Manifestations of Culture (Scenario)

Jacob is vice-president of human resources at Z-Mart, a large chain of department stores with 120 locations across Canada. He is developing a short orientation video to help new employees learn about the organization's culture. The video will begin with the story of Z-Mart's founder, Ziggy Zigwig, and how he started the company with one small store in Hamilton in 1960 and eventually built it into a national chain based on a simple philosophy: "cheaper is better." Today, Ziggy's founding values continue to guide employees and managers as they continually look for ways to reduce prices and pass the savings along to customers. Next, the video will discuss the daily Z-Mart chant, and how each morning the store managers lead all the employees in a rousing store anthem that ends with everyone shouting, "CHEAPER IS BETTER! " The chant usually takes place in the comfortable employee lounges located at the back of every store. Finally, the video

will explain some of the key terminology used at Z-Mart. For example, all sales clerks are called "associates," managers are called "partners," and a price reduction is affectionately called a "ziggy" as a nod to the company's founder!

Question: In a short essay, differentiate between the symbolic view and the omnipotent view of management. Include specific examples of each view to support your answer.

Answer:

a. The view of managers as omnipotent is consistent with the stereotypical picture of the take-charge business executive who can overcome any obstacle in carrying out the organization's objectives. This omnipotent view isn't limited to business organizations. It can also be used to help explain the high turnover among college/university and professional sports coaches, who can be considered the "managers" of their teams. Coaches who lose more games than they win are seen as ineffective. They are fired and replaced by new coaches who, it is hoped, will correct the inadequate performance. In the

omnipotent view, when organizations perform poorly, someone has to be held accountable regardless of the reasons why, and in our society, that "someone" is managers. Of course, when things go well, someone needs to be praised. So managers also get the credit—even if they had little to do with achieving positive outcomes.

b. The symbolic view says that a manager's ability to affect outcomes is influenced and constrained by external factors. In this view, it is unreasonable to expect managers to significantly affect an organization's performance. Instead, an organization's results are influenced by factors outside the control of management. These factors include the economy, market changes, governmental policies, competitors' actions, conditions in the particular industry, control over proprietary technology, and decisions made by the previous manager. For example, when Blue Mantle, Home Hardware, and Army and Navy all decided to close in downtown Regina, it was not due to anything that their managers did but instead was due to forces beyond their control.

Question: In a short essay, define organizational culture and discuss the three implications of culture presented in the textbook. Give examples of companies that you feel have strong cultures.

Answer: Organizational culture is a system of shared meaning and beliefs held by organizational members that determines, in large degree, how they act. It represents a common perception held by the organization's members. In every organization, there are systems or patterns of values, symbols, rituals, myths, and practices that have evolved over time. These shared values determine, to a large degree, what employees see, and how they respond to their world. When confronted with problems or work issues, the organizational culture influences what employees can do and how they conceptualize, define, analyze, and resolve these issues.

This definition of culture implies several things. First, culture is a perception. Individuals perceive the organizational culture on the basis of what they see, hear, or experience within the organization. Second, even though individuals may have different backgrounds or work at different organizational levels, they tend to describe the organization's culture in similar terms. That is the shared aspect of culture. Finally, organizational culture is a descriptive term. It's concerned with how members perceive the organization, not with whether they like it. It describes rather than evaluates.

Question: Define environmental uncertainty. Briefly discuss the dimensions of environmental uncertainty and how it impacts managers' work.

Answer: Environmental uncertainty refers to the degree of change and complexity in an organization's environment.

The first dimension of uncertainty is the degree of change. If the components in an organization's environment changes frequently, it is a dynamic environment. If change is minimal, it's a stable one. A stable environment might be one with no new competitors, few technological breakthroughs by current competitors, little activity by pressure groups to influence the organization, and so forth. Degree of change in this case means change that's unpredictable. If change can be accurately anticipated, it's not an uncertainty for managers.

The other dimension of uncertainty describes the degree of environmental complexity, which looks at the number of components in an organization's environment and the extent of the knowledge that the organization has about those components. An organization with fewer competitors, customers, suppliers, government agencies, and so forth faces a less complex and uncertain environment. Organizations deal with environmental complexity in various ways. Complexity is also measured in terms of the knowledge an organization needs about its environment.

Question: In a short essay describe the factors that influence the strength of an organization's culture and discuss the impact of a strong organizational culture on employees and the organization.

Answer: Organizational culture has been described as the shared values, principles, traditions, and ways of doing things that influence the way organizational members act. In most organizations, these shared values and practices have evolved over time.

Factors:

- a. size of the organization
- b. how long it has been around
- c. how much turnover there has been among employees
- d. intensity with which the culture was originated
- e. high agreement regarding what is important

The more employees accept the organization's key values and the greater their commitment to those values, the stronger the culture is. Strong cultures have a greater influence on employees than do weak cultures.

One study found that employees in organizations with strong cultures were more committed to their organization than were employees in organizations with weak cultures. The organizations with strong cultures also used their recruitment efforts and

socialization practices to build employee commitment. And an increasing body of evidence suggests that strong cultures are associated with high organizational performance. It's easy to understand why a strong culture enhances performance. After all, when values are clear and widely accepted, employees know what they're supposed to do and what's expected of them so they can act quickly to take care of problems, thus preventing any potential performance decline. However, the drawback is that the same strong culture also might prevent employees from trying new approaches especially during periods of rapid change.

Question: How is culture transmitted to employees of an organization? In a short essay, explain the four primary forms of transmission and provide an example of each.

Answer: Culture is transmitted to employees in a number of ways. The most significant are stories, rituals, material symbols, and language.

- a. *Stories*: Organizational "stories" typically contain a narrative of significant events or people including such things as the organization's founders, reactions to past mistakes, and so forth. For instance, managers at Nike feel that stories told about the company's past help shape the future. Whenever possible, corporate "storytellers" (senior executives) explain the company's heritage and tell stories that celebrate people getting things done.
- b. *Rituals*: Corporate rituals are repetitive sequences of activities that express and reinforce the values of the organization, what goals are most important, and which people are important. The "Passing of the Pillars" is an important ritual at Boston Scientific's facility near Minneapolis, for example. When someone has a challenging and tough project or assignment, they're "awarded" a small two-foot high plaster-of-Paris pillar to show that they've got support from all their colleagues.
- c. *Material Symbols*: Material symbols convey to employees who is important, the degree of equality desired by top management, and the kinds of behavior that are expected and appropriate. Examples of material symbols include the layout of an organization's facilities, how employees dress, the types of automobiles provided to top executives, and the availability of corporate aircraft. At WorldNow, a provider of Internet technology to local media companies, an important material symbol is an old dented drill that the founders purchased for \$2 at a thrift store. The drill symbolizes the company's culture of "drilling down to solve problems."
- d. *Language*: Many organizations and units within organizations use language as a way to identify and unite members of a culture. By learning this language, members attest to their acceptance of the culture and their willingness to help preserve it. For instance, Microsoft employees have their own unique vocabulary: the term work judo is used to mean "the art of deflecting a work assignment to someone else without making it appear that you're avoiding it."

Question: In a short essay describe how creating an ethical, innovative and customer-responsive culture impacts the manager's job.

Answer:

Strong cultures support high ethical standards and have a positive influence on employee behaviour. A culture most likely to shape high ethical standards is one where managers support high risk tolerance, low to moderate aggressiveness, and focus on means as well as outcomes. In such cultures managers must be visible role models and communicate ethical expectations.

Creative an innovative culture requires managers to provide employees with challenge and involvement, freedom, trust and openness, idea time, playfulness, proper conflict resolution, debates and opportunities for risk-taking.

A customer-responsive culture starts with employee selection and training. The six characteristics of a successful, customer-responsive culture support outgoing and friendly employees, focus less on rigid rules, procedures and regulations, use empowerment, promote good listening skills, ensure role clarity and make sure employees are attentive to customer needs. Managers need to communicate the elements of the culture and model the appropriate behaviours as well as provide support for employees to carry out the new actions.
