

Final

True/False

1. True or False? Although nurses with undergraduate degrees may be involved in research in some facilities, such as posing a clinical inquiry or assisting with data collection, their basic preparation is aimed primarily at using research in practice.

Ans: True

Complexity: Moderate

Ahead: Roles of the Gerontological Nurse

Subject: Chapter 1

Taxonomy: Analysis

2. True or False? While it is true that various ethnic and racial populations experience different disease burdens, there is growing evidence that this is not a function of genetics but of socioeconomics.

Ans: True

Complexity: Moderate

Ahead: Demographics

Subject: Chapter 2

Taxonomy: Application

3. True or False? The stochastic theories of aging are founded on a programmed perspective that is related to genetics or one's biological clock.

Ans: False

Complexity: Difficult

Ahead: Biological Theories of Aging

Subject: Chapter 3

Taxonomy: Analysis

4. True or False? Although innate immunity allows for the general discernment of self versus nonself, it does not have the ability to recognize a specific antigen.

Ans: True

Complexity: Difficult

Ahead: The Immune System

Subject: Chapter 4

Taxonomy: Analysis

5. True or False? Although the age that presbyopia becomes apparent may vary from person to person, it is expected to affect everyone at some point.

Ans: True

Complexity: Moderate

Ahead: Categories of Normal and Abnormal Barriers to Communication

Subject: Chapter 5

Taxonomy: Analysis
