = 176 + 46 - 18 = \$204 million

Diff: 3 Type: MC

Skill: Analytical

Objective: 2.2 Understand the function of the statement of financial position

Use the table for the question(s) below.

Luther Corporation Consolidated Statement of Financial Position December 31, 2015 and 2014 (in \$ millions)					
Assets	2015	2014	Liabilities and Stockholders' Equity	2015	2014
<i>Current Assets</i>			<i>Current Liabilities</i>		
Cash	63.6	58.5	Accounts payable	87.6	73.5
Accounts receivable	55.5	39.6	Notes payable / short-term debt	10.5	9.6
Inventories	45.9	42.9	Current maturities of long- term debt	39.9	36.9
Other current assets	6.0	3.0	Other current liabilities	6.0	12.0
Total current assets	171.0	144.0	Total current liabilities	144.0	132.0
<i>Long-Term Assets</i>			<i>Long-Term Liabilities</i>		
Land	66.6	62.1	Long-term debt	239.7	168.9
Buildings	109.5	91.5	Capital lease obligations	---	---
Equipment	119.1	99.6	Total Debt	239.7	168.9
Less accumulated depreciation	(56.1)	(52.5)	Deferred taxes	22.8	22.2
Net property, plant, and equipment	239.1	200.7	Other long-term liabilities	---	---
Goodwill	60.0	--	Total long-term liabilities	262.5	191.1
Other long-term assets	63.0	42.0	Total liabilities	406.5	323.1
Total long-term assets	362.1	242.7	Shareholders' Equity	126.6	63.6
Total Assets	533.1	386.7	Total liabilities and Shareholders' Equity	533.1	386.7

24) Refer to the statement of financial position above. If in 2015 Luther has 10.2 million shares outstanding and these shares are trading at \$16 per share, then Luther's market-to-book ratio would be closest to:

- A) 0.39
- B) 0.76
- C) 1.29
- D) 2.57
- E) 0.31

Answer: C

Explanation: C) MTB = market cap / book value of equity = $(10.2 \text{ million} \times 16) / 126.6 = 163.2 / 126.6 = 1.29$

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.2 Understand the function of the statement of financial position

25) Refer to the statement of financial position above. If in 2015 Luther has 10.2 million shares outstanding and these shares are trading at \$16 per share, then Luther's stock would be considered to be

- A) undervalued.
- B) overvalued.
- C) a growth stock.
- D) a value stock.
- E) worthless.

Answer: D

Explanation: D) MTB = market cap / book value of equity = $(10.2 \text{ million} \times 16) / 126.6 = 163.2 / 126.6 = 1.29$. This is a low market-to-book ratio, and thus it would be considered a value stock.

Diff: 3 Type: MC

Skill: Analytical

Objective: 2.2 Understand the function of the statement of financial position

26) Refer to the statement of financial position above. If in 2015 Luther has 10.2 million shares outstanding and these shares are trading at \$16 per share, then what is Luther's enterprise value?

- A) -\$63.3 million
- B) \$353.1 million
- C) \$389.7 million
- D) \$516.9 million
- E) \$163.2 million

Answer: C

Explanation: C) Enterprise value = MVE + Debt - Cash = $10.2 \times \$16 + 290.1 - 63.6 = 389.7$

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.2 Understand the function of the statement of financial position

27) Refer to the statement of financial position above. If on December 31, 2014 Luther has 8 million shares outstanding trading at \$15 per share, then what is Luther's market-to-book ratio?

Answer: market-to-book = market value of equity / book value of equity

market-to-book = $8 \text{ million} \times \$15 / \$63.6 = 1.89$

Diff: 2 Type: ES

Skill: Analytical

Objective: 2.2 Understand the function of the statement of financial position

28) Refer to the statement of financial position above. If on December 31, 2014 Luther has 8 million shares outstanding trading at \$15 per share, then what is Luther's enterprise value?

Answer: Enterprise value = Market value of equity + Debt - Cash

Market value of equity = $8 \text{ million} \times \$15 = \$120 \text{ million}$

Debt = Notes payable + Current maturities of long-term debt + Long-term debt

Debt = $9.6 + 36.9 + 168.9 = 215.4$

Cash = 58.5

So, enterprise value = $\$120 + 215.4 - 58.5 = \276.90 .

Diff: 2 Type: ES

Skill: Analytical

Objective: 2.2 Understand the function of the statement of financial position

29) How does a firm select the date for preparation of its statement of financial position?

Answer: The statement of financial position is prepared on the fiscal closing date for the accounts of a firm that may or may not coincide with the calendar year-end of December 31st.

Diff: 3 Type: SA

Skill: Analytical

Objective: 2.2 Understand the function of the statement of financial position

30) What will be the effect on the statement of financial position if a firm buys a new processing plant through a new loan?

Answer: The Assets side will increase under Net property, plant, and equipment with the net effect of the new processing plant while the Liabilities side will correspondingly show the new debt that was incurred in paying for the plant.

Diff: 3 Type: SA

Skill: Conceptual

Objective: 2.2 Understand the function of the statement of financial position

2.3 The Statement of Comprehensive Income and Income Statement

1) The income statement reports the firm's revenues and expenses, and it computes the firm's bottom line of net income, or earnings.

Answer: TRUE

Diff: 1 Type: TF

Skill: Analytical

Objective: 2.3 Understand how the income statement is used

2) What is a firm's net income?

A) earnings before interest and taxes are deducted

B) the third line of an income statement that represents the difference between sales revenues and costs

C) a measure of the firm's profitability over a given period

D) net sales less cost of sales

E) earnings after interest is deducted but before taxes are deducted

Answer: C

Diff: 3 Type: MC

Skill: Conceptual

Objective: 2.3 Understand how the income statement is used

3) What is a firm's gross profit?

A) the difference between the sales and other income generated by the firm, and all costs, taxes, and expenses incurred by the firm in a given period

B) the difference between sales revenues and the costs associated with those sales

C) the difference between sales revenues and cash expenditures associated with those sales

D) earnings before interest and taxes are deducted

E) earnings after interest is deducted but before taxes are deducted

Answer: B

Diff: 3 Type: MC

Skill: Conceptual

Objective: 2.3 Understand how the income statement is used

4) Gross profit is calculated as

A) Total sales - Cost of sales - Selling, general, and administrative expenses - Depreciation and amortization.

B) Total sales - Cost of sales - Selling, general, and administrative expenses.

C) Total sales - Cost of sales.

D) Total sales - Cost of sales - Interest expense.

E) Total sales - Cost of sales - Interest expense - Taxes.

Answer: C

Diff: 2 Type: MC

Skill: Conceptual

Objective: 2.3 Understand how the income statement is used

5) A firm has EBIT of \$4.5 million, interest expense of \$400,000, and pays taxes of \$1.2 million. If the firm has 2 million shares outstanding, what is the firm's EPS?

A) \$1.45

B) \$2.25

C) \$1.65

D) \$0.69

E) \$1.00

Answer: A

Explanation: A) Net income = EBIT - interest expense - taxes

Net income = 4.5 - 0.4 - 1.2 = 2.9 million.

EPS = 2.9/2 = \$1.45

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.3 Understand how the income statement is used

6) A firm has EBIT of \$29 million, interest expense of \$4.5 million, and pays taxes of \$8 million. If the firm has 15 million shares outstanding, what is the firm's EPS?

A) \$1.93

B) \$1.10

C) \$1.40

D) \$1.63

E) \$0.91

Answer: B

Explanation: B) Net income = EBIT - interest expense - taxes

Net income = 29 - 4.5 - 8 = 16.5 million

EPS = 16.5/15 = 1.10

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.3 Understand how the income statement is used

7) A firm has gross profit of \$45 million, EBIT of \$20 million, and net income of \$8.5 million. If the firm has 5 million shares outstanding, what is the firm's EPS?

- A) \$9.00
- B) \$4.00
- C) \$1.70
- D) \$2.30
- E) \$5.00

Answer: C

Explanation: C) $\text{EPS} = \text{net income} / \text{shares outstanding} = 8.5 / 5 = \1.70

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.3 Understand how the income statement is used

8) A firm has gross profit of \$142 million, EBIT of \$94 million, and net income of \$55 million. If the firm has 28 million shares outstanding, what is the firm's EPS?

- A) \$1.39
- B) \$3.36
- C) \$1.71
- D) \$2.30
- E) \$1.96

Answer: E

Explanation: E) $\text{EPS} = \text{net income} / \text{shares outstanding} = 55 / 28 = \1.96

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.3 Understand how the income statement is used

Use the table for the question(s) below.

Income Statement for Xenon Manufacturing:

	2014	2015
Total sales	202	212
<u>Cost of sales</u>	<u>-148</u>	<u>-172</u>
Gross Profit	54	40
Selling, general, and administrative expenses	-22	-20
Research and development	-8	-7
<u>Depreciation and amortization</u>	<u>-4</u>	<u>-3</u>
Operating Income	20	10
<u>Other income</u>	<u>4</u>	<u>6</u>
Earnings before interest and taxes (EBIT)	24	16
<u>Interest income (expense)</u>	<u>-7</u>	<u>-4</u>
Pretax income	14	12
<u>Taxes</u>	<u>-4</u>	<u>-3</u>
Net Income	10	9

9) Consider the above Income Statement for Xenon Manufacturing. All values are in millions of dollars. If Xenon Manufacturing has 25 million shares outstanding, what is its EPS in 2015?

- A) \$0.36
- B) \$0.40
- C) \$0.63
- D) \$0.84
- E) \$0.64

Answer: A

Explanation: A) $EPS = \text{Net income} / \# \text{ shares outstanding} = 9 / 25 = 0.36$

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.3 Understand how the income statement is used

Use the table for the question(s) below.

Income Statement for CharmCorp:

	2014	2015
Total sales	600	540
<u>Cost of sales</u>	<u>-532</u>	<u>-488</u>
Gross Profit	68	52
Selling, general, and administrative expenses	-36	-21
Research and development	-4	-5
<u>Depreciation and amortization</u>	<u>-5</u>	<u>-5</u>
Operating Income	23	21
<u>Other income</u>	<u>1</u>	<u>5</u>
Earnings before interest and taxes (EBIT)	24	26
<u>Interest income (expense)</u>	<u>-7</u>	<u>-7</u>
Pretax income	14	19
<u>Taxes</u>	<u>-4</u>	<u>-5</u>
Net Income	10	14

10) Consider the above Income Statement for CharmCorp. All values are in millions of dollars. If CharmCorp has 6 million shares outstanding, and its managers and employees have stock options for 1 million shares, what is its diluted EPS in 2015?

- A) \$1.42
- B) \$1.67
- C) \$2.00
- D) \$2.33
- E) \$3.71

Answer: C

Explanation: C) Diluted EPS = Net income / (# shares outstanding + # options) = 14 / (6 + 1)

Diff: 3 Type: MC

Skill: Analytical

Objective: 2.3 Understand how the income statement is used

11) How does a firm select the dates for preparation of its income statement?

Answer: The income statement is prepared on the fiscal closing date for the accounts of a firm that may or may not coincide with the calendar year-end of December 31st. Typically the income statement spans the flow between two adjacent balance sheets.

Diff: 3 Type: SA

Skill: Analytical

Objective: 2.3 Understand how the income statement is used

12) What will be the effect on the income statement if a firm buys a new processing plant through a new loan?

Answer: The effect on the income statement will be in the form of a depreciation expense for the first year on the new processing plant.

Diff: 3 Type: SA

Skill: Conceptual

Objective: 2.3 Understand how the income statement is used

Use the table for the question(s) below.

Luther Corporation
Consolidated Income Statement
Year ended December 31 (in \$ millions)

	2015	2014
Total sales	610.1	578.3
Cost of sales	(500.2)	(481.9)
Gross profit	109.9	96.4
Selling, general, and administrative expenses	(40.5)	(39.0)
Research and development	(24.6)	(22.8)
Depreciation and amortization	(3.6)	(3.3)
Operating income	41.2	31.3
Other income	---	---
Earnings before interest and taxes (EBIT)	41.2	31.3
Interest income (expense)	(25.1)	(15.8)
Pretax income	16.1	15.5
Taxes	(5.5)	(5.3)
Net income	10.6	10.2
Price per share	\$16	\$15
Shares outstanding (millions)	10.2	8.0
Stock options outstanding (millions)	0.3	0.2
Shareholders' Equity	126.6	63.6
Total Liabilities and Shareholders' Equity	533.1	386.7

13) Refer to the income statement above. For the year ending December 31, 2015 Luther's earnings per share are closest to:

- A) \$1.01
- B) \$1.04
- C) \$1.58
- D) \$4.04
- E) \$10.77

Answer: B

Explanation: B) $\text{EPS} = \text{Net income} / \text{Shares outstanding} = \$10.6 / 10.2 = \$1.04$

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.3 Understand how the income statement is used

14) Refer to the income statement above. Assuming that Luther has no convertible bonds outstanding, then for the year ending December 31, 2015 Luther's diluted earnings per share are closest to:

- A) \$1.01
- B) \$1.04
- C) \$1.53
- D) \$3.92
- E) \$4.04

Answer: A

Explanation: A) $\text{Diluted EPS} = \text{Net income} / (\text{Shares outstanding} + \text{Options contracts outstanding} + \text{Shares possible from convertible bonds outstanding}) = 10.6 / (10.2 + 0.3 + 0.0) = \1.01

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.3 Understand how the income statement is used

15) Refer to the income statement above. Luther has convertible bonds outstanding that would allow bondholders to convert their bonds into 700,000 shares of Luther stock. For the year ending December 31, 2015 Luther's diluted earnings per share are closest to:

- A) \$0.95
- B) \$1.01
- C) \$1.04
- D) \$1.53
- E) \$3.92

Answer: A

Explanation: A) $\text{Diluted EPS} = \text{Net income} / (\text{Shares outstanding} + \text{Options contracts outstanding} + \text{Shares possible from convertible bonds outstanding}) = 10.6 / (10.2 + 0.3 + 0.7) = \0.95

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.3 Understand how the income statement is used

16) Price-earnings ratios tend to be high for fast-growing firms.

Answer: TRUE

Diff: 1 Type: TF

Skill: Conceptual

Objective: 2.3 Understand how the income statement is used

Use the table for the question(s) below.

Luther Corporation
Consolidated Income Statement
Year ended December 31 (in \$ millions)

	2015	2014
Total sales	610.1	578.3
Cost of sales	(500.2)	(481.9)
Gross profit	109.9	96.4
Selling, general, and administrative expenses	(40.5)	(39.0)
Research and development	(24.6)	(22.8)
Depreciation and amortization	(3.6)	(3.3)
Operating income	41.2	31.3
Other income	---	---
Earnings before interest and taxes (EBIT)	41.2	31.3
Interest income (expense)	(25.1)	(15.8)
Pretax income	16.1	15.5
Taxes	(5.5)	(5.3)
Net income	10.6	10.2
Price per share	\$16	\$15
Shares outstanding (millions)	10.2	8.0
Stock options outstanding (millions)	0.3	0.2
Shareholders' Equity	126.6	63.6
Total Liabilities and Shareholders' Equity	533.1	386.7

17) Refer to the income statement above. Luther's earnings before interest, taxes, depreciation, and amortization (EBITDA) for the year ending December 31, 2015 is closest to:

- A) \$10.6 million
- B) \$19.7 million
- C) \$37.6 million
- D) \$41.2 million
- E) \$44.8 million

Answer: E

Explanation: E) $\text{EBITDA} = \text{EBIT} + \text{Depreciation and amortization} = 41.2 + 3.6 = \44.8 million

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.3 Understand how the income statement is used

2.4 The Statement of Cash Flows

1) The firm's statement of cash flows uses the balance sheet and the income statement to determine the amount of cash a firm has generated and how it has used that cash during a given period.

Answer: TRUE

Diff: 1 Type: TF

Skill: Conceptual

Objective: 2.4 Interpret a statement of cash flows

2) Which of the following is a way that the Operating Activity section of the statement of cash flows adjusts Net Income from the balance sheet?

A) It subtracts all expenses and costs related to the firm's operating activities.

B) It adds all non-cash entries related to the firm's operating activities.

C) It adds the cash that flows from investors to the firm.

D) It removes the cash used for investment purposes.

E) It adds cash received from investments.

Answer: B

Diff: 1 Type: MC

Skill: Conceptual

Objective: 2.4 Interpret a statement of cash flows

3) Allen Company bought a new copy machine to be depreciated straight line for three years for use by sales personnel. Where would this purchase be reflected on the Statement of Cash Flows?

A) It would be an expense on the income statement, so it would be reflected in operating cash flows.

B) It would be an addition to property, plant and equipment, so it would be an investing activity.

C) It would be an addition to cash, so would be reflected in the change in cash.

D) It would be an increase in borrowing, so would be reflected in financing activities.

E) It would be a change in inventory, so would be reflected in operating activities.

Answer: B

Diff: 1 Type: MC

Skill: Conceptual

Objective: 2.4 Interpret a statement of cash flows

4) A printing company prints a brochure for a client, and then bills them for this service. At the time the printing company's financial disclosure statements are prepared, the client has not yet paid the bill for this service. How will this transaction be recorded?

A) The sale will be added to Net Income on the income statement and retained in Net Income on the statement of cash flows.

B) The sale will be added to Net Income on the income statement but deducted from Net Income on the statement of cash flows.

C) The sale will not be added to Net Income on the income statement but added to Net Income on the statement of cash flows.

D) The sale will neither be added to Net Income on the income statement nor used to adjust Net Income on the statement of cash flows.

E) The sale will be deducted from Net Income on the income statement but added to Net Income on the statement of cash flows.

Answer: B

Diff: 1 Type: MC

Skill: Conceptual

Objective: 2.4 Interpret a statement of cash flows

5) A manufacturer of plastic bottles for the medical trade purchases a new compression blow moulder for its bottle production plant. How will the cost to the company of this piece of equipment be recorded?

A) It will be depreciated over time on the income statement and subtracted as a capital expenditure on the statement of cash flows.

B) It will be depreciated over time on the income statement and subtracted as Inventory on the statement of cash flows.

C) It will be depreciated over time on the income statement and therefore not be recorded separately on the statement of cash flows.

D) It will be subtracted from Gross Profit on the income statement and therefore not be recorded separately on the statement of cash flows.

E) It will be depreciated over time on the income statement and added as accounts payable on the statement of cash flows.

Answer: A

Diff: 1 Type: MC

Skill: Conceptual

Objective: 2.4 Interpret a statement of cash flows

6) A software company acquires a smaller company in order to acquire the patents that it holds. Where will the cost of this acquisition be recorded on the statement of cash flows?

A) as an outflow under Operating Activities

B) as an outflow under Investment Activities

C) as an outflow under Financial Activities

D) The acquisition would not be recorded on the statement of cash flows.

E) as an inflow under Financial Activities

Answer: B

Diff: 1 Type: MC

Skill: Conceptual

Objective: 2.4 Interpret a statement of cash flows

7) Farhan's Fences has retained earnings of \$2.5 million, after paying dividends of \$1.5 million. What was the firm's payout ratio?

A) 0.38

B) 0.60

C) 0.63

D) 1.50

E) 1.67

Answer: A

Explanation: A) Net income = Retained Earnings + Dividends = 2.5 + 1.5 = 4 million

Payout ratio = Dividends/Net income = 1.5/4 = 0.38

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.4 Interpret a statement of cash flows

8) Solid State Software has retained earnings of \$42 million, after paying dividends of \$10 million. What was the firm's payout ratio?

- A) 0.24
- B) 0.81
- C) 0.19
- D) 0.62
- E) 4.20

Answer: C

Explanation: C) Net income = Retained Earnings + Dividends = 42 + 10 = 52 million

Payout ratio = Dividends/Net income = 10/52 = 0.19

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.4 Interpret a statement of cash flows

Use the table for the question(s) below.

AOS Industries Statement of Cash Flows for 2015

Operating activities	
Net Income	3.2
Depreciation and amortization	1.4
Cash effect of changes in	
Accounts receivable	-2.1
Accounts payable	1.1
Inventory	-0.8
<u>Cash from operating activities</u>	<u>2.8</u>
Investment activities	
Capital expenditures	2.2
Acquisitions and other investing activity	-0.4
<u>Cash from investing activities</u>	<u>2.6</u>
Financing activities	
Dividends paid	-1.5
Sale or purchase of stock	2.1
Increase in short-term borrowing	1.4
Increase in long-term borrowing	3.2
<u>Cash from financing activities</u>	<u>5.2</u>
<u>Change in Cash and Cash Equivalents</u>	<u>5.4</u>

9) Consider the above statement of cash flows. If all amounts shown above are in millions of dollars, what was AOS Industries' change in retained earnings for 2015?

- A) \$1.3 million
- B) \$1.7 million
- C) \$2.1 million
- D) \$5.4 million
- E) \$3.2 million

Answer: B

Explanation: B) $3.2 - 1.5 = \$1.7$ million

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.4 Interpret a statement of cash flows

10) Consider the above statement of cash flows. What were AOS Industries' major means of raising money in 2015?

- A) from investment activities
- B) by sale of stock
- C) from its operations
- D) by issuing debt
- E) from short-term bank loans

Answer: D

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.4 Interpret a statement of cash flows

11) Consider the above statement of cash flows. Which of the following is true of AOS Industries' operating cash flows?

- A) It collected more cash from its customers than they charged.
- B) It sold more inventory than it bought.
- C) It charged more on its accounts payable than it paid back.
- D) It charged less on its accounts payable than it paid back.
- E) It used \$1.4 million of its cash on depreciation and amortization.

Answer: C

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.4 Interpret a statement of cash flows

12) Consider the above statement of cash flows. In 2015, AOS Industries had contemplated buying a new warehouse for \$2 million, the cost of which would be depreciated over 10 years. If AOS Industries has a tax rate of 25%, what would be the impact on the amount of cash held by AOS at the the end of the 2015?

- A) It would have \$2,00,000 less cash at the end of 2015.
- B) It would have \$1,950,000 less cash at the end of 2015.
- C) It would have \$150,000 less cash at the end of 2015.
- D) It would have an additional \$50,000 in cash at the end of 2015.
- E) It would have \$1,800,000 less cash at the end of 2015.

Answer: B

Explanation: B) $-\$2,000,000 + 200,000 \times 0.25 = -\$1,950,000$

Diff: 3 Type: MC

Skill: Analytical

Objective: 2.4 Interpret a statement of cash flows

13) How can we cross check the statement of cash flows?

Answer: The last item in the statement of cash flows should equal the difference in cash balances between two adjacent balance sheets.

Diff: 3 Type: SA

Skill: Conceptual

Objective: 2.4 Interpret a statement of cash flows

14) What will be the effect on the statement of cash flows if a firm buys a new processing plant through a new loan?

Answer: The new loan entry should show as a cash inflow for the firm in financing activities, while the payment for the new processing plant will be entered as a cash outflow in investing activities.

Diff: 3 Type: SA

Skill: Conceptual

Objective: 2.4 Interpret a statement of cash flows

2.5 Other Financial Statement Information

1) The management of public companies are not legally required to disclose any off balance sheet transactions.

Answer: FALSE

Diff: 1 Type: TF

Skill: Conceptual

Objective: 2.5 Know what management's discussion and analysis and the statement of shareholders' equity are

2) A firm whose primary business is in a line of regional grocery stores would be most likely to have to include which of the following facts, if true, in the firm's management discussion and analysis (MD&A)?

A) that a large number of funds were allocated to advertising to increase awareness of the firm's brand in new areas it had expanded into this year

B) that some senior members of the management team have retired in this financial year

C) that the company has lost a class action suit brought against the firm by its employees and is expected to have to pay a large amount of damages

D) that the firm has plans to expand into the organic food business in the next financial year by purchasing several small organic food retailers

E) that food prices have increased, increasing the firm's costs

Answer: C

Diff: 2 Type: MC

Skill: Conceptual

Objective: 2.5 Know what management's discussion and analysis and the statement of shareholders' equity are

3) Which type of transactions must be disclosed in the management discussion and analysis?

A) transactions that significantly affect the firm's leverage

B) off balance sheet transactions

C) off income statement transactions

D) very large transactions

E) transactions that reduce the firm's net income

Answer: B

Diff: 1 Type: MC

Skill: Conceptual

Objective: 2.5 Know what management's discussion and analysis and the statement of shareholders' equity are

4) What is the need for the notes to the financial statements when the firm's operations are already documented in the financial statements?

Answer: Not all actions of the firm can be directly converted to an entry on the financial statements. For example, the firm may be involved in off balance sheet transactions, which have to be reported through notes to the financial statements.

Diff: 2 Type: SA

Skill: Conceptual

Objective: 2.5 Know what management's discussion and analysis and the statement of shareholders' equity are

2.6 Financial Statement Analysis

Use the table for the question(s) below.

Luther Corporation		
Consolidated Income Statement		
Year ended December 31 (in \$ millions)		
	2015	2014
Total sales	610.1	578.3
Cost of sales	(500.2)	(481.9)
Gross profit	109.9	96.4
Selling, general, and administrative expenses	(40.5)	(39.0)
Research and development	(24.6)	(22.8)
Depreciation and amortization	(3.6)	(3.3)
Operating income	41.2	31.3
Other income	---	---
Earnings before interest and taxes (EBIT)	41.2	31.3
Interest income (expense)	(25.1)	(15.8)
Pretax income	16.1	15.5
Taxes	(5.5)	(5.3)
Net income	10.6	10.2
Price per share	\$16	\$15
Shares outstanding (millions)	10.2	8.0
Stock options outstanding (millions)	0.3	0.2
Shareholders' Equity	126.6	63.6
Total Liabilities and Shareholders' Equity	533.1	386.7

1) Refer to the income statement above. Luther's operating margin for the year ending December 31, 2014 is closest to:

- A) 1.8%
- B) 2.7%
- C) 5.4%

D) 6.8%

E) 16.7%

Answer: C

Explanation: C) Operating margin = Operating income / Sales

OM = $31.3 / 578.3 = 0.054$ or 5.4%

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

2) Refer to the income statement above. Luther's net profit margin for the year ending December 31, 2014 is closest to:

- A) 1.8%
- B) 2.7%
- C) 5.4%
- D) 16.7%
- E) 18.3%

Answer: A

Explanation: A) Net profit margin = Net income / Total sales = $10.2 / 578.3 = 0.018$ or 1.8%

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

3) Refer to the income statement above. Luther's return on equity (ROE) for the year ending December 31, 2015 is closest to:

- A) 2.0%
- B) 6.5%
- C) 8.4%
- D) 12.7%
- E) 32.5%

Answer: C

Explanation: C) ROE = Net income / Shareholders' equity = $10.6 / 126.6 = 0.084$ or 8.4%

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

4) Refer to the income statement above. Luther's return on assets (ROA) for the year ending December 31, 2015 is closest to:

- A) 2.0%
- B) 6.5%
- C) 8.4%
- D) 12.7%
- E) 32.5%

Answer: A

Explanation: A) ROA = Net income / Total assets.

This is a little tricky in that Total Assets are not given in the problem. The student must remember the basic balance sheet equation $A = L + SE$. Total Liabilities and Shareholders' Equity is given and this is the same as Total Assets. So, ROA = $10.6 / 533.1 = 0.020$ or 2.0%.

Diff: 3 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

Use the table for the question(s) below.

Income Statement for Xenon Manufacturing:

	2014	2015
Total sales	202	212
<u>Cost of sales</u>	<u>-148</u>	<u>-172</u>
Gross Profit	54	40
Selling, general, and		
administrative expenses	-22	-20
Research and development	-8	-7
<u>Depreciation and amortization</u>	<u>-4</u>	<u>-3</u>
Operating Income	20	10
<u>Other income</u>	<u>4</u>	<u>6</u>
Earnings before interest		
and taxes (EBIT)	24	16
<u>Interest income (expense)</u>	<u>-7</u>	<u>-4</u>
Pretax income	14	12
<u>Taxes</u>	<u>-4</u>	<u>-3</u>
Net Income	10	9

5) Consider the above Income Statement for Xenon Manufacturing. All values are in millions of dollars. Calculate the operating margin for 2014 and 2015. What does the change in the operating margin between these two years imply about the company?

- A) The efficiency of Xenon Manufacturing has significantly risen between 2014 and 2015.
- B) The ability of Xenon Manufacturing to sell its goods and services for more than the costs of producing them rose between 2014 and 2015.
- C) The efficiency of Xenon Manufacturing has significantly fallen between 2014 and 2015.
- D) The leverage of Xenon Manufacturing fell slightly between 2014 and 2015.
- E) The revenues available to equity holders fell slightly between 2014 and 2015.

Answer: C

Explanation: C) $24 / 202 = 0.12$; $16 / 212 = 0.08$

Diff: 3 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

6) Consider the above Income Statement for Xenon Manufacturing. All values are in millions of dollars. Calculate the gross margin for 2014 and 2015. What does the change in the gross margin between these two years imply about the company?

- A) The efficiency of Xenon Manufacturing has significantly risen between 2014 and 2015.
- B) The ability of Xenon Manufacturing to sell its goods and services for more than the costs of producing them rose between 2014 and 2015.
- C) The ability of Xenon Manufacturing to sell its goods and services for more than the costs of producing them fell between 2014 and 2015.
- D) The leverage of Xenon Manufacturing fell slightly between 2014 and 2015.
- E) The revenues available to equity holders fell slightly between 2014 and 2015.

Answer: C

Diff: 3 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

7) Consider the above Income Statement for Xenon Manufacturing. All values are in millions of dollars. Calculate the gross margin for 2014 and 2015. What does the change in the net profit margin between these two years imply about the company?

- A) The efficiency of Xenon Manufacturing has significantly risen between 2014 and 2015.
- B) The ability of Xenon Manufacturing to sell its goods and services for more than the costs of producing them rose between 2014 and 2015.
- C) The ability of Xenon Manufacturing to sell its goods and services for more than the costs of producing them fell between 2014 and 2015.
- D) The leverage of Xenon Manufacturing fell slightly between 2014 and 2015.
- E) The revenues available to equity holders fell slightly between 2014 and 2015.

Answer: E

Diff: 3 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

8) A firm has total sales of \$53 million. It has gross profit of \$12 million, operating income of \$8.5 million, and net income of \$4 million. What is the firm's net profit margin?

- A) 7.5%
- B) 16%
- C) 22.6%
- D) 33.3%
- E) 47%

Answer: A

Explanation: A) Net profit margin = net income/sales = $4/53 = 7.5\%$

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

9) A firm's net profit margin increased from 3.2% to 3.8% from 2014 to 2015. If total sales increased from \$312 million in 2014 to \$345 million in 2015, what was the increase in net income?

- A) \$19 million
- B) \$21 million
- C) \$3 million
- D) \$2 million
- E) \$13 million

Answer: C

Explanation: C) Net profit margin = net income/sales

2014: Net income = $0.032 \times 312 = \$10$ million

2015: Net income = $0.038 \times 345 = \$13$ million

Increase in net income = $13 - 10 = \$3$ million.

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

10) A firm's net profit margin increased from 8.1% to 8.3% from 2014 to 2015. If net income increased from \$4.5 million to \$5.6 million, what was the change in the firm's sales?

- A) \$55 million
- B) \$21 million
- C) \$0.1 million
- D) \$11.9 million
- E) \$1.1 million

Answer: D

Explanation: D) Net profit margin = net income/sales

2014: Sales = $4.5 / 0.081 = \$55.56$ million

2015: Sales = $5.6 / 0.083 = \$67.47$ million

Increase in sales = $67.47 - 55.56 = \$11.9$ million

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

11) A firm has \$10 million in cash, \$4.5 million in accounts receivable, and inventory of \$8 million. The firm's accounts payable is \$6.2 million and the firm has no short-term debt. What is the firm's current ratio?

- A) 3.63
- B) 1.05
- C) 5.38
- D) 2.90
- E) 2.34

Answer: A

Explanation: A) Current ratio = current assets/current liabilities = $(10 + 4.5 + 8) / 6.2 = 3.63$

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

12) A firm has \$6 million in cash, \$1.5 million in accounts receivable, and inventory of \$4.2 million. The firm's accounts payable is \$7.4 million and the firm has no short-term debt. What is the firm's quick ratio?

- A) 0.81
- B) 1.58
- C) 1.01
- D) 0.45
- E) 0.77

Answer: C

Explanation: C) Quick ratio = (current assets - inventory)/current liabilities = $(6 + 1.5)/7.4 = 1.01$

Diff: 1 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

13) A firm's current assets increase from 1.4 million in 2014 to 1.7 million in 2015. If the firm's current liabilities are unchanged at \$1.1 million, and inventory remains unchanged, what is the change in the firm's quick ratio?

- A) increase of 0.28
- B) no change
- C) increase of 0.30
- D) cannot be determined
- E) increase of 1.27

Answer: A

Explanation: A) Initial current ratio = $1.4/1.1 = 1.27$

Final current ratio = $1.7/1.1 = 1.55$

Since current liabilities and inventory do not change, change in quick ratio = change in current ratio = $1.55 - 1.27 = 0.28$

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

14) A firm has EBIT of \$15 million, interest expense of \$1 million, and pays taxes of \$4 million. The firm has a market-to-book ratio of 5.75. If the firm has 30 million shares outstanding at a current price of \$12 per share, what is its ROE?

- A) 24%
- B) 2.8%
- C) 16%
- D) 4.2%
- E) 18%

Answer: C

Explanation: C) Net income = $15 - 1 - 4 = \$10$ million.

Book value of equity = $(30 \times 12)/5.75 = 62.61$

ROE = Net income/Book value of equity = $10/62.61 = 16\%$

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

15) A firm has EBIT of \$24 million and has a corporate tax rate of 25%. The firm has total debt of \$40 million, and excess cash of \$8 million. If the firm's book value of equity is \$72 million, what is the firm's return on invested capital (ROIC)?

- A) 6%
- B) 17%
- C) 16%
- D) 15%
- E) 23%

Answer: B

Explanation: B) $ROIC = EBIT(1 - \text{tax rate}) / (\text{Book value of equity} + \text{Net debt})$

$$ROIC = 24(1 - 0.25) / (72 + 40 - 8) = 18 / 104 = 17\%$$

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

16) A firm has ROE of 15% and a net profit margin of 4.5%. If the firm has 6.5 dollars in assets per dollar of equity, what is the firm's asset turnover ratio?

- A) 0.5
- B) 2
- C) 1
- D) 1.5
- E) 2.5

Answer: A

Explanation: A) $ROE = \text{net profit margin} \times \text{asset turnover} \times \text{equity multiplier}$

$$\text{Asset turnover} = 15 / (4.5 \times 6.5) = 0.5$$

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

17) A firm has an asset turnover ratio of 1.6 and a net profit margin of 1.3%. If the firm has 5 dollars in assets per dollar of equity, what is the firm's ROE?

- A) 4.1%
- B) 6.5%
- C) 6.2%
- D) 10.4%
- E) 1.3%

Answer: D

Explanation: D) $ROE = \text{net profit margin} \times \text{asset turnover} \times \text{equity multiplier}$

$$ROE = 1.3 \times 1.6 \times 5 = 10.4\%$$

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

18) A firm has ROE of 5.5% and an asset turnover ratio of 1.2. If the firm has 10 dollars in assets per dollar of equity, what is the firm's net profit margin?

- A) 1.2%
- B) 0.66%
- C) 5.5%
- D) 6.6%
- E) 0.46%

Answer: E

Explanation: E) $\text{ROE} = \text{net profit margin} \times \text{asset turnover} \times \text{equity multiplier}$

Net profit margin = $5.5 / (1.2 \times 10) = 0.46\%$

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

19) A firm has ROE of 18.5%, net profit margin of 3.2% and an asset turnover ratio of 0.7. What is the firm's equity multiplier?

- A) 4.0
- B) 8.3
- C) 13.0
- D) 4.6
- E) 5.8

Answer: B

Explanation: B) $\text{ROE} = \text{net profit margin} \times \text{asset turnover} \times \text{equity multiplier}$

Equity multiplier = $18.5 / (3.2 \times 0.7) = 8.3$

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

20) In 2015, an agricultural company introduced a new cropping process which reduced the cost of growing some of its crops. If sales in 2014 and 2015 were steady at \$25 million, but the gross margin increased from 2.3% to 3.4% between those years, by what amount was the cost of sales reduced?

- A) \$275,000
- B) \$325,000
- C) \$425,000
- D) \$575,000
- E) \$850,000

Answer: A

Explanation: A) $(25 \times 0.034 - 25 \times 0.023) \times 1,000,000 = \$275,000$

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

Above are portions of the balance sheet and income statement for two companies in 2015. Based upon this information, which of the following statements is most likely to be true?

- A) Asset turnover ratios indicate that firm A is generating greater revenue per dollar of assets than firm B.
- B) Fixed asset turnover ratios indicate that firm A generating fewer sales for the assets they employ than firm B.
- C) Both asset turnover ratios and fixed asset turnover ratios indicate that firm A is generating greater revenue per dollar of assets than firm B.
- D) Fixed asset turnover ratios indicate that firm A generating more sales for the assets they employ than firm B.
- E) Asset turnover ratios indicate that firm A is generating less revenue per dollar of assets than firm B.

Answer: B

Diff: 3 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

Use the tables for the question(s) below.

Balance Sheet

Assets		Liabilities	
<u>Current Assets</u>		<u>Current Liabilities</u>	
Cash	50	Accounts payable	42
Accounts receivable	22	Notes payable/short-term debt	7
Inventories	17		
Total current assets	89	Total current liabilities	49

22) The balance sheet and income statement of a particular firm are shown above. What does the accounts receivable days ratio tell you about this company?

- A) It takes on average about 4 weeks to collect payment from its customers.
- B) It takes on average about 6 weeks to collect payment from its customers.
- C) It takes on average about 7 weeks to collect payment from its customers.
- D) It takes on average about 8 weeks to collect payment from its customers.
- E) It takes on average about 11 weeks to collect payment from its customers.

Answer: A

Explanation: A) $22 / (312 / 365) = 25.7$ days, or approximately 4 weeks

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

23) The balance sheet and income statement of a particular firm are shown above. What does the accounts payable days ratio tell you about this company?

- A) It takes on average about 4 weeks to pay its suppliers.
- B) It takes on average about 6 weeks to pay its suppliers.
- C) It takes on average about 7 weeks to pay its suppliers.
- D) It takes on average about 8 weeks to pay its suppliers.
- E) It takes on average about 10 weeks to pay its suppliers.

Answer: E

Explanation: E) $42 / (210 / 365) = 73$ days, or approximately 10 weeks

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

24) Which of the following firms would be expected to have a high ROE based on that firm's high operating efficiency?

- A) a medical supply company that provides very precise instruments at a high price to large medical establishments such as hospitals
- B) a high-end fashion retailer that has a very high mark-up on all items it sells
- C) a brokerage firm that has high levels of leverage
- D) a grocery store chain that has very high turnover, selling many multiples of its assets per year
- E) a mining firm that is mostly engaged in exploration for new deposits

Answer: D

Diff: 1 Type: MC

Skill: Conceptual

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

25) Which of the following firms would be expected to have a high ROE based on that firm's high profitability?

- A) a medical supply company that provides very precise instruments at a high price to large medical establishments such as hospitals
- B) a low-end retailer that has a low mark-up on all items it sells
- C) a brokerage firm that has high levels of leverage
- D) a grocery store chain that has very high turnover, selling many multiples of its assets per year
- E) a mining firm that is mostly engaged in exploration for new deposits

Answer: A

Diff: 1 Type: MC

Skill: Conceptual

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

26) Manufacturer A has a profit margin of 2.0%, an asset turnover of 1.7, and an equity multiplier of 4.9. Manufacturer B has a profit margin of 2.3%, an asset turnover of 1.1, and an equity multiplier of 4.7. How much asset turnover should manufacturer B have to match manufacturer A's ROE?

- A) 1.54
- B) 3.00
- C) 3.09
- D) 4.77
- E) 1.10

Answer: A

Explanation: A) $ROE_a = 2 \times 1.7 \times 4.9 = 16.66$; $ROE_b = 2.3 \times 1.1 \times 4.7 = 11.891$; $16.66 / (2.3 \times 4.7) = 1.54$

Diff: 3 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

27)

	Firm A	Firm B	Firm C	Firm D	Firm E
Net Income	\$34.1 million	\$5.7 million	\$31.1 million	\$13.2 million	\$23 million
Market Capitalization	\$310 million	\$53 million	\$280 million	\$112 million	\$198 million
Earnings per share	\$4.10	\$4.05	\$6.75	\$12.70	\$7.85

The above data is for five regional trucking firms. Based on price-earnings ratios, which firm's stock is the best value?

- A) Firm A
- B) Firm B
- C) Firm C
- D) Firm D
- E) Firm E

Answer: B

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

28) Why must care be taken when comparing a firm's share price to its operating income?

- A) Both share price and operating income are related to the whole firm.
- B) Share price is a quantity related to the entire firm, while operating income is an amount that is related solely to equity holders.
- C) Both share price and operating income are related solely to equity holders.
- D) Share price is a quantity related to equity holders, while operating income is an amount that is related to the whole firm.
- E) Share price is a quantity related to the enterprise value of the firm, while operating income is related to the equity holders.

Answer: D

Diff: 1 Type: MC

Skill: Conceptual

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

29) A company has a share price of \$24.50 and 118 million shares outstanding. Its market-to-book ratio is 4.2, its book debt-equity ratio is 3.2, and it has cash of \$800 million. How much would it cost to take over this business assuming you pay its enterprise value?

- A) \$1.5 billion
- B) \$2.8 billion
- C) \$3.6 billion
- D) \$4.3 billion
- E) \$2.9 billion

Answer: D

Explanation: D) Market cap = $24.5 \times 118 = \$2.891$ billion; Book value = $2.891 / 4.2 = 0.688$;

Debt = $0.688 \times 3.2 = 2.203$; Enterprise value = $2.891 + 2.203 - 0.800 = 4.3$ billion

Diff: 3 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

30) Which ratio would you use to measure the financial health of a firm by assessing that firm's leverage?

- A) debt-equity or equity multiplier ratio
- B) market-to-book ratio
- C) market debt-equity ratio
- D) current or quick ratio
- E) price-to-book ratio

Answer: A

Diff: 1 Type: MC

Skill: Conceptual

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

31) Company A has current assets of \$42 billion and current liabilities of \$31 billion. Company B has current assets of \$2.7 billion and current liabilities of \$1.8 billion. Which of the following statements is correct, based on this information?

- A) Company A is less likely than Company B to have sufficient working capital to meet its short-term needs.
- B) Company A has greater leverage than Company B.
- C) Company A has less leverage than Company B.
- D) Company A and Company B have roughly equivalent enterprise values.
- E) Company A is more likely than Company B to have sufficient working capital to meet its short-term needs.

Answer: A

Diff: 3 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

Use the table for the question(s) below.

Luther Corporation Consolidated Statement of Financial Position December 31, 2015 and 2014 (in \$ millions)					
Assets	2015	2014	Liabilities and Stockholders' Equity	2015	2014
<i>Current Assets</i>			<i>Current Liabilities</i>		
Cash	63.6	58.5	Accounts payable	87.6	73.5
Accounts receivable	55.5	39.6	Notes payable / short-term debt	10.5	9.6
Inventories	45.9	42.9	Current maturities of long- term debt	39.9	36.9
Other current assets	6.0	3.0	Other current liabilities	6.0	12.0
Total current assets	171.0	144.0	Total current liabilities	144.0	132.0
<i>Long-Term Assets</i>			<i>Long-Term Liabilities</i>		
Land	66.6	62.1	Long-term debt	239.7	168.9
Buildings	109.5	91.5	Capital lease obligations	---	---
Equipment	119.1	99.6	Total Debt	239.7	168.9
Less accumulated depreciation	(56.1)	(52.5)	Deferred taxes	22.8	22.2
Net property, plant, and equipment	239.1	200.7	Other long-term liabilities	---	---
Goodwill	60.0	--	Total long-term liabilities	262.5	191.1
Other long-term assets	63.0	42.0	Total liabilities	406.5	323.1
Total long-term assets	362.1	242.7	Shareholders' Equity	126.6	63.6
Total Assets	533.1	386.7	Total liabilities and Shareholders' Equity	533.1	386.7

32) Refer to the statement of financial position above. Luther's quick ratio for 2014 is closest to:

- A) 0.77
- B) 1.31
- C) 1.09
- D) 0.92
- E) 0.87

Answer: A

Explanation: A) quick ratio = (current assets - inventory) / current liabilities

quick ratio = $(144.0 - 42.9) / 132 = 0.77$

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

33) Refer to the statement of financial position above. The change in Luther's quick ratio from 2014 to 2015 is closest to:

- A) a decrease of 0.10
- B) an increase of 0.10
- C) a decrease of 0.15
- D) an increase of 0.15
- E) being unchanged

Answer: B

Explanation: B) quick ratio in 2011 = $(171.0 - 45.9) / 144 = 0.87$

quick ratio 2010 = $(144.0 - 42.9) / 132 = 0.77$

So, the quick ratio increased by $0.87 - 0.77 = 0.10$.

Diff: 3 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

34) Refer to the statement of financial position above. When using the book value of equity, the debt-equity ratio for Luther in 2015 is closest to:

- A) 2.21
- B) 2.29
- C) 2.98
- D) 3.03
- E) 4.39

Answer: B

Explanation: B) $D/E = \text{Total debt} / \text{Total equity}$

Total debt = Notes payable (10.5) + Current maturities of long-term debt (39.9) + Long-term debt (239.7)
= 290.1 million

Total equity = 126.6, so $D/E = 290.1 / 126.6 = 2.29$

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

35) Refer to the statement of financial position above. If in 2015 Luther has 10.2 million shares outstanding and these shares are trading at \$16 per share, then using the market value of equity, the debt-equity ratio for Luther in 2015 is closest to:

- A) 1.71
- B) 1.78
- C) 2.31
- D) 2.35
- E) 2.29

Answer: B

Explanation: B) $D/E = \text{Total debt} / \text{Total equity}$

Total Debt = Notes payable (10.5) + Current maturities of long-term debt (39.9) + Long-term debt (239.7)
= 290.1 million

Total equity = $10.2 \times \$16 = 163.2$, so $D/E = 290.1 / 163.2 = 1.78$

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

36) Refer to the statement of financial position above. Luther's current ratio for 2015 is closest to:

- A) 0.84
- B) 0.87
- C) 1.15
- D) 1.19
- E) 0.77

Answer: D

Explanation: D) current ratio = current assets / current liabilities = 171 / 144 = 1.19

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

Use the table for the question(s) below.

Statement of Financial Position

Assets	2014	2015	Liabilities	2014	2015
<u>Current Assets</u>			<u>Current Liabilities</u>		
Cash	50	46	Accounts payable	42	48
Accounts receivable	22	12	Notes payable/short-term debt	7	5
Inventories	17	38			
Total current assets	89	96	Total current liabilities	49	53
<u>Long-Term Assets</u>			<u>Long-Term Liabilities</u>

Total long-term assets	121	116	Total long-term liabilities	128	136
			Total Liabilities	177	189
			Shareholders' Equity	33	23
			Total Liabilities and		
Total Assets	210	212	Shareholders' Equity	210	212

37) If the above statement of financial position is for a retail company, what indications about this company would best be drawn from the changes in the statement of financial position between 2014 and 2015?

- A) The company is having difficulties selling its product.
- B) The company has reduced its debt.
- C) The company has added a major new asset in terms of plant and equipment.
- D) The company has experienced a significant rise in its market value.
- E) The company has reduced its net working capital.

Answer: A

Diff: 2 Type: MC

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

38) If the above statement of financial position is for a retail company, what indications about this company would best be drawn from the changes in quick ratio between 2014 and 2015?

- A) The company has eliminated the risk that it will experience a cash shortfall in the near future.

Skill: Analytical

Objective: 2.6 Use financial statement information to analyze a company's profitability, liquidity, asset efficiency, working capital, interest coverage, leverage, valuation, and operating returns

2.7 Financial Reporting in Practice

1) Use of Generally Accepted Accounting Principles (GAAP) and auditors have eliminated the danger of inadvertent or deliberate fraud in financial statements.

Answer: FALSE

Diff: 1 Type: TF

Skill: Conceptual

Objective: 2.7 Understand the main purpose and aspects of the Sarbanes-Oxley reforms following Enron and other financial scandals

2) One way Enron manipulated its financial statements was to sell assets at inflated prices to other firms, while giving a promise to buy back those assets at a later date. The incoming cash was recorded as revenue, but the promise to buy back the assets was not disclosed. Which of the following is one of the ways that such a transaction is deceptive?

- A) The assets should have been listed on the balance sheet as long-term assets.
- B) Cash raised by selling assets should not be recorded as revenue.
- C) The cash raised should have been recorded as short-term loans.
- D) The off balance sheet promises to repurchase assets should have been disclosed in management discussion and analysis (MD&A) or notes to the financial statement.
- E) The promise to buy back the assets should have been listed under accounts payable.

Answer: D

Objective: 2.7 Understand the main purpose and aspects of the Sarbanes-Oxley reforms following Enron and other financial scandals

4) Which of the following describes why Canada's regulation changes following the Enron scandal were less strict than those in the United States?

- A) Canada has a national securities commission that can monitor firms more closely than the SEC in the United States.
- B) The same scale of corporate fraud had yet to be experienced in Canada.
- C) Canadian firms tend to have higher market capitalizations than U.S. firms, and the reporting costs of increased regulation place a greater burden on larger firms.
- D) Canada has a much larger percentage of public firms with a controlling shareholder, and these firms require less oversight than firms without concentrated ownership.
- E) Since Canadian firms report according to IFRS, their financial statements are likely to be more accurate.

Answer: B
