https://selldocx.com/products/test-bank-precision-machining-technology-2e-janes Class Name e: Unit 02: Careers in Machining 1. As the machining industry grew through the century, the term machinist replaced mechanic. 18th 20th d. 21st c. ANSWER: c 2. Engineering drawings are also known as . . documents a. plans b. c. specs d. prints ANSWER: d place parts in machines and continually run a set operation or group of operations. Operators Assemblers Machinists d. **Printers** c. ANSWER: a are often responsible for measuring sizes to ensure parts meet specifications shown on engineering drawings. a. Assemblers b. Operators **Technicians** d. Machinists c. ANSWER: b prepare or set up machine tools so that operators can run them. Set-up operators Set-up technicians Set-up designers d. Set-up programmers c. ANSWER: b machinists are known as manual machinists. Conventional b. Manufacturing a. **Processing** d. Operating c. ANSWER: a machinists are very similar to conventional machinists except that they are normally skilled in the setup and operation of CNC machine tools. Mechanical Set-up b. **CNC** d. Toolmaker c. ANSWER: cwrite programs consisting of machine code. **Toolmakers** Die makers a. b. c. **Programmers** d. Mold makers ANSWER: c 9. CAM stands for ____

b. client-aided manufacturing

a. computer-aided methodology
