Chapter 2

Production Possibilities and Opportunity Costs

TRUE/FALSE

Answer: T Diff: 1	1.	Entrepreneurship is one of the factors of production.
Answer: T Diff: 1	2.	A tractor used in the fields by a farmer is an example of capital.
Answer: F Diff: 3	3.	Using robots on an assembly line is an example of an investment in human capital.
Answer: T Diff: 1	4.	Land is a resource category that includes timber growing on the land.
Answer: T Diff: 3	5.	If we move along a production possibilities curve and choose more of one type of good, the opportunity cost is measured in terms of the amount of the other good that is given up.
Answer: F Diff: 5	6.	All resources are assumed to be of equal quality when we draw a production possibilities curve that is bowed out.
Answer: F Diff: 3	7.	A wealthy economy is likely to choose to produce all consumption goods and no capital goods.
Answer: T Diff: 3	8.	If an economy is operating at a point inside its production possibilities curve, this reflects inefficient resource use.
Answer: F Diff: 3	9.	If all countries specialize in producing goods for which they have a comparative advantage, then total world output will be lower.
Answer: F Diff: 3	10.	The production of more capital goods this year means we must sacrifice the production of consumption goods in the future.
Answer: F Diff: 4	11.	To move along a production possibilities curve from one point to another requires additional resources.
Answer: T Diff: 3	12.	Unemployment or underemployment is shown by a point located inside the production possibilities curve.
Answer: T Diff: 2	13.	When resources are destroyed the production possibilities curve inward to the left.
Answer: F Diff: 4	14.	A country should always specialize in the production of any product for which it holds an absolute advantage.
Answer: T Diff: 2	15.	Innovation is the application of new technology to a production process.

Chapter 2		Chapter 2	Chapter 2
Comprehensive		Micro	Macro
Answer: F Diff: 3	16.	Food in the pantry of a household is a resource.	
Answer: T Diff: 5	17.	The law of increasing costs causes the production poutward from the origin.	possibilities curve to be bowed
Answer: F Diff: 4	18.	An increase in unemployment will cause this year's inward toward the origin.	s production possibilities curve to shift
Answer: F Diff: 3	19.	Factors of production are resources used in the con	sumption of goods and services.
Answer: T Diff: 1	20.	Capital is a good used in the production of goods the	nat households consume.
Answer: T Diff: 1	21.	The production possibilities curve shows the different produced with a set of given resources.	ent combinations of goods that can be
Answer: T Diff: 1	22.	The law of increasing costs states that the opportun as more of the good is produced.	nity cost of producing a good increases
Answer: F Diff: 2	23.	The production possibilities curve shifts to the left increase.	when resources in the economy
Answer: F Diff: 2	24.	Any point inside a production possibilities curve in all its available resources and technology.	dicates that the economy is using
Answer: F Diff: 1	25.	If resources are underemployed, then the economy	is producing as much as possible.
Answer: T Diff: 1	26.	An economy is producing efficiently when all factor productive capacity.	ors of production are used in their most
Answer: T Diff: 2	27.	If Belgium has a comparative advantage over France production of beer, then it can produce beer at a low France.	
Answer: T Diff: 3	28.	The United States has an absolute advantage over M production of corn when it can produce corn using	

Exhibit B-1 below shows the quantity of thing-a-ma-jigs or truffala fruit that can be produced by each country, if all of its resources are devoted to that product.

Exhibit B-1

Product	Barbootland	Canary Island
Coconuts	50	40
Kiwi fruit	25	10

Answer: T 29. In Exhibit B-1 Barbootland has an absolute advantage in the production of kiwi fruit. Diff: 1

Answer: F Diff: 3

30. Referring to Exhibit B-1, Barbootland has a comparative advantage in the production of coconuts.

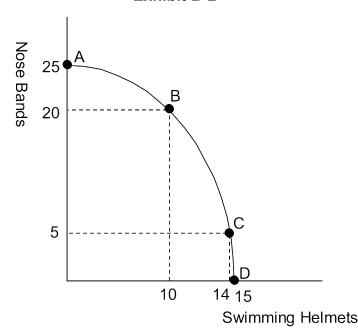

Chapter 2		Chapter 2	Chapter 2
Comprehensive		Micro	Macro
Answer: T Diff: 3	31.	In Exhibit B-1 Canary Island has a comparative advacoconuts.	antage in the production of
Answer: F Diff: 1	32.	Referring to Exhibit B-1, Canary Island has an absol both coconuts and kiwi fruit.	lute advantage in the production of
Answer: F Diff: 2	33.	Canary Island, in Exhibit B-1, does not have a comp of either product.	arative advantage in the production
Answer: T Diff: 3	34.	Trade is possible because Canary Island's opportunit Barbootland's.	ty cost of coconuts is less than
Answer: F Diff: 1	35.	Trade is not possible because Barbootland has an abboth goods.	solute advantage in the production of
MULTIPLE CHO	ICE		
Answer: C Diff: 3	1.	Referring to the information in Exhibit B-1, the opportranse a. 50 coconuts b. ½ coconuts c. 2 coconuts d. 25 coconuts e. 2.5	unity cost of one kiwi fruit is
Answer: D Diff: 3	2.	Canary Island's opportunity cost (examine Exhibit B a. 10 kiwi fruit b. 40 coconuts c. 4 kiwi fruit d. ½ kiwi fruit e. 4/5 kiwi fruit	3-1) of coconuts is equal to
Answer: A Diff: 4	3.	 Given the data in Exhibit B-1 a. Canary Island should produce coconuts and trade w b. Canary Island should produce kiwi fruit and trade coconuts. c. Barbootland should produce coconuts and trade fruit. d. trade is not possible because Barbootland does not producing either good. e. trade is not possible because Barbootland has an of both goods. 	de with Barbootland for with Canary Island for kiwi not have a comparative advantage
Answer: C Diff: 2	4.	Starting from point B in Exhibit B-2 (on the next pagswimming helmets is a. 20 nose bands b. 5 nose bands c. 15 nose bands d. 3.75 nose bands e. indeterminate	ge), the opportunity cost of 4 more
Answer: A Diff: 2	5.	As we move from point A to B, to C, and finally to I Increasing Cost is reflected by the fact that the oppora. increases b. decreases c. remains constant d. changes sporadically

is indeterminate

Exhibit B-2

Answer: D Diff: 3

- 6. Moving from point A to point B in Exhibit B-2 the opportunity cost of 1 swimming helmet is
 - 1 nose band a.
 - 2 nose bands
 - 4 nose bands c.
 - d. 5 nose bands
 - 8 nose bands

Answer: C Diff: 2

- 7. In addition to the items one must give up in order to afford the cost of cigarettes, the opportunity cost of smoking includes
 - your enjoyment from smoking
 - the health effects one places upon others
 - your expected health effects and shortened life span
 - harassment from nonsmokers d.
 - smoking cessation advertising on television

Answer: D Diff: 3

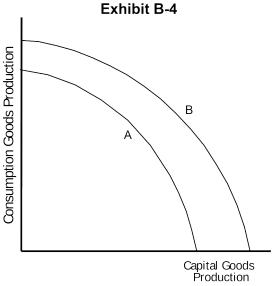

burden of

the

- Susan Sneed gave up her \$55,000 job at ACC, Inc. to return to college to change careers. She reduced her wardrobe to cheaper jeans and t-shirts, paid \$5,000 in tuition, continued to make her family's \$1,200 per month home mortgage payments, and bore the a variety of inane comments about the stupidity of older students giving up good paying jobs to return to school. Which of the above items is not needed to determine opportunity cost of her return to college?
- her \$55,000 ACC, Inc. salary
- the altered wardrobe costs b.
- the \$5,000 tuition expense c.
- d. her family's \$1,200 per month mortgage expense
- psychological stress from inane comments

Answer: D Diff: 2	9.	Factors of production is another name for a. the goods produced in a production possibilities table b. the goods not produced in a production possibilities table c. the goods produced in international trade d. resources e. money	
Answer: D Diff: 2	10.	Labor resources include a. only physical exertion b. only the resources used in the production of other resource c. only skilled labor d. both physical and mental exertion e. the expenditure of people's effort in producing goods, but it	
Answer: B Diff: 2	11.	The two human factors of production are a. labor and mental exertion b. labor and entrepreneurship c. entrepreneurship and physical exertion d. labor and physical exertion e. entrepreneurship and mental exertion	
Answer: C Diff: 3	12.	Which of the following is a capital resource? a. a new car bought by the Jones family b. a truck used in transporting school children to a soccer prace. c. a truck used in transporting steel to an automobile factory d. hamburger meat used to produce a juicy hamburger on a he e. a sapling used to create a forest in a new national park	
Answer: E Diff: 2	13.	Which of the following is associated with the creation of human a. a farmer buys more land b. a robot replaces a worker c. a worker replaces a robot d. a worker spends less time on the job e. a worker attends training classes	n capital?
Answer: C Diff: 1	14.	Factors of production do <i>not</i> include a. land b. labor c. money d. capital e. entrepreneurship	
Answer: B Diff: 3	15.	A good example of land resources is a. a steel billboard on an interstate highway b. water c. wood-based furniture d. machinery made from iron ore e. buildings located on prime real estate	
Answer: D Diff: 3	16.	The entrepreneur a. serves as a liaison between management and labor b. owns all of the factors of production c. allocates the risk and uncertainties of enterprise to others d. assumes the risk and uncertainties of enterprise e. earns more than labor	

Chapter 2 Chapter 2 Chapter 2 Comprehensive Micro Macro 17. The activity involved in managing a firm is considered by economists to be Answer: B Diff: 4 land activity b. labor activity human capital activity c. d. entrepreneurial activity nonproductive activity **Exhibit B-3** С В D Ε Α Capital Goods 2 3 0 1 4 Consumption Goods 25 23 19 13 0 Answer: D 18. Exhibit B-3 shows an economy's production possibilities table. If it chooses the Diff: 1 combination of goods at point A, not all the available resources are being used all resources are used in the production of capital goods no consumption goods are being produced every resource in the economy is being used in the production of consumption goods no capital goods are being used as factors of production Answer: B 19. Exhibit B-3 shows an economy's production possibilities table. The first unit of capital Diff: 2 goods will cost the economy _____ units of consumption goods. a. 25 b. 2 1 c. d. 23 e. 11 Answer: D Exhibit B-3 shows an economy's production possibilities table. As additional units of Diff: 3 capital goods are produced, the quantity of consumption goods produced increases; the production possibilities table shows only the maximum efficiency increases; of the law of increasing costs b. decreases; of the law of increasing costs decreases; there is a limited supply of resources increases; capital goods are used to produce consumption goods Answer: A 21. Exhibit B-3 shows an economy's production possibilities table. The second unit of capital Diff: 3 goods production will cost _____ units of consumption goods, and the third unit of capital goods production will cost units of consumption goods. a. 4; 6 b. 25; 23 c. 23; 19 d. 1; 23 e. 2; 19

- 26. In Exhibit B-4, which of the following could have caused the production possibilities curve to shift from curve A to curve B?
 - a. a major natural disaster
 - b. an increase in consumption goods production this year
 - c. the use of newer and more productive technology
 - d. a decrease in unemployment
 - e. a decrease in consumption goods production this year

Answer: D Diff: 3

- 28. The production possibilities curve demonstrates the basic economic principle that
 - a. economies are always efficient

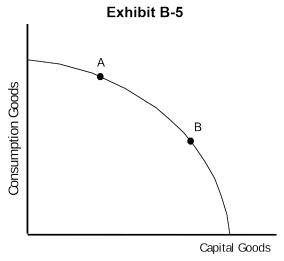

e.

a decrease in unemployment an improvement in literacy

- b. assuming full employment, supply will always determine demand
- c. assuming full employment, an economy is efficient only when the production of capital goods in a particular year is greater than the production of consumption goods in that year
- d. assuming full employment, to produce more of any one thing, the economy must produce less of at least one other good
- e. the production of more consumption goods this year requires the production of more capital goods this year

Answer: E Diff: 5

- 29. Which of the following describes the vicious circle of poverty?
 - a. Because resources are limited, all economies eventually become poor.
 - b. In the long run, economies cycle between being rich and being poor.
 - c. For an economy to grow requires more consumption goods, which requires less capital goods, which means it will eventually become poor.
 - d. Due to excessive consumption, rich economies will destroy their resource base and eventually become poor.
 - e. Poor economies are poor because they do not produce sufficient capital goods, and without the production of sufficient capital goods, they remain poor.

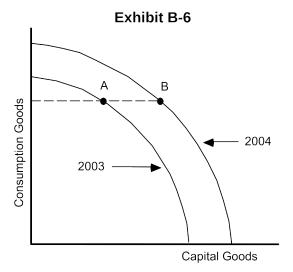

- 30. If two countries have the same production possibilities curve as shown in Exhibit B-5, but this year country A is located at point A on its PPC and country B is located at point B on its PPC, then country A
 - a. is better off today than country B
 - b. will grow at a faster rate than country B
 - c. will grow at a slower rate than country B
 - d. is producing more capital goods today than country B
 - e. is more efficient today than country B

Macro

Answer: E Diff: 4

- 31. In year 2003 the country of Exhibit B-6 was located at point A on its year 2003 production possibilities curve. In 2004 this country was located at point B on its 2004 production possibilities curve. Which of the following could have caused this shift in its production possibilities curve?
 - a. more efficient production in 2003
 - b. greater use of resources in 2003
 - c. a natural disaster in 2003 which led to a destruction of resources
 - d. higher unemployment in 2003
 - e. the production of capital goods in 2003 increased its resource base for 2004

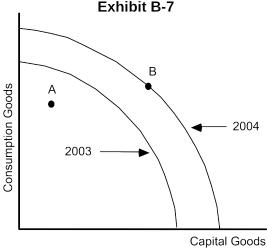

Answer: B Diff: 3

- 32. In year 2003- the country of Exhibit B-6 was located at point A on its year 2003 production possibilities curve. In 2004 this country was located at point B on its 2004 production possibilities curve. This country
 - a. is producing the same quantity of capital goods in both years
 - b. is producing the same quantity of consumption goods in both years
 - c. had no economic growth between 2003 and 2004
 - d. had higher unemployment in 2003 than in 2004
 - e. had higher unemployment in 2004 than in 2003

- 33. In year 2003 the country of Exhibit B-6 was located at point A on its year 2003 production possibilities curve. In 2004 this country was located at point B on its 2004 production possibilities curve. This economy
 - a. produces less of both goods in 2004 than in 2003
 - b. produces less of capital goods in 2004 than in 2003
 - c. is more efficient in 2004 than in 2003
 - d. experienced economic growth since 2003
 - e. had higher unemployment in 2004 than in 2003

Comprehensive

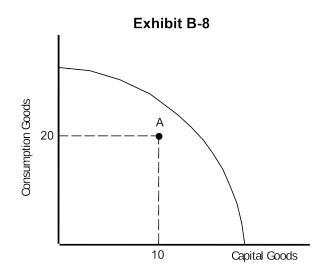

Exhibit B-7

Answer: B Diff: 4

- 34. Exhibit B-7 shows the production possibilities curves for a country for the years 2003 and 2004. Suppose the country was located at point A in 2003 and point B in 2004. This economy
 - experienced a loss of resources in 2004
 - had lower unemployment in 2004 than in 2003
 - achieved full employment in 2003 and in 2004
 - is less efficient in 2004 than in 2003 d.
 - produced fewer goods in 2004 than in 2003

- 35. Exhibit B-7 shows the production possibilities curves for a country for the years 2003 and 2004. Which of the following could have caused this shift in the production possibility curves?
 - a decrease in unemployment
 - a decline in technology
 - an increase in the quantity of capital goods used as a resource c.
 - a natural disaster d.
 - more efficient production

Answer: D Diff: 3

- a. combinations of resources the economy has the capacity to produce
- b. prices that can be charged for capital and consumption goods
- c. combinations of prices and outputs that can be produced
- d. combinations of goods the economy has the capacity to produce
- e. combinations of resources and prices that the economy can produce

Exhibit B-9

Answer: C Diff: 4

- 44. In Exhibit B-9, it can be inferred that
 - a. point A is preferred to point B
 - b. point A is preferred to point E
 - c. point A is preferred to point D
 - d. point B is preferred to point A
 - e. point B is preferred to point C

Answer: D Diff: 3

- 45. In Exhibit B-9, if the economy decides to locate at point E,
 - a. this is its best choice because it is producing maximum capital goods
 - b. this is its best choice because it is producing maximum consumption goods
 - c. it has not achieved full employment
 - d. it could not sustain itself in the long run because its people will have no consumption goods (presumably, this includes food)
 - e. the economy has not achieved maximum efficiency

Answer: D Diff: 5

- 46. In Exhibit B-9, the combination of goods given by point H could
 - a. never be achieved by this economy
 - b. be achieved today if the economy achieved full employment
 - c. be achieved today if the economy achieved maximum efficiency
 - d. not be achieved today
 - e. be achieved today with the proper allocation of resources

Answer: B Diff: 5

- 47. In Exhibit B-9, which of the following is *not* true regarding point H? Point H
 - a. cannot be achieved by this economy today
 - b. could be achieved today if the economy only achieved full employment
 - c. could be achieved in the future with a larger resource base
 - d. could be achieved in the future with more productive technology
 - e. could be achieved in the future if the economy grows

Chapter 2		Chapter 2 Chapter 2

Answer: B Diff: 4

- 83. If an economy keeps increasing its capital stock, then over time its production possibilities curve will
 - a. remain unchanged but more capital goods will be produced
 - b. shift outward
 - c. shift inward
 - d. disappear because scarcity will eventually be overcome
 - e. remain unchanged, but production will occur outside (exterior to) the curve

Answer: E Diff: 4

- 84. Compare two economies A and B that start with identical production possibilities curves. Both are fully employed. Economy A chooses to produce 6 consumption goods and 3 capital goods, while economy B chooses 4 consumption goods and 5 capital goods. This information suggests that
 - a. economy A is producing less efficiently than economy B
 - b. economy B is producing less efficiently than economy A
 - c. economy A and economy B, although producing different combinations, grow at the same rate because they are both fully employed
 - d. economy A's growth rate will be higher than economy B's
 - e. economy B's growth rate will be higher than economy A's

Answer: A Diff: 1

- 85. If the Exhibit B-12 economy produces no capital goods, what is the maximum quantity of consumption goods it can produce?
 - a. 50
 - b. 48
 - c. 40
 - d. 25
 - e. (

- 86. If the Exhibit B-12 economy moves from point L to point M, the opportunity cost of producing 10 more capital goods is
 - a. 10 consumer goods
 - b. 2 consumer goods
 - c. 15 consumer goods
 - d. 25 consumer goods
 - e. 8 consumer goods

Chapter 2		Chapter 2	Chapter 2
Comprehensive		Micro	Macro
Answer: D Diff: 2	87.	The Exhibit B-12 economy will experience the high what point now? a. J b. K c. M d. N e. P	nest economic growth if it chooses
Answer: E Diff: 3	88.	In Exhibit B-12, inefficient resource use is shown by a. N b. J c. Q d. L e. P	y which of the following points?
Answer: C Diff: 3	89.	 In Exhibit B-12, what can we conclude about point a. It is efficient. b. It is inefficient. c. It is unattainable. d. It gives maximum future growth. e. It shows underemployed resources. 	Q?
Answer: B Diff: 4	90.	 Poor economies may have difficulty growing becau a. their production possibilities curves slope upwa b. they cannot cut back on their production of conproduction of capital goods c. they have a solid consumption base already in particular difficulty developed e. the law of increasing costs makes it hard to production 	ard instead of downward issumption goods to increase their place
Answer: D Diff: 1	91.	An idea concerning production that eventually takes technology is a. the scientific method b. robots c. increasing cost of new technology d. innovation e. human capital	s the form of a new applied
Answer: C Diff: 3	92.	Technological innovations will cause a. production to increase but the production possib b. the production possibilities curve to shift to the c. the production possibilities curve to shift to the d. an economy to operate within its production po e. production at a point above or exterior to the pr	left right ssibilities curve
Answer: E Diff: 4	93.	The French production possibilities curve shifts to to a. a decrease in the French capital stock b. a decrease in the French labor supply c. high unemployment in France during the previous d. only consumer goods production in France during the consumer goods production in France during the production of France during	ous period ing the previous period
Answer: C Diff: 4	94.	The Irish production possibilities curve shifts to the a. an increase in the Irish labor supply b. innovation in the production of Irish goods c. a civil war that destroys much of Ireland's resord. d. unemployment among Irish workers e. a choice among the Irish of more capital goods	urce base

Chapter 2		Chapter 2	Chapter 2
Comprehensive		Micro	Macro
Answer: D Diff: 3	95.	War can be expected to do all of the following things to a. reduce the labor supply b. reduce the capital stock c. shift the production possibilities curve inward d. reduce technological knowledge e. reduce roads, bridges, and railroad networks	to an economy except
Answer: B Diff: 4	96.	According to the text, Japan lost much of its capital sto subsequently found that its a. production possibilities curve had shifted to the le even until today, its prewar output levels, having leading (Hiroshima and Nagasaki still haven't recovered for the production possibilities curve, having shifted to the use of the most up-to-date technology c. economy's productivity suffered irreversibly becater created a loss of skilled, scientific, and technological decomposition of the strength of the war e. production possibilities curve remained unchange because international trade was reduced	off because it was unable to regain, lost so much of its capital resources from the 1945 atomic bomb attacks) he left, quickly recovered with the cause the enormous loss of life ical knowledge untries refused to share scientific
Answer: C Diff: 3	97.	A point inside a production possibilities curve reflects a. the law of increasing costs b. technological innovation c. less than full use of resources and technology d. economic efficiency e. a way to increase future economic growth	
Answer: E Diff: 3	98.	A point outside a production possibilities curve reflect a. efficiency b. specialization c. inefficiency d. unemployment e. an unattainable choice	S
Answer: A Diff: 1	99.	Economists regard people who work below their poter a. underemployed b. unemployed c. as economically efficient as possible d. without human capital e. employed, but a contributor to long-run unemploy	
Answer: C Diff: 2	100.	The maximum possible production of goods and service employment of the economy's resources is a. impossible to achieve b. an unrealistic goal seldom achieved c. economic efficiency d. a point above the production possibilities curve e. possible only if the production possibilities curve	
Answer: D Diff: 2	102.	The idea that labor productivity depends on the degree attributed to a. Hiro Yakamaya b. Stanley Jevons c. J. S. Mill d. Adam Smith e. Robinson Crusoe	e of labor specialization is

Chapter 2		Chapter 2	Chapter 2
Comprehensive		Micro	Macro
Answer: B Diff: 2	: : :	In <i>The Wealth of Nations</i> , Adam Smith described the of specialization by using an illustration of a visit to a a. chicken farm b. pin factory b. bakery d. blacksmith e. town hall	concept of division of labor and
Answer: E Diff: 1	; 1 (In a one-person Robinson Crusoe economy, labor spectal. can shift the production possibilities curve to the robin is already present because Crusoe produces every can decrease production of all types of goods cannot increase production is impossible	right
Answer: B Diff: 2	1	Labor specialization can increase production primarily a. are now supervised more and so have to work har become proficient when they specialize in what the have to work more hours to buy the things they we engage in competitive, rather than cooperative, present the have to learn how to do every production-related to	der ney do best ant oduction
Answer: D Diff: 3	i i i	Economy X has just one worker, while Economy Y has capital and land resources and produce the same good. In Economy Y, we would expect Economy Y to produce an exactly the same quantity of goods as Economy X to 100 times the quantity of goods as Economy X to less than 100 times the quantity of goods as Economy X to more than 100 times the quantity of goods as Economy X to more than 100 times the quantity of goods as Economy X to more inefficiently than Economy X	. If labor specialization occurs tee X omy X
Answer: E Diff: 3	:	Applying the concept of labor specialization to internal specialize in producing what they do relatively best, a. each country could become self-sufficient international specialization and exchange will be consumers c. consumers are better off, but producers are worse in inefficiency in production occurs because speciality production, causes people to know less about the center will be more goods produced, exchanged, and	off ization, although allowing for more "big picture"

Exhibit B-13

Production of Cheese and Eggs per 8-Hour Day

	Production of Cheese	Production of Eggs
United States	3	8
France	9	2

Answer: D Diff: 3

- 108. In Exhibit B-13 (on the previous page), which of the following statements is true?
 - a. France has an absolute advantage in eggs.
 - b. France has a more efficient economy.
 - c. The United States has a more efficient economy.
 - d. The United States has a comparative advantage in eggs.
 - e. Both countries have a comparative advantage in eggs and cheese.

Answer: B Diff: 5	153.	In the context of production possibilities curve analy terrorist attack is to a. destroy as many resources as possible of a targe own security. b. shift the curve inward of the targeted nation by a itself c. shift the targeted nation's possibilities curve to to opportunity cost of making a first striker d. eliminate the targeted nation's ability to counter e. force the targeted population to decrease its own	ted nation in order to enhance its undermining its confidence to defend the right in order to increase the rattack in case of war
Answer: E Diff: 4	154.	Shifting resources from other goods to security good national security if a. the law of increasing opportunity cost is not app b. the economy is already at full employment c. the economy is not at full employment d. national security is already at its maximum e. other nations react to the shift by increasing their	plicable
Answer: A	155.	"Strike first" or initiating a war may be the appropria	ate strategy for a nation if
Diff: 4	a.	it has a national security advantage which it believes	will be eroded in time
	b.	it already faces a national security disadvantage vis-	à-vis an adversary
	c.	it wants to shift its production possibilities curve to t	he right
	d.	it wants to shift its production possibilities curve to t	he left
	e.	it wants to shift its adversary's production possibiliti	es to the right

ESSAY

- 1. a. Give an economics-based explanation for why class attendance is usually higher on the first day of class and on the days before major exams.
 - b. Describe some policies that your instructor could implement to reduce absences and give an economics-based explanation of why they would have the desired effect.

SOLUTION:

The opportunity cost of missing class on the first day is relatively high since instructors usually
provide useful information on the first day (for instance, information about grading policies

and exam

schedules). Similarly, the opportunity cost of missing class on the days before major exams is relatively high because instructors often spend time reviewing or providing useful exam

information.

b. Some possible policies to reduce absences are to: assign extra credit or a grade for attendance, penalize students for missing classes, or give pop quizzes. These policies promote attendance by raising the opportunity cost of missing class.

Chapter 2	Chapter 2	Chapter 2
Comprehensive	Micro	Macro

- 2. Some students hate when their instructors unexpectedly cancel class, but most students love the extra hour or two it gives them. Imagine how you would feel if you showed up for your next class and found a note on the door canceling the lecture.
 - a. Make a list of at least five things you could do with the extra time.
 - b. Which one thing from the list would you actually choose to do?
 - c. Use your answer in part b to state the opportunity cost of attending your next class.

SOLUTION:

- a. Answers will vary.
- b. Answers will vary.
- c. The opportunity of attending the next class is the activity stated in part b.
- 3. A clean environment is healthier than a polluted environment. Use the law of increasing costs to explain why even environmentalists might not advocate laws banning all pollution.

SOLUTION:

Incremental improvements to the environment become increasingly expensive in terms of everything else that we have to give up.

- 4. Diamonds are nature's hardest substance. Classify each of the following diamonds as land, labor, capital, entrepreneurship, or none of the above. Explain your choice.
 - a. an unmined diamond
 - b. a diamond in DeBeers' vault (DeBeers is the world's biggest diamond mining company.)
 - c. a diamond in a jeweler's display case at the shopping mall
 - d. a diamond on your or your fiancée's finger
 - e. an industrial grade diamond in your dentist's drill
 - f. the diamonds in the blade that the highway department uses to cut concrete

SOLUTION:

- a. land, because the diamond is in its natural state
- b. capital, because it's part of DeBeers' inventory
- c. capital, because it's part of the jeweler's inventory
- d. none of the above, because it's a good that has been consumed by a household, not a resource
- e. capital, because it's being used in the production of your dentist's services
- f. capital, because the highway department is using it to produce its output (roads, road repair)
- 5. Imagine an economy that produces capital goods and consumption goods. What will happen to its production possibilities curve if some of its existing capital stock wears out and is not replaced? How your answer differ if more than enough capital is produced to replace the capital that wears out?

SOLUTION:

With less capital (assuming no growth in other resources or technology), this economy will not be able to produce as much as it could before the capital wore out. The production possibilities curve will shift inward, towards the origin. With more capital (assuming no change in other resources or technology), this economy will be able to produce more than it initially could. Its production possibilities curve will shift outward, away from the origin.

6. The Taxpayer Relief Act of 1997 created the Hope Higher Education Scholarship program, which provides a maximum of \$1,500 in tax credits for the first two years of college for families with adjusted gross incomes of less than \$100,000. Which factor(s) of production will change as a result of this program? Explain how this program is expected to affect the U.S. production possibilities curve.

SOLUTION:

Capital (human capital, to be exact) will increase. This program reduces the cost of attending college. As individuals invest in more human capital, the production possibilities curve will shift outward. The United States will be able to produce more.

Chapter 2	Chapter 2	Chapter 2
Comprehensive	Micro	Macro

7. Sonny and his girlfriend are stranded on an island. Sonny can produce 8 cups of berries per day, or 3 ounces of honey. His girlfriend can produce 10 cups of berries per day, or 6 ounces of honey. Explain who has the absolute advantage in berry production and who has the absolute advantage in honey production.

Explain why the person who has the absolute advantage in berry production should not produce berries.

SOLUTION:

0.375

His girlfriend has the absolute advantage in both berries and honey production, because she can produce more of each than Sonny can. However, Sonny should specialize in berry production because he has the lower opportunity cost associated with berry production. He gives up the opportunity to produce only ounces of honey when he produces a cup of berries, while his girlfriend gives up the opportunity to produce 0.6 ounces of honey when she produces a cup of berries.

8. In economic terms associated with employment and unemployment, what would cause an economy to operate inside its production possibilities curve? What would have to change to move it to a point on production possibilities curve?

SOLUTION:

Unemployment or underemployment would keep an economy from operating on its production possibilities curve. As the economy reduces its unemployment rate and gets rid of all underemployment, it will move toward full employment and will move to a point on the production possibilities curve.

9. "Shifting resources from the production of other goods to the production of national security goods may not increase a nation's national security." Explain.

SOLUTION:

National security is a good unlike a cucumber. If you shift more resources to the production of cucumbers, you obtain more cucumbers. If your neighbor produces cucumbers as well, you still have the ones you produced. That is to say, how many cucumbers you end up with has nothing whatsoever to do with choices other people make. Not so with national security. If a nation produces more national security goods it gets more security only if other nations do not react by producing more security goods of their own. If they produce more, the added security produced initially is lost. That's because one's own security depends on what others do. If an adversarial nation arms itself to the teeth, you're national security is lessened even though you did not reallocate any resources away from security goods. It complicates matters, doesn't it?
