

Chapter 02

Management Theory: Essential Background for the Successful Manager

True / False Questions

1. During a manager's meeting, Paula, a district manager, discussed how to handle sensitive employee issues, and indicated correctly that management is really just an art.

True False
2. Supporters of evidence-based management would say there are many really new ideas.

True False
3. Jeffrey Pfeffer and Robert Sutton believed that evidence-based management is based on the belief that facing the hard facts about what works and having to accept the nonsense that passes for sound advice will help organizations perform better.

True False
4. Peter Drucker, a famous 19th-century socialist, opposed capitalism and many current business theories.

True False
5. Evidence-based management is based on the belief that understanding the sound complete truths of conventional managerial wisdom and accepting much of the nonsense that often passes for sound advice can at times help organizations perform better.

True False
6. The contemporary perspective of management includes three viewpoints: systems, contingency, and quality management.

True False
7. The historical perspective of management includes three viewpoints—systems, contingency, and quality management.

True False

8. Understanding theoretical perspectives of management will help you understand why some practices are still favored, whether for right or wrong reasons.
- True False
9. Studying theoretical perspectives of management can help a manager in many ways, but seldom provides new ideas in new situations.
- True False
10. Ali, a CEO of a large IT organization, understands that many challenges are coming in his industry; therefore, he tells his upper-level management that it's helpful to look at theoretical perspectives of management to help make predictions and develop principles to guide future company strategies and actions.
- True False
11. Donna, the president of a national restaurant chain, believes that studying theoretical perspectives of management seldom gives clues to the meaning of outside events that could affect her company.
- True False
12. The classical viewpoint of management emphasized ways to manage work more efficiently.
- True False
13. The behavioral viewpoint of management emphasized the importance of encouraging employees to work more efficiently.
- True False
14. The systems viewpoint of management regards the organization as systems of interrelated parts that operate together to achieve a common purpose.
- True False
15. Scientific management focused on ways to improve worker morale.
- True False
16. By identifying the "therbligs" in a job, such as the supplies of a bricklayer, Frank and Lillian Gilbreth were able to eliminate costs while simultaneously reducing supplies wasted.
- True False

17. When managing her company, Priya, the owner of ABC Manufacturing, utilizes the behavioral viewpoint of management, which emphasizes ways to manage work more efficiently.

True False

18. Don, a restaurant manager and MBA student, was reflecting on a how he can apply the classical management viewpoint in his store from a recent class, which supposes his employees are rational in their decisions.

True False

19. Susan, a department manager, believes that since the corporate office eliminated certain benefits to reduce costs, her employees have not been working as hard as in the past. This reduction in effort is known as "soldiering."

True False

20. Scientific management emphasized the scientific study of work methods to improve the productivity of individual workers.

True False

21. Motion studies broke down each worker's job into basic physical motions and then trained workers to use the methods of their best-performing coworkers.

True False

22. Joe, a plant manager, was interested in utilizing the differential rate system of scientific management in his factory because it suggested paying workers less to cut costs when production first increased.

True False

23. Paul, an MBA student and small-business owner, is interested in implementing the administrative management approach because this method of management focuses on improving employee morale.

True False

24. According to Fayol, the major functions of management are planning, monitoring, leading, and motivating.

True False

25. Max Weber felt that bureaucracy is irrational, inefficient, and not ideal for organizations.

True False

26. In our time, the word *bureaucracy* has come to have negative associations: impersonality, inflexibility, red tape, and a molasses-like response to problems.

True False

27. A problem with the classical viewpoint is that it does not consider overall company and global problems and goals.

True False

28. Carmakers have broken down automobile manufacturing into its basic tasks, such as on an assembly line, because the application of scientific methods and job specialization boosts productivity.

True False

29. The behavioral viewpoint emphasized the importance of understanding human behavior and of motivating employees toward achievement.

True False

30. The behavioral viewpoint emphasized the importance of understanding human behavior and increasing diversity.

True False

31. Ann, an industrial psychologist, has been studying Hugo Munsterberg's beliefs of human behavior in the workplace because she feels his principles could contribute to her industry, namely to determine which people are best suited to specific jobs, to identify the psychological conditions under which employees do their best work, and devise management strategies to influence employees to follow management's interests.

True False

32. Mary Parker Follett believed that organizations should be under heavy management control, with managers resolving conflicts and controlling the work process.

True False

33. Don, a production manager, has decided to utilize the Hawthorne effect in his facility because studies have shown that this theory will increase production by giving more independence to employees as they receive less attention.

True False

34. The Hawthorne studies succeeded in drawing attention to the importance of "social man" and how managers using good human relations could improve worker productivity.

True False

35. The human relations movement proposed that better rules and procedures could increase worker productivity.

True False

36. Abraham Maslow said that all needs are equal in importance and need to be satisfied daily.

True False

37. Umar, a general manager in a fast-food chain, has employees all under the age of 25, and most of his workers are good employees. However, Umar still believes his workers are irresponsible and lack ambition. Umar is a Theory X manager.

True False

38. Olde Manufacturing, a parts supplier to the auto industry, has been using the behavioral approach to management for over 100 years. However, since that method of management is too simplistic for practical use, Olde should begin implementing the newer and more sophisticated human relations movement approach to management.

True False

39. Behavioral science relies on data from past sales to determine forecasts regarding human behavior to develop strategic plans and goals.

True False

40. When the Americans entered the war in 1941, they used the British model to form operations research teams to determine how to deploy troops, submarines, and equipment most effectively. These techniques have evolved into quantitative management.

True False

41. Quantitative management is the sales management theory related to determining if a prospective customer really qualifies for the company's product or service.

True False

42. Management science focuses on using behavioral techniques to aid in problem solving and decision making.

True False

43. Operations management focuses on managing the production and delivery of an organization's products or services more effectively.

True False

44. Through the rational management of resources and distribution of goods and services, scientific management helps ensure that business operations are efficient and effective.

True False

45. The just-in-time approach, which comes under the term *lean management*, allows organizations to obtain supplies from vendors only as they are needed in the factory.

True False

46. A system is an organization's method of determining if employees succeed.

True False

47. Outputs are the products, services, profits, losses, employee satisfaction or discontent, and the like that are produced by the organization.

True False

48. The five parts of a system are inputs, outputs, transformational processes, monitoring, and feedback.

True False

49. The customers of Best Auto Sales complete an online survey after purchasing an automobile from Best. The information from the customer survey is a form of feedback.

True False

50. An open system continually interacts with its environment, so it receives feedback from the outside environment.

True False

51. Right Office Equipment continually talks with customers after they purchase their products, and Right Office managers regularly visit customers to gather feedback on new products, product improvements, and how Right Office can better serve their customers. This is an example of an open system.

True False

52. In a fixed-learning system, company employees typically will participate in continuous learning, such as workshops on product improvements, more often than in organizations with an open system.

True False

53. The contingency viewpoint emphasizes that a manager's approach should vary according to—that is, be contingent on—costs and competition.

True False

54. Many times when working with a new manager, Amy, a successful small-business owner, asks the manager, "What management method do you think will work best in this situation?" In this situation, Amy is utilizing the scientific management approach.

True False

55. Gary Hamel of the Management Innovation Lab suggests that core beliefs about an organization can be rooted out by repeatedly asking the right questions, such as, "Is this a belief worth challenging?" or "Is this belief universally valid?"

True False

56. When Mr. Jones, the owner of a local hardware store, asks one of his lawnmower suppliers about the total ability of their product to meet customer needs, he is questioning the quality of that mower.

True False

57. Quality is seen as one of the most important ways of adding value to products and services, thereby distinguishing them from those of competitors.

True False

58. A-Plus Manufacturing has a policy of using statistical sampling to locate errors by testing just some (rather than all) of the items in a particular production run. This strategy of minimizing errors is known as synergy.

True False

59. Quality assurance focuses on the performance of workers, urging employees to strive for "minimal defects."

True False

60. W. Edwards Deming and Joseph M. Juran were pioneers of the quality-management movement.
- True False
61. With TQM, it is vital that organizations listen to and learn from their customers and employees and make continuous improvement a priority.
- True False
62. A local furniture retailer routinely develops and acquires new knowledge, and the employees communicate what they learn to other employees, so the company is able to modify its behavior to reflect what they have learned. This organization is an example of a learning organization.
- True False
63. The five ingredients of a learning organization are acquiring knowledge, training, studying knowledge, pondering, and monitoring employees.
- True False
64. To develop a learning organization, managers must build a commitment to learning, work to generate ideas with impact, and work to generalize ideas with impact.
- True False

Multiple Choice Questions

65. The beliefs that there are few really new ideas and that true is better than new are two of the foundational principles of ____.
- A. scientific management
 - B. the quality-management viewpoint
 - C. evidence-based management
 - D. behavioral management
 - E. MBO

66. When faced with a business problem, Sally, a young grocery store owner, discusses business problems with Don, the assistant manager and an employee for over 30 years. Sally believes Don "has seen it all" and knows there are few really new ideas; plus the business has done many simple things, such as offering friendly service, to have a competitive edge. This is an example of _____ management.
- A. evidence-based
 - B. behavioral
 - C. family-style
 - D. contingency
 - E. bottom-up
67. The historical perspective includes three viewpoints: _____.
- A. systems, contingency, quality management
 - B. classical, scientific, quantitative
 - C. classical, operations, scientific
 - D. contemporary, historical, scientific
 - E. classical, behavioral, quantitative
68. Within his company, Greg has set up a system with inputs, outputs, transformation processes, and feedback. Within his organization he utilizes a management style that varies according to the individual and environmental situation, with a strategy for minimizing errors by managing each stage of production. Greg is utilizing a _____ perspective.
- A. historical
 - B. classical
 - C. qualitative
 - D. contemporary
 - E. behavioral
69. Wanda, a CEO, has been encouraging her managers to study and utilize theoretical perspectives of management because this approach _____.
- A. is an effective cost-reduction tool
 - B. emphasizes diversity
 - C. is an effective synergy-building approach
 - D. builds a strong family-type culture
 - E. provides clues to the meaning of your managers' decisions

70. The classical viewpoint of management emphasized ways to ____.
- A. manage work more efficiently
 - B. build more synergy
 - C. vary according to the environment
 - D. include MBO
 - E. increase diversity
71. Mateo, an IT manager, has been studying the work methods of each task to increase the productivity of the employees in his department. Mateo is utilizing ____.
- A. synergy
 - B. management science
 - C. behaviorism
 - D. the Hawthorne effect
 - E. scientific management
72. The 17 basic units of motion, identified by Frank and Lillian Gilbreth, were named ____.
- A. gilbreths
 - B. time frames
 - C. therbligs
 - D. units
 - E. action works
73. Amy is a package delivery service manager. She is interested in implementing the management philosophy pioneered by Frederick W. Taylor and Frank and Lillian Gilbreth, which scientifically studies work methods to improve the productivity of individual workers, known as ____.
- A. human relations management
 - B. scientific management
 - C. quantitative management
 - D. contingency management
 - E. management science

74. Susan, a movie theater manager, has observed that as workers feel some company policies are not fair, the employees have not been working as hard as in the past. This reduction in effort is known as ____.

- A. sliding
- B. soldiering
- C. skimming
- D. entitling
- E. slipping

75. Sal, a production manager, knows that some of his employees are upset with the new corporate policy, and as a result, are participating in soldiering. To eliminate soldiering Sal can ____.

- A. reduce the use of scientific principles in planning work methods
- B. carefully select workers according to their abilities and give workers training
- C. reduce training, but increase MBO
- D. place workers in any task available, focusing on their interests and not their abilities
- E. increase diversity and MBO

76. A pay structure, in which more efficient workers earn higher wages, as suggested by Frederick W. Taylor, is known as a(n) ____ system.

- A. scale
- B. increasing wage
- C. differential rate
- D. wide wage
- E. merited pay

77. The father of scientific management is ____.

- A. Frank Gilbreth
- B. Tom Gallagher
- C. Abraham Maslow
- D. Peter Drucker
- E. Frederick Taylor

78. Tom, the manager of floral shop, is interested in implementing the principles of administrative management, which involves ____.
- A. doing time-motion studies
 - B. focusing on unprofitable parts of an organization
 - C. increasing synergy
 - D. managing the total organization
 - E. implementing MBO
79. To better meet corporate goals this year, Donna, a CEO, is encouraging her managers to focus on the major functions of management, which include ____.
- A. planning, organizing, recruiting, monitoring, delegating
 - B. recruiting, monitoring, delegating, coordinating
 - C. planning, organizing, leading, controlling, arbitrating
 - D. recruiting, planning, organizing, leading
 - E. planning, organizing, leading, controlling
80. Because there are some positive aspects of bureaucracy, as proposed by Max Weber, Tammy, a restaurant manager, is interested in implementing certain aspects of the bureaucratic approach to management within her restaurant. Like Weber, Tammy feels bureaucracy is a ____.
- A. rational, efficient, cost-cutting tool based on principles of behaviorism
 - B. sales-generating tool
 - C. rational, efficient method of increasing diversity
 - D. rational, efficient, ideal organization based on principles of logic
 - E. rational, cost-cutting, efficient organization based on principles of synergy
81. The management approach that emphasized ways to manage work more efficiently is the ____ viewpoint.
- A. classical
 - B. quality-management
 - C. systems
 - D. contingency
 - E. MBO

82. While discussing approaches to boost organization productivity, Rene, the president of an auto manufacturer, was interested in a rational approach that through the application of scientific methods, time and motion studies, and job specialization found it is possible to increase productivity. This is the essence of the ____ viewpoint.

- A. contingency
- B. behavioral
- C. MBO
- D. systems
- E. classical

83. Greg, the IT manager, feels that his employees lack the motivation to consistently meet department goals; therefore, the approach Greg and his supervisors need to take to better understand human actions to motivate their employees toward achievement is the ____ viewpoint.

- A. synergy
- B. attitude
- C. behavioral
- D. classical
- E. scientific

84. The behavioral viewpoint developed over the following phases: ____.

- A. early behaviorism, human relations movement, scientific management
- B. operations management, human relations movement, MBO phase
- C. early behaviorism, human relations movement, behavioral science
- D. early behaviorism, industrial, human relations movement
- E. early behaviorism, human relations movement, administrative phase

85. Hugo Munsterberg was known as ____.

- A. the father of scientific management
- B. a pioneer of scientific management
- C. the father of MBO
- D. the father of industrial psychology
- E. the originator of sociology

86. Thomas has been studying Hugo Munsterberg's suggestions, and like Munsterberg, Thomas believes that psychologists can contribute to industry by ____.
- A. developing strategies to influence employees to follow their interests
 - B. encouraging employees to develop new products
 - C. devising management strategies to influence employees to follow management's interests
 - D. helping organizations increase diversity
 - E. helping companies increase efficiency and productivity
87. That organizations should be operated as "communities," with managers and subordinates working together in harmony, is one of the proposals of ____.
- A. Adam Smith
 - B. Frank Gilbreth
 - C. Hugo Munsterberg
 - D. Mary Parker Follett
 - E. Max Weber
88. Mary Parker Follett anticipated some of today's concepts, such as ____.
- A. worker empowerment and scientific management
 - B. self-managed teams and worker empowerment
 - C. quality assurance and transformation processes
 - D. management-lead teams and diversity
 - E. synergy and MBO
89. A large production company has been utilizing the Hawthorne effect in its 12 international factories, and it has seen great success from implementing the Hawthorne principles that propose that ____.
- A. giving less attention to employees increases worker productivity
 - B. increasing diversity results in increases in worker productivity
 - C. increasing synergy increases worker productivity
 - D. cutting costs through outsourcing harms employee morale and productivity
 - E. giving more attention to employees increases worker productivity, if they think managers care about them

90. Abraham Maslow proposed the ____.

- A. hierarchy of human needs
- B. Hawthorne effect
- C. hierarchy of production
- D. self-managed teams
- E. worker empowerment theory

91. Maslow's hierarchy of human needs included ____.

- A. physiological, financial, love, esteem, self-actualization
- B. financial, love, friends, self-actualization
- C. food and shelter, companionship, ego, self-actualization
- D. physiological, safety, love, esteem, self-actualization
- E. physiological, financial, love, empowerment

92. Olivia, the general manager of a bowling center, believes in her workers and that they are responsible and capable employees, so that they can be trusted when given responsibility. Olivia is an example of a(n) ____ manager.

- A. Theory Z
- B. hierarchy
- C. Theory X
- D. accountable
- E. Theory Y

93. George, who owns a small grocery store, has a reputation in the community as a tough manager. Many customers have heard George yell at his employees because he feels that workers today are lazy, lack ambition, and hate to work. George is a(n) ____ manager.

- A. Theory Z
- B. hierarchy
- C. Theory X
- D. accountable
- E. Theory Y

94. Behavioral science relies on scientific research for developing theories about human behavior that can be ____.
- A. used to provide sales tools
 - B. used in behavioral science research
 - C. helpful when looking at competitive products
 - D. used to provide practical tools for managers
 - E. used to establish MBO goals
95. The field of behavioral science includes ____.
- A. psychology, sociology, forensic science, economics
 - B. psychology, forensic science, sociology, anthropology, economics
 - C. psychiatry, technology, environmental science, forensic science
 - D. chemistry, biology, earth science, management
 - E. psychology, sociology, anthropology, economics
96. The example in the textbook of Paul English of Kayak.com altering an existing open-office seating arrangement by using new employees to change existing seating patterns is an example of ____.
- A. the hostility effect
 - B. the office politics approach
 - C. behavioral science research
 - D. synergy research
 - E. a Theory X method
97. Gabriel, the CEO of a large global production company, is excited about the introduction of statistics and computer simulations in the design stage of their products. This is an example of ____.
- A. the design approach
 - B. quantitative techniques
 - C. MBO
 - D. scientific management
 - E. behavioral management

98. Management science stresses the use of rational, science-based techniques and mathematical models to improve ____.

- A. decision making and goal setting
- B. synergy
- C. cost-cutting and planning
- D. decision making and strategic planning
- E. sales and customer relationships

99. The new chief information officer of a national pizza chain is using mathematical tools to aid in product ordering and scheduling decisions; this is an example of ____.

- A. statistical management
- B. scientific management
- C. behavioral science
- D. management science
- E. goal management

100 Operations management focuses on managing the production and delivery of an organization's products or services ____.

- A. more economically
- B. by utilizing motion studies
- C. with a more diverse workforce
- D. more effectively
- E. to more customers

101 A computer manufacturer is seeking to cut costs by designing an inventory system that reduces the number of finished products in stock due to overproduction and to set in place a production schedule that better matches customers' orders. This is an example of ____.

- A. operations management
- B. scientific management
- C. production management
- D. inventory oversight
- E. inventory analysis

102 The contemporary perspective consists of three viewpoints: ____.

- A. quality management, behavioral, customer
- B. systems, scientific, contingency
- C. systems, contingency, quality management
- D. diversity, quantitative, qualitative
- E. contemporary, non-contemporary, behavioral

103 The systems viewpoint sees organizations as entities made up of interrelated parts known as ____.

- A. planning, design, monitoring, production, feedback
- B. planning, inputs, monitoring, outputs, feedback
- C. inputs, outputs, transformation processes, feedback
- D. planning, design, inputs, monitoring, outputs, follow-up feedback
- E. vision, planning, design, production, monitoring, follow-up feedback

104 The Jones family had a fire that destroyed their home. Various departments of a restoration company, from the initial cleanup crew to the assistance with the Jones family moving back in, worked together to achieve this goal. This is an example of a(n) ____.

- A. process
- B. stepped process
- C. input-output structure
- D. structure
- E. system

105 A local farmer grows and sells tomatoes and beans to the local grocers. Using the systems viewpoint, The tomatoes, beans and profits that are earned from the sales are known as a(n) ____.

- A. input
- B. therblig
- C. transformational process
- D. result
- E. output

106 Donna, a chef in a fine restaurant, utilizes top-of-the-line equipment as she prepares meals for customers. Donna and her equipment are a(n) _____ in the restaurant's system.

- A. cog
- B. piece
- C. output-participant
- D. output
- E. input

107 The systems viewpoint regards parts making up the whole system as ____.

- A. microsystems
- B. macrosystems
- C. subsystems
- D. management collections
- E. organizational sets

108 When a line cook in a restaurant cooks a raw hamburger to become part of the Super Burger Special, this is an example of a ____.

- A. transformation process
- B. conversion process
- C. metamorphosis
- D. turning point
- E. therblig

109 When the sales of a certain brand of diet soda slowed, a national grocery retailer decided to drop the price of that product, which resulted in a large increase in sales of the soda. This sales increase is a type of ____.

- A. Big Data
- B. input
- C. quality control
- D. outcry
- E. feedback

110 Right Motors calls its customers after they purchase an automobile from the dealership. In addition, every year customers are asked to complete a short survey about the car they purchased from Right and the dealer's service. This is an example of a(n) ____ system.

- A. open
- B. closed
- C. open-door
- D. environmental
- E. ongoing

111 For years ABC Copier, a copier machine supplier, enjoyed strong sales and a huge share of the copier market, far ahead of its competition. However, over the years, ABC seldom asked customers for feedback. So when some of ABC's competition responded to what customers need and started offering copiers with new technology, ABC lost much of its market share. ABC utilizes a(n) ____ system.

- A. open
- B. isolated
- C. blind
- D. internal
- E. closed

112 The American economy consists of a complex combination of organizations and variables, such as countless companies differing in size and what they market, current events, and markets such as housing. All of these independent factors often behave as a single unit based on events and economic news, and respond to the environment and affect the stock market. This is an example of ____.

- A. complexity theory
- B. a closed market system
- C. a market web
- D. contingency theory
- E. behavioral theory

113 When Cheyanne, the manager, was discussing a difficult competitive problem with the owner, she asked, "What management approach do you think will work best in this situation?" Asking this question to determine a solution is utilizing ____.

- A. the devil's advocate method
- B. scientific management
- C. the synergy method
- D. the contingency viewpoint
- E. the diversity viewpoint

114 When a manager assesses a particular situation and decides what to do according to the individual and environmental situation, the manager is utilizing the ____ viewpoint.

- A. behavioral
- B. systems
- C. scientific
- D. flexibility
- E. contingency

115 Gary Hamel suggests we need to look at management as a process and then make improvements and innovation ____.

- A. intuitively
- B. only if it results in synergy
- C. ongoing and systematic
- D. only if it saves money
- E. occasionally

116 The management of XYZ Manufacturing is implementing a plan to minimize production mistakes by allowing teams that work in each area of the production facility to develop a plan and then monitor their area to ensure the reduction of errors. This is an example of ____.

- A. efficiency monitoring
- B. quality control
- C. innovative planning
- D. the minimal defect approach
- E. JIT

117 The management of a facility that manufactures parts for car brakes has a policy of testing only some of the items in each production run to locate errors. This is an example of the _____ technique.

- A. zero defects
- B. minimal defects
- C. JIT
- D. quality focus
- E. quality control

118 After returning home from a trade show, Mr. Jones, the president of a manufacturing company, spoke to his employees in a production meeting about a new approach that should increase their production bonus by improving their performance. To do so, Mr. Jones discussed a goal of "zero defects." This is an example of _____.

- A. quality assurance
- B. constancy of purpose
- C. redesign
- D. scientific management
- E. the total quality movement

119 The belief that quality stemmed from "constancy of purpose," and that managers should stress teamwork, be helpful rather than simply give orders, and make employees feel comfortable about asking questions was proposed by _____.

- A. Frank and Lillian Gilbreth
- B. Henri Fayol
- C. Max Weber
- D. Mary Parker Follett
- E. W. Edwards Deming

120 Joseph Juran defined *quality* as "fitness for use," which meant that _____.

- A. a product or service should be priced competitively
- B. an organization should produce products that will help customers stay healthy
- C. companies should focus on products that help the community
- D. products should be very durable
- E. a product or service should satisfy a customer's real needs

121 To gain a competitive edge this year, the upper management of a global IT company has decided to focus on customer service, employee training, and continuous quality improvement. This approach is known as _____.

- A. customer focus
- B. total quality management (TQM)
- C. evidence-based management
- D. competitive edging
- E. constancy of purpose

122 A successful daycare center continuously focuses on actively developing, finding, and then communicating to its employees any new information and approaches related to its business of child care so that workers can modify their behavior to reflect this new knowledge. These types of companies are called _____ organizations.

- A. customer-focused
- B. learning
- C. research
- D. evolving
- E. 360-degree

123 Dominique, an executive chef in a large hotel, recently attended a training conference sponsored by several top professionals in his field, where he learned numerous ways his restaurant and hotel can better serve customers. Dominique is excited that management asked him to present this information to the hotel staff so the restaurant and hotel can make needed improvements. Dominique's hotel is a(n) _____ organization.

- A. focused
- B. learning
- C. evolving
- D. customer-focused
- E. 360-degree

124 An organization in which the management builds a commitment to learning, works to generate ideas with impact, and works to generalize ideas with impact is creating a(n) _____.

- A. focused organization
- B. learning organization
- C. evolving atmosphere
- D. customer-focused organization
- E. 360-degree training structure

Essay Questions

125 Explain *soldiering*. Describe the four principles of science that Frederick Taylor believed managers could use to eliminate soldiering.

126 Explain the five positive bureaucratic features that Max Weber believed contributed to a better-performing organization.

127 Articulate why the classical viewpoint is important. Give an example.

128 Explain the three ways Hugo Munsterberg believed psychologists could contribute to industry.

.

129 Explain one of Mary Parker Follett's ideas on how organizations should become more democratic. Give an example.

.

130 Describe the Hawthorne effect. Explain the flaws in the studies.

.

131 Contrast Theory X and Theory Y. Explain why both theories are important.

.

132 Describe the four parts of a system.

.

133 Compare an open and closed system.

.

134 Explain the contingency viewpoint. Give an example.

.

135 Summarize total quality management.

.

136 Define *learning organization*. Summarize the three parts of a learning organization.

.

Chapter 02 Management Theory: Essential Background for the Successful Manager **Answer Key**

True / False Questions

1. During a manager's meeting, Paula, a district manager, discussed how to handle sensitive employee issues, and indicated correctly that management is really just an art.

FALSE

Certainly management can be an art. Great managers, like great painters or actors, have the right mix of intuition, judgment, and experience. But management is also a science. That is, rather than being performed in a seat-of-the-pants, make-it-up-as-you-go-along kind of way which can lead to big mistakes, management can be approached deliberately, rationally, and systematically.

*AACSB: Analytical Thinking
Accessibility: Keyboard Navigation
Blooms: Understand
Difficulty: 2 Medium*

*Learning Objective: 02-06 In the end, is there one best way to manage in all situations?
Topic: Evidence-based management*

2. Supporters of evidence-based management would say there are many really new ideas.

FALSE

Evidence-based management is based on three truths, one of which is that there are few really new ideas. Most supposedly new ideas are old, wrong, or both.

*AACSB: Analytical Thinking
Accessibility: Keyboard Navigation
Blooms: Understand
Difficulty: 2 Medium*

*Learning Objective: 02-06 In the end, is there one best way to manage in all situations?
Topic: Evidence-based management*

3. Jeffrey Pfeffer and Robert Sutton believed that evidence-based management is based on the belief that facing the hard facts about what works and having to accept the nonsense that passes for sound advice will help organizations perform better.

FALSE

Stanford business scholars Jeffrey Pfeffer and Robert Sutton stated that evidence-based management is based on the belief that "facing the hard facts about what works and what doesn't, understanding the dangerous half-truths that constitute so much conventional wisdom about management, and rejecting the total nonsense that too often passes for sound advice will help organizations perform better."

Blooms: Remember
Difficulty: 1 Easy*

*Learning Objective: 02-08 Organizations must learn or perish. How do I build a learning organization?
Topic: Learning organization*

64. To develop a learning organization, managers must build a commitment to learning, work to generate ideas with impact, and work to generalize ideas with impact.

TRUE

As a manager, you need to try to generate ideas with impact, those that add value for customers, employees, and shareholders, by increasing employee competence through training, experimenting with new ideas, and engaging in other leadership activities. Besides generating ideas with impact, you can also generalize them, or reduce the barriers to learning among employees and within your organization.

Multiple Choice Questions

65. The beliefs that there are few really new ideas and that true is better than new are two of the foundational principles of ____.

A. scientific management
B. the quality-management viewpoint
C. evidence-based management
D. behavioral management
E. MBO

Evidence-based management is based on three truths: there are few really new ideas, true is better than new, and doing well usually dominates.

*AACSB: Analytical Thinking

Blooms: Understand
Difficulty: 2 Medium*

*Learning Objective: 02-06 In the end, is there one best way to manage in all situations?
Topic: Evidence-based management*

66. When faced with a business problem, Sally, a young grocery store owner, discusses business problems with Don, the assistant manager and an employee for over 30 years. Sally believes Don "has seen it all" and knows there are few really new ideas; plus the business has done many simple things, such as offering friendly service, to have a competitive edge. This is an example of _____ management.

A. evidence-based
B. behavioral
C. family-style
D. contingency
E. bottom-up

Evidence-based management means translating principles based on best evidence into organizational practice, bringing rationality to the decision-making process.

Difficulty: 3 Hard*

*Learning Objective: 02-06 In the end, is there one best way to manage in all situations?
Topic: Evidence-based management*

67. The historical perspective includes three viewpoints: _____.

- A. systems, contingency, quality management
- B. classical, scientific, quantitative
- C. classical, operations, scientific
- D. contemporary, historical, scientific
- E. classical, behavioral, quantitative**

The historical perspective includes three viewpoints: classical, behavioral, and quantitative.

AACSB: Analytical Thinking
Accessibility: Keyboard Navigation
Blooms: Remember
Difficulty: 1 Easy

Learning Objective: 02-01 What's the payoff in studying different management perspectives, both yesterday's and today's?
Topic: Management Styles

68. Within his company, Greg has set up a system with inputs, outputs, transformation processes, and feedback. Within his organization he utilizes a management style that varies according to the individual and environmental situation, with a strategy for minimizing errors by managing each stage of production. Greg is utilizing a _____ perspective.

- A. historical
- B. classical
- C. qualitative
- D. contemporary**
- E. behavioral

The contemporary perspective includes three viewpoints: systems, contingency, and quality management: the *systems* viewpoint sees organizations as a system, either open or closed, with inputs, outputs, transformation processes, and feedback. The *contingency* viewpoint emphasizes that a manager's approach should vary according to the individual and environmental situation. The *quality-management viewpoint* has two traditional approaches: *quality control*, the strategy for minimizing errors by managing each stage of production, and *quality assurance*, which focuses on the performance of workers, urging employees to strive for zero defects.

AACSB: Knowledge Application

Learning Objective: 02-02 If the name of the game is to manage work more efficiently, what can the classical viewpoint teach me?

Topic: Scientific management

75. Sal, a production manager, knows that some of his employees are upset with the new corporate policy, and as a result, are participating in soldiering. To eliminate soldiering Sal can ____.

- A. reduce the use of scientific principles in planning work methods
- B. carefully select workers according to their abilities and give workers training**
- C. reduce training, but increase MBO
- D. place workers in any task available, focusing on their interests and not their abilities
- E. increase diversity and MBO

Taylor believed that managers could eliminate soldiering by applying four principles of science: (1) evaluate a task by scientifically studying each part of the task (not use old rule-of-thumb methods); (2) carefully select workers with the right abilities for the task; (3) give workers the training and incentives to do the task with the proper work methods; and (4) use scientific principles to plan the work methods and ease the way for workers to do their jobs.

Topic: Open system*

111. For years ABC Copier, a copier machine supplier, enjoyed strong sales and a huge share of the copier market, far ahead of its competition. However, over the years, ABC seldom asked customers for feedback. So when some of ABC's competition responded to what customers need and started offering copiers with new technology, ABC lost much of its market share. ABC utilizes a(n) ____ system.

A. open
B. isolated
C. blind
D. internal
E. closed

A closed system has little interaction with its environment; that is, it receives very little feedback from the outside. The classical management viewpoint often considered an organization a closed system. So does the management science perspective, which simplifies organizations for purposes of analysis. However, any organization that ignores feedback from the environment opens itself up to possibly spectacular failures.

Topic: Closed system

112. The American economy consists of a complex combination of organizations and variables, such as countless companies differing in size and what they market, current events, and markets such as housing. All of these independent factors often behave as a single unit based on events and economic news, and respond to the environment and affect the stock market. This is an example of ____.

A. complexity theory
B. a closed market system
C. a market web
D. contingency theory
E. behavioral theory

The systems viewpoint has led to the development of complexity theory, the study of how order and pattern arise from very complicated, apparently chaotic systems. Complexity theory recognizes that all complex systems are networks of many interdependent parts that interact with each other according to certain simple rules.

113. When Cheyanne, the manager, was discussing a difficult competitive problem with the owner, she asked, "What management approach do you think will work best in this situation?" Asking this question to determine a solution is utilizing ____.
- A. the devil's advocate method
 - B. scientific management
 - C. the synergy method
 - D. the contingency viewpoint**
 - E. the diversity viewpoint

The contingency viewpoint emphasizes that a manager's approach should vary according to, or be contingent on, the individual and the environmental situation.

118. After returning home from a trade show, Mr. Jones, the president of a manufacturing company, spoke to his employees in a production meeting about a new approach that should increase their production bonus by improving their performance. To do so, Mr. Jones discussed a goal of "zero defects." This is an example of _____.

A. quality assurance
B. constancy of purpose
C. redesign
D. scientific management
E. the total quality movement

Developed in the 1960s, quality assurance focuses on the performance of workers, urging employees to strive for zero defects. Quality assurance has been less successful because often employees have no control over the design of the work process.

Essay Questions

125. Explain *soldiering*. Describe the four principles of science that Frederick Taylor believed managers could use to eliminate soldiering.

Soldiering could be called "underachieving," or "loafing," or what Taylor called deliberately working at less than full capacity. Taylor believed that managers could eliminate soldiering by applying four principles of science: (1) evaluate a task by scientifically studying each part of the task (not use old rule-of-thumb methods); (2) carefully select workers with the right abilities for the task; (3) give workers the training and incentives to do the task with the proper work methods; and (4) use scientific principles to plan the work methods and ease the way for workers to do their jobs.

127. Articulate why the classical viewpoint is important. Give an example.

The essence of the classical viewpoint was that work activity was amenable to a rational approach, that through the application of scientific methods, time and motion studies, and job specialization it was possible to boost productivity. The textbook gives the example of how these concepts are still in use today, the results visible to you every time you visit McDonald's or Pizza Hut. The classical viewpoint also led to innovations such as management by objectives (MBO) and goal setting.

129. Explain one of Mary Parker Follett's ideas on how organizations should become more democratic. Give an example.

Mary Parker Follett believed organizations can become more democratic with managers and employees working cooperatively. Some of her most important ideas on how organizations can become more democratic are (1) organizations should be operated as "communities," with managers and subordinates working together in harmony; (2) conflicts should be resolved by having managers and workers talk over differences and find solutions that would satisfy both parties—a process she called integration; and (3) the work process should be under the control of workers with the relevant knowledge, rather than of managers, who should act as facilitators.

130. Describe the Hawthorne effect. Explain the flaws in the studies.

The Hawthorne effect proposed that employees worked harder if they received added attention, if they thought that managers cared about their welfare and that supervisors paid special attention to them. However, later investigators found flaws in the studies, such as variations in ventilation and lighting or inadequate follow through, that were overlooked by the original researchers. Critics also point out that it's doubtful that workers improved their productivity merely on the basis of receiving more attention rather than because of a particular instructional method or social innovation.

131. Contrast Theory X and Theory Y. Explain why both theories are important.

Theory X represents a pessimistic, negative view of workers. In this view, workers are considered to be irresponsible, to be resistant to change, to lack ambition, to hate work, and to want to be led rather than to lead. Theory Y represents the outlook of human relations proponents—an optimistic, positive view of workers. In this view, workers are considered to be capable of accepting responsibility, self-direction, and self-control and of being imaginative and creative. The principal contribution offered by the two theories is that they help managers understand how their beliefs affect their own behavior. For example, Theory X managers are more likely to micromanage, which leads to employee dissatisfaction because they believe employees are inherently lazy. Managers can be more effective by considering how their behavior is shaped by their expectations about human nature.

136. Define *learning organization*. Summarize the three parts of a learning organization.

A learning organization is an organization that actively creates, acquires, and transfers knowledge within itself and is able to modify its behavior to reflect new knowledge.

Parts of a learning organization are:

1. *Creating and acquiring knowledge*. In learning organizations, managers try to actively infuse their organizations with new ideas and information, which are the prerequisites for learning. They acquire such knowledge by constantly scanning their external environments, by not being afraid to hire new talent and expertise when needed, and by devoting significant resources to training and developing their employees.

2. *Transferring knowledge*. Managers actively work at transferring knowledge throughout the organization, reducing barriers to sharing information and ideas among employees. Electronic Data Systems (EDS), for instance, practically invented the information-technology services industry, but by 1996 it was slipping behind competitors—missing the onset of the Internet wave, for example. When a new CEO, Dick Brown, took the reins in 1999, he changed the culture from "fix the problem yourself" to sharing information internally.

3. *Modifying behavior*. Learning organizations are nothing if not results oriented. Thus, managers encourage employees to use the new knowledge obtained to change their behavior to help further the organization's goals.
