Chapter 1

Introduction to Taxation

Note to Instructor: The reference tables in the appendix of the text may be required for a limited number of answers to the questions and problems in this chapter. This is indicated by “REFERENCE TABLES REQUIRED” after the learning objective.

True-False: Insert **T** for **True** and **F** for **False** before the questions.

_____ 1. A hidden tax is one that is included with a payment but not specifically identified.

ANSWER True LO 1.1

DIFFICULTY: Easy

_____ 2. Both sales and use taxes are collected in the state in which the sale takes place.

ANSWER False LO 1.1

DIFFICULTY: Easy

_____ 3. The person receiving the gift pays the gift tax.

ANSWER False LO 1.1

DIFFICULTY: Easy

_____ 4. The value added tax is a type of consumption tax.

ANSWER True LO 1.1

DIFFICULTY: Easy

_____ 5. The type and degree of connection between a business and a state necessary for a state to impose a tax is referred to as nexus.

ANSWER True LO 1.1

DIFFICULTY: Easy

_____ 6. The 13th Amendment to the US Constitution that provided for an income tax was ratified in 1916.

ANSWER False LO 1.1

DIFFICULTY: Easy

_____ 7. Any current changes to the tax laws are now amendments to the Internal Revenue Code of 2018.

ANSWER False LO 1.1

DIFFICULTY: Easy

_____ 8. A flat tax generally would be considered a regressive tax.

ANSWER False LO 1.2

DIFFICULTY: Easy

_____ 9. Adam Smith's four canons of taxation are Equity, Certainty, Economy and Convenience.

ANSWER True LO 1.3

DIFFICULTY: Easy

_____ 10. Vertical equity asserts that persons in similar circumstances should face similar tax burdens.

ANSWER False LO 1.3

DIFFICULTY: Easy

_____ 11. There are three basic taxable entities: the individual, the fiduciary, and the C corporation.

ANSWER True LO 1.4

DIFFICULTY: Easy

_____ 12. All interest paid to a taxpayer must be included in gross income.

ANSWER False LO 1.4

DIFFICULTY: Moderate

_____ 13. The lowest tax rate on the tax rate schedules for taxable incomes is the same for individuals and C corporations.

ANSWER False LO 1.4 REFERENCE TABLES REQUIRED

DIFFICULTY: Easy

_____ 14. A \$100 tax deduction is more valuable to a taxpayer than a \$100 tax credit.

ANSWER False LO 1.4

DIFFICULTY: Easy

_____ 15. A corporation incurring a net operating loss in 2018 can only carry that loss forward to offset profits in future years.

ANSWER True LO 1.5

DIFFICULTY: Moderate

_____ 16. All limited liability companies (LLCs) can file their tax returns as partnerships.

ANSWER False LO 1.5

DIFFICULTY: Moderate

_____ 17. Partnerships and S corporations are flow-through entities.

ANSWER True LO 1.5

DIFFICULTY: Easy

Short-Answer Questions: Provide a brief written answer to each of the following questions.

1. Name and describe two types of taxes other than the income tax. Give example of each.

ANSWER Wealth taxes are those taxes levied on the value of property owned by a taxpayer. Examples include real estate taxes, tangible taxes, intangible taxes, and inventory taxes. Wealth transfer taxes are those taxes levied on the value of property transferred to another. Examples are the gift, estate, and inheritance taxes. Consumption taxes are taxes levied on the value of goods or services that are purchased for consumption. Examples include sales, use, excise, and value added taxes.

LO 1.1

DIFFICULTY: Easy

2. Compare a sales tax to a use tax.

ANSWER A sales tax is levied on a purchase at the point of sale regardless of the state of residence of the purchaser. A use tax is levied on a purchased item brought into a different state for use when a sales tax is not paid by the purchaser in the state where the item was purchased. Normally the sales and use taxes in a specific state are levied at identical rates.

LO 1.1

DIFFICULTY: Moderate.

3. Differentiate a wealth tax from a wealth transfer tax and give an example of each.

ANSWER: A wealth tax is a tax levied on the value of a person's possessions at a specific point in time; common wealth taxes would be real estate taxes that are levied on the owner of real property or intangible taxes on stocks. The wealth transfer tax is levied on the value of a person's possessions that are transferred to another person; the gift and estate taxes are examples of wealth transfer taxes.

LO 1.1

DIFFICULTY: Moderate

4. Compare progressive, proportional, and regressive taxes.

ANSWER The tax rate in a progressive system of taxation increases at a greater rate than the rate of increase in income. The higher the income, the greater the percentage of taxes paid. The tax in a proportional system of taxation increases at the same rate as the rate of increase in income. The percentage of taxes paid would be the same over all income levels. The tax rate in a regressive system of taxation increases at a slower rate than the rate of increase in income. The higher the income, the smaller the percentage of taxes paid.

LO 1.2

DIFFICULTY: Moderate

5. What are Adam Smith's four canons of taxation? Briefly describe each.

ANSWER Certainty—a taxpayer knows what the tax consequences of a transaction will be when the transaction is undertaken. Equity—the tax is fair relative to the taxpayer's level of income and circumstances. Economy—the costs of administering and complying with the tax are small relative to the amount of taxes collected. Convenience—the payment of taxes is simple and easy.

LO 1.3

DIFFICULTY: Easy

6. Explain how horizontal equity differs from vertical equity.

ANSWER Horizontal equity would require taxpayers with similar incomes to pay a like amount of taxes. Vertical equity would require taxpayers with greater (lesser) incomes to pay a greater (lesser) amount of taxes.

LO 1.3

DIFFICULTY: Easy

7. What tax provision encourages the fiduciary of an estate or a trust to distribute the income annually to the beneficiaries?

ANSWER: The tax rates applicable to the income that a trust or an estate receives are far more progressive than any other entity; they have no 12 or 32 percent tax rates and the highest tax rate (37%) begins at \$12,500 of taxable income.

LO 1.4

DIFFICULTY: Easy

8. Briefly compare a sole proprietorship to a corporation as a business entity.

ANSWER A sole proprietorship has only one owner; a corporation can have one or an unlimited number of owners. The corporation has limited liability; the sole proprietor is responsible for the liabilities of the business. There generally are few if any legal requirements to establish a sole proprietorship; a corporation must be incorporated under the laws of one of the states and can issue different classes of stock and bonds. The sole proprietor cannot take advantage of employee status and reports all results of operations on his or her own tax return. A shareholder-employee of a corporation is eligible for fringe benefits and the corporation files a completely separate tax return from that of any owner. The sole proprietor is fully liable for all debts of the business; shareholders are only at risk for their capital investment and are not liable for the debts of the corporation. There are other differences as well, too numerous to mention.

LO 1.5

DIFFICULTY: Moderate

9. Why are S corporations and partnerships called flow-through entities?

ANSWER S corporations and partnerships are called flow-through entities because they do not pay taxes on their incomes and gains. Instead the revenue and expense items flow through to the entity's owners and are included in and taxed along with the owners' other income.

LO 1.5

DIFFICULTY: Easy

10. What are the fiduciary entities and how are they created?

ANSWER The two fiduciary entities are the trust and the estate. A trust is created by a grantor who places assets in trust for the benefit of another person. A trustee manages the trust assets. An estate is created anytime a person who owns or has an interest in assets subject to estate taxes dies.

LO 1.5

DIFFICULTY: Easy

8 Taxation for Decision Makers Test Bank

Problems: Provide numerical solutions for each of the following.

1. Cragen Corporation has gross income of \$625,000 and operating expenses of \$418,000. What is its taxable income? What is its income tax liability in 2018?

ANSWER \$207,000 taxable income; \$43,470 tax
Taxable income = \$625,000 - \$418,000 = \$207,000.
Income tax = .21 x \$207,000 = \$43,470

LO 1.4

DIFFICULTY: Easy

2. The Shoe Market Inc. (a regular corporation) had \$1,875,000 of shoe sales and its cost for these shoes was \$688,000. In addition, Shoe Market received \$5,000 of corporate bond interest income and \$6,000 interest income on State of California bonds. It paid \$512,000 for salaries and had \$552,000 of other operating expenses. What is Shoe Market's taxable income? What is its income tax liability for 2018?

ANSWER \$128,000 taxable income; \$26,880 tax
Taxable income = \$1,875,000 - \$688,000 + \$5,000 corporate bond interest - \$512,000 salaries - \$552,000 expenses = \$128,000. [Interest on state bonds is tax exempt.]
Income tax = .21 x \$128,000 = \$26,880.

LO 1.4

DIFFICULTY: Moderate

3. Walter is married and files a joint return. If his adjusted gross income is \$64,000 and he has \$32,850 of deductions in 2018. What is his taxable income? What is his income tax liability?

ANSWER \$31,150 taxable income; \$3,357 tax
Taxable income = \$64,000 - \$32,850 in deductions = \$31,150.
Income tax = [(\$31,150 - \$19,050) x .12] + \$1,905 = \$1,452 + \$1,905 = \$3,357.

LO 1.4 REFERENCE TABLES REQUIRED

DIFFICULTY: Moderate

4. Susie is single, has salary income of \$26,000, and \$12,000 of deductions in 2018. What is her taxable income? What is her income tax liability?

ANSWER \$14,000 taxable income; \$1,489.50 tax
Taxable income = \$26,000 - \$12,000 deduction = \$14,000
Income tax = \$952.50 + [(\$14,000 - \$9,525) x .12] = \$952.50 + \$537 = \$1,489.50

LO 1.4 REFERENCE TABLES REQUIRED

DIFFICULTY: Moderate

5. Chloe and Bill, both single with no dependents, plan to marry either immediately before or immediately after year-end. Chloe's income for 2018 is \$89,000 and Bill's is \$86,000 before subtracting \$12,000 for the standard deduction for each. Would they have a marriage penalty or a marriage benefit if they married at the end of 2018?

ANSWER Neither, the tax liability remains the same as a married couple.
As single taxpayers: Chloe's taxable income: \$89,000 - \$12,000 standard deduction = \$77,000. Bill's taxable income: \$86,000 - \$12,000 standard deduction = \$74,000. Chloe's income tax: (\$9,525 x .10) + (\$29,175 x .12) + (\$38,300 x .22) = \$952.50 + \$3,501 + \$8,426 = \$12,879.50. Bill's income tax: (\$9,525

$\times .10) + (\$29,175 \times .12) + (\$35,300 \times .22) = \$952.50 + \$3,501 + \$7,766 = \$12,219.50$. Total tax as single taxpayers: $\$12,879.50 + \$12,219.50 = \$25,099$.

As a married couple: Taxable income: $\$89,000 + \$86,000 - \$24,000$ standard deduction = $\$151,000$. Their income tax: $(\$19,050 \times .10) + (\$58,350 \times .12) + (\$73,600 \times .22) = \$1,905 + \$7,002 + \$16,192 = \$25,099$. **Note to instructor:** compared to 2017 tax rate tables, for 2017 they would have a marriage penalty of $\$33$ ($\$30,060.50, - \$30,027.50$).

LO 1.4 REFERENCE TABLES REQUIRED

DIFFICULTY: Hard

6. Darden Corporation has taxable income of $\$200,000$. If it distributes 25 percent of its after-tax income to its sole shareholder who has other taxable income of $\$103,000$, what is the total tax burden on this $\$200,000$ of income?

ANSWER $\$47,925$ total tax is 23.96% of $\$200,000$

Tax on $\$200,000 = \$200,000 \times .21 = \$42,000$ corporate tax. $(\$200,000 - \$42,000) \times .25 = \$39,500$ distributed to the shareholder. Individual tax = $\$39,500 \times .15$ dividend rate = $\$5,925$. Total tax = $\$42,000 + \$5,925 = \$47,925$. The $\$47,925$ total tax is 23.96% of $\$200,000$.

LO 1.4 & 1.5 REFERENCE TABLES REQUIRED

DIFFICULTY: Hard

7. Harold is a 40 percent partner in HDT Partnership. At the beginning of the year, his partnership interest basis was $\$20,000$. The partnership had net income of $\$58,000$ for the year and it made an $\$8,000$ distribution to Harold. What is Harold's basis at the end of the year?

ANSWER $\$35,200$

$\$20,000 + (.40 \times \$58,000) - \$8,000 = \$35,200$ basis

LO 1.5

DIFFICULTY: Easy

8. Karen, single with the standard deduction being the only deduction for her individual tax return, wants to set up a business. She will use either a sole proprietorship or incorporate as a regular corporation. She expects the business to earn $\$160,000$ after all expenses and payments to Karen except for federal taxes. Karen will take $\$40,000$ from the business for living expenses (as a distribution from a sole proprietorship or a salary from a corporation). Considering only income taxes for 2018, should she establish the business as a C corporation or as a sole proprietorship?

ANSWER Karen should incorporate because she will save $\$1,440$.

As a C corporation: Income tax on corporation = $\$120,000 \times .21 = \$25,200$ Tax on $\$40,000$ salary: taxable income = $\$40,000 - \$12,000$ standard deduction = $\$28,000$; income tax = $\$952.50 + [.12 \times (\$28,000 - \$9,525)] = \$952.50 + \$2,217 = \$3,169.50$; total tax = $\$25,200 + \$3,169.50 = \$28,369.50$.

As a sole proprietorship, Karen would be taxed on $\$160,000$ of income ($\$120,000 + \$40,000$ salary). Taxable income = $\$160,000 - \$12,000 = \$148,000$; income tax = $\$952.50 + [.12 \times (\$38,700 - \$9,525)] + [.22 \times (\$82,500 - \$38,700)] + [.24 \times (\$148,000 - \$82,500)] = \$952.50 + \$3,501 + \$9,636 + \$15,720 = \$29,809.50$. Based on income taxes alone, Karen should incorporate as she will pay $\$1,440$ ($\$29,809.50 - \$28,369.50$) less in taxes.

LO 1.4 & 1.5 REFERENCE TABLES REQUIRED

DIFFICULTY: Hard

9. Sylvester, single, has $\$12,000$ in deductions when filing his income tax return. His sole proprietorship averages net income of $\$125,000$ annually. He needs $\$50,000$ per year to live on. If he incorporates

10 Taxation for Decision Makers Test Bank

his business, would he pay more or less in total income taxes if he takes a salary of \$50,000 for his living expenses? (Consider only income taxes.)

ANSWER: If he incorporates, Sylvester will save \$1,290 in taxes.

As a sole proprietorship: Taxable income: $\$125,000 - \$12,000 = \$113,000$.

Income tax: $\$952.50 + [.12 \times (\$38,700 - \$9,525)] + [.22 \times (\$82,500 - \$38,700)] + [.24 \times (\$113,000 - \$82,500)] = \$952.50 + \$3,501 + \$9,636 + \$7,320 = \$21,409.50$.

As a corporation: Corporate taxable income: $\$125,000 - \$50,000 \text{ salary} = \$75,000$. Income tax: $\$75,000 \times .21 = \$15,750$. Sylvester's taxable income: $\$50,000 - \$12,000 = \$38,000$.

Income tax: $\$952.50 + [.12 \times (\$38,000 - \$9,525)] = \$952.50 + \$3,417 = \$4,369.50$. Total tax: $\$4,369.50 + \$15,750 = \$20,119.50$. If he incorporates, Sylvester will save \$1,290 ($\$21,409.50 - \$20,119.50$) in taxes.

 - b. Income tax
 - c. Value added tax
 - d. Gift tax

ANSWER: c

LO 1.1

DIFFICULTY: Easy

12. Kate received \$130,000 in salary in 2018. What is her FICA tax if the Medicare rate is 1.45% and the Social Security rate is 6.2% on a maximum of \$128,400 in 2018?
- a. \$7,961
 - b. \$8,060
 - c. \$9,846
 - d. \$9,945

ANSWER: c

$(\$130,000 \times 1.45\%) + (\$128,400 \times 6.2\%) = \$1,885 + \$7,960.8 = \$9,845.8$

LO 1.1

DIFFICULTY: Moderate

13. Alexander received \$80,000 in salary in 2018. What is his FICA tax if the Medicare rate is 1.45%, the Social Security rate is 6.2% on the 2018 maximum of \$128,400, and the FUTA rate is 6% on a \$7,000 maximum?
- a. \$4,960
 - b. \$6,120
 - c. \$6,540
 - d. \$10,920

ANSWER: b

$\$80,000 \times (1.45\% + 6.2\%) = \$6,120$. FUTA is a separate tax.

14. Ethan received \$135,000 in salary in 2018. What is his FICA tax if the Medicare rate is 1.45%, the Social Security rate is 6.2% on the 2018 maximum of \$128,400, and the FUTA rate is 6% on a \$7,000 maximum?
- a. \$9,823
 - b. \$9,918
 - c. \$10,243
 - d. \$10,328

ANSWER: b

$(\$135,000 \times 1.45\%) + (\$128,400 \times 6.2\%) = \$1,957.50 + \$7,960.90 = \$9,918.30$. FUTA is a separate tax.

- 2016
 - The first year after 2018 the corporation's gross income exceeds its tax deductions for the year.
 - The first year the corporation earns any revenues
 - 2019

ANSWER: b

LO 1.5

DIFFICULTY: Easy

41. Which of the following is not a tax credit allowed a corporation?
- Foreign tax credit
 - Education credit
 - Investment tax credit
 - Alternative minimum tax credit

ANSWER: b

LO 1.5

DIFFICULTY: Easy

42. Harold has a 50% interest in a general partnership that has a \$14,000 loss for the year. He materially participates in the partnership, his basis in the partnership is \$10,000 at the beginning of the year. He also has salary from other employment of \$46,000. If he is single and claims the standard deduction, what are his taxable income and tax liability, respectively, in 2018?
- \$27,000; \$3,050
 - \$39,000; \$4,490
 - \$46,000; \$5,330
 - None; \$0

ANSWER: a

Taxable income = \$27,000 and the tax liability is \$3,049.50.

Taxable income = \$46,000 - \$7,000 partnership loss (50% x \$14,000) - \$12,000 standard deduction = \$27,000. Tax Liability: $[(\$27,000 - \$9,525) \times 12\%] + \$952.50 = \$3,049.50$

- a. \$40,000
 - b. \$32,000
 - c. \$8,000
 - d. \$3,200

ANSWER: c

The shareholder is only taxed on the \$8,000 dividend income received.

LO 1.5

DIFFICULTY: Easy

57. Emma owns 40% of Johnson, Inc., a regular C corporation, that reported a net loss of \$50,000 for the year. Emma acquired her stock on January 1 of the current year by investing \$4,000 cash. In July, the corporation took out a bank loan for \$25,000. How much of the loss can Emma deduct on her tax return for the year?
- a. \$0
 - b. \$4,000
 - c. \$9,000
 - d. \$10,000

ANSWER: a

Losses from C corporations do not flow through to shareholders.

LO 1.5

DIFFICULTY: Moderate

58. Mason owns 45% of an S corporation that reported net income of \$105,000 for the year. During the year, \$20,000 was distributed to Mason from the corporation. How much should Mason include in his taxable income for the year?
- a. \$20,000
 - b. \$47,250
 - c. \$56,250
 - d. \$67,250

ANSWER: b

$\$105,000 \times 45\% = \$47,250$.

LO 1.5

DIFFICULTY: Easy

59. Emily is a 20% shareholder in an S corporation. Emily acquired her interest on January 1 of the current year by investing \$10,000 for 20% of the corporation's stock. In March, the corporation took out a bank loan for \$100,000. The corporation reported a net loss for the current year of \$200,000. How much of this loss can Emily deduct on her current year's tax return?
- a. \$40,000
 - b. \$30,000
 - c. \$20,000
 - d. \$10,000

ANSWER: d

24 Taxation for Decision Makers Test Bank

Emily's share of the loss would be \$40,000 ($\$200,000 \times 20\%$) but the amount she can deduct in the current year is limited to her \$10,000 basis (\$10,000 invested).

LO 1.5

DIFFICULTY: Hard

60. Ian contributes \$9,000 in exchange for a 30 percent interest in a C corporation. For 2017, the corporation reported a total loss of \$35,000 and made no cash distributions. For 2018, the corporation reported net income of \$45,000 and made a cash distribution to the shareholders. Ian received \$5,000 of this cash distribution in 2018. Ian is in the 24% marginal tax bracket and 15% dividend rate in both 2017 and 2018. How much income tax did Ian save for 2017 as a result of his share of loss from this corporation and how much income tax does Ian pay as a result of his ownership in the corporation for 2018?

- a. zero tax savings in 2017 and \$750 tax in 2018
- b. zero tax savings in 2017 and \$3,360 tax in 2018
- c. \$2,520 tax savings in 2017 and \$3,360 tax in 2018
- d. \$2,520 tax savings in 2017 and \$2,550 tax in 2018
- e. \$2,940 tax savings in 2017 and \$3,780 tax in 2018

ANSWER: a

\$750 in 2018 ($\$5,000 \times 15\%$). A C corporation is not a flow-through entity. Ian is only taxed on the \$5,000 dividends he received in 2018 using the 15% dividend rate. **Note to Instructor:** Both the 15% dividend rate and the 24% marginal tax rate do not need to be provided. Upon review of the income ranges on the 2018 tax rate schedules for taxpayers that fall into the 24% marginal tax rate, the student is able to determine the income must be in the range for the 15% dividend tax rate [\$38,601 - \$425,800 (\$77,201 - \$479,000 if married filing jointly)].

LO 1.5

DIFFICULTY: Hard

Note to Instructor: The information provided for problems 61 – 72 is identical.

Jerry and Matt decide to form a business. Jerry will contribute \$4,200 for a 35% interest and Matt will contribute \$7,800 for a 65% interest. The business will take out a \$25,000 loan to cover the balance of their working capital needs. They expect that the business will have a loss of \$38,000 for the first year. In the second year, the business will have a profit of \$52,000 and it will distribute \$5,200 to Matt and \$2,800 to Jerry. Jerry is in the 32% marginal tax bracket and Matt is in the 24% marginal tax bracket. Their marginal tax brackets will not change as a result of profit or loss from this business.

61. What is Jerry's income tax savings (rounded to the nearest dollar) for the first year if they organize the business as a partnership?

- a. \$0
- b. \$1,386
- c. \$4,144
- d. \$4,389
- e. \$4,655

ANSWER: c

Jerry's share of the loss would be \$13,300 ($\$38,000 \times 35\%$) but the amount he can deduct in the first year is limited to his \$12,950 basis [$\$4,200$ invested + ($\$25,000$ loan $\times 35\%$)]. The excess \$350 loss is carried forward. His tax savings is \$4,144 ($\$12,950 \times 32\%$).

LO: 1.5

DIFFICULTY: Moderate

62. Jerry and Matt decide to form a business. Jerry will contribute \$4,200 for a 35% interest and Matt will contribute \$7,800 for a 65% interest. The business will take out a \$25,000 loan to cover the balance of their working capital needs. They expect that the business will have a loss of \$38,000 for the first year. In the second year, the business will have a profit of \$52,000 and it will distribute \$5,200 to Matt and \$2,800 to Jerry. Jerry is in the 32% marginal tax bracket and Matt is in the 24% marginal tax bracket. Their marginal tax brackets will not change as a result of profit or loss from this business. What is Matt's income tax savings (rounded to the nearest dollar) for the first year if they organize the business as a partnership?
- \$0
 - \$2,184
 - \$5,772
 - \$6,916
 - \$24,050

ANSWER: c

Matt's share of the loss would be \$24,700 ($\$38,000 \times 65\%$) but the amount he can deduct in the first year is limited to his \$24,050 basis [$\$7,800$ invested + $(\$25,000 \text{ loan} \times 65\%)$]. The excess \$650 loss is carried forward. His tax savings is \$5,772 ($\$24,050 \times 24\%$).

LO: 1.5

DIFFICULTY: Moderate

63. Jerry and Matt decide to form a business. Jerry will contribute \$4,200 for a 35% interest and Matt will contribute \$7,800 for a 65% interest. The business will take out a \$25,000 loan to cover the balance of their working capital needs. They expect that the business will have a loss of \$38,000 for the first year. In the second year, the business will have a profit of \$52,000 and it will distribute \$5,200 to Matt and \$2,800 to Jerry. Jerry is in the 32% marginal tax bracket and Matt is in the 24% marginal tax bracket. Their marginal tax brackets will not change as a result of profit or loss from this business. What is Jerry's income tax savings (rounded to the nearest dollar) for the first year if they organize the business as an S corporation?
- \$0
 - \$1,344
 - \$4,274
 - \$4,389
 - \$4,655

ANSWER: b

Jerry's share of the loss would be \$13,300 ($\$38,000 \times 35\%$) but the amount he can deduct in the first year is limited to his \$4,200 basis (\$4,200 invested). The excess \$9,100 loss is carried forward. His tax savings is \$1,344 ($\$4,200 \times 32\%$).

LO: 1.5

The business will take out a \$25,000 loan to cover the balance of their working capital needs. They expect that the business will have a loss of \$38,000 for the first year. In the second year, the business will have a profit of \$52,000 and it will distribute \$5,200 to Matt and \$2,800 to Jerry. Jerry is in the 32% marginal tax bracket and Matt is in the 24% marginal tax bracket. Their marginal tax brackets will not change as a result of profit or loss from this business. How much tax will Jerry pay in the second year (rounded to the nearest dollar) due to this business if they organize the business as a partnership?
- a. \$6,930
 - b. \$6,006
 - c. \$5,712
 - d. \$3,927
 - e. \$3,003

ANSWER: c

Jerry's share of the profit would be \$18,200 ($\$52,000 \times 35\%$) but is reduced by his \$350 loss (\$13,300 share of first-year loss - \$12,950 deductible first-year loss) that is carried forward to the second year. His tax is \$5,712 [$(\$18,200 - \$350) \times 32\%$].

LO: 1.5

DIFFICULTY: Moderate

66. Jerry and Matt decide to form a business. Jerry will contribute \$4,200 for a 35% interest and Matt will contribute \$7,800 for a 65% interest. The business will take out a \$25,000 loan to cover the balance of their working capital needs. They expect that the business will have a loss of \$38,000 for the first year. In the second year, the business will have a profit of \$52,000 and it will distribute \$5,200 to Matt and \$2,800 to Jerry. Jerry is in the 32% marginal tax bracket and Matt is in the 24% marginal tax bracket. Their marginal tax brackets will not change as a result of profit or loss from this business. How much tax will Matt pay in the second year (rounded to the nearest dollar) due to this business if they organize the business as a partnership?
- a. \$10,920
 - b. \$9,464
 - c. \$7,956
 - d. \$8,814
 - e. \$4,732

ANSWER: c

Matt's share of the profit would be \$33,800 ($\$52,000 \times 65\%$) but is reduced by his \$650 loss ($\$24,700$ share of first-year loss - $\$24,050$ deductible first-year loss) that is carried forward to the second year. His tax is \$7,956 [$(\$33,800 - \$650) \times 24\%$].

LO: 1.5

DIFFICULTY: Moderate

67. Jerry and Matt decide to form a business. Jerry will contribute \$4,200 for a 35% interest and Matt will contribute \$7,800 for a 65% interest. The business will take out a \$25,000 loan to cover the balance of their working capital needs. They expect that the business will have a loss of \$38,000 for the first year. In the second year, the business will have a profit of \$52,000 and it will distribute \$5,200 to Matt and \$2,800 to Jerry. Jerry is in the 32% marginal tax bracket and Matt is in the 24% marginal tax bracket. Their marginal tax brackets will not change as a result of profit or loss from this business.

What is Jerry's basis at the end of the second year if they organize the business as a partnership?

- a. \$0
- b. \$6,300
- c. \$27,950
- d. \$15,050
- e. \$15,400

ANSWER: d

Jerry's basis at the end of the first year was zero [$\$4,200$ invested + $(\$25,000 \text{ loan} \times 35\%) - \$12,950$ deductible loss]. The excess \$350 loss is carried forward to the second year. His basis at the beginning of the second year is zero but is increased for his \$18,200 ($\$52,000 \times 35\%$) share of profits. It is reduced for the \$2,800 distribution to him and his \$350 loss carried forward from the first year. His basis at the end of the second year is \$15,050 ($0 + \$18,200 - \$2,800 - \350).

LO: 1.5

DIFFICULTY: Hard

68. Jerry and Matt decide to form a business. Jerry will contribute \$4,200 for a 35% interest and Matt will contribute \$7,800 for a 65% interest. The business will take out a \$25,000 loan to cover the balance of their working capital needs. They expect that the business will have a loss of \$38,000 for the first year. In the second year, the business will have a profit of \$52,000 and it will distribute \$5,200 to Matt and \$2,800 to Jerry. Jerry is in the 32% marginal tax bracket and Matt is in the 24% marginal tax bracket. Their marginal tax brackets will not change as a result of profit or loss from this business.

What is Matt's basis at the end of the second year if they organize the business as a partnership?

- a. \$0
- b. \$11,700
- c. \$27,950
- d. \$28,600
- e. \$33,800

ANSWER: c

Matt's basis at the end of the first year was zero [$\$7,800$ invested + $(\$25,000 \text{ loan} \times 65\%) - \$24,050$ deductible loss]. The excess \$650 loss is carried forward to the second year. His basis at the beginning of the second year is zero but is increased for his \$33,800 ($\$52,000 \times 65\%$) share of profits. It is reduced for the \$5,200 distribution to him and his \$650 loss carried forward from the first year. His basis at the end of the second year is \$27,950 ($0 + \$33,800 - \$5,200 - \650).

LO: 1.5

DIFFICULTY: Hard

69. Jerry and Matt decide to form a business. Jerry will contribute \$4,200 for a 35% interest and Matt will contribute \$7,800 for a 65% interest. The business will take out a \$25,000 loan to cover the balance of their working capital needs. They expect that the business will have a loss of \$38,000 for the first year. In the second year, the business will have a profit of \$52,000 and it will distribute \$5,200 to Matt and \$2,800 to Jerry. Jerry is in the 32% marginal tax bracket and Matt is in the 24% marginal tax bracket. Their marginal tax brackets will not change as a result of profit or loss from this business. How much tax will Jerry pay in the second year (rounded to the nearest dollar) due to this business if they organize the business as an S corporation?
- \$6,930
 - \$6,006
 - \$3,927
 - \$2,912
 - \$0

ANSWER: d

Jerry's share of the profit would be \$18,200 ($\$52,000 \times 35\%$) but is reduced by his \$9,100 loss ($\$13,300$ share of first-year loss - \$4,200 deductible first-year loss) that is carried forward to the second year. \$2,912 [$(\$18,200 - \$9,100) \times 32\%$]. The distribution reduces basis but is not taxed.

LO: 1.5

DIFFICULTY: Moderate

70. Jerry and Matt decide to form a business. Jerry will contribute \$4,200 for a 35% interest and Matt will contribute \$7,800 for a 65% interest. The business will take out a \$25,000 loan to cover the balance of their working capital needs. They expect that the business will have a loss of \$38,000 for the first year. In the second year, the business will have a profit of \$52,000 and it will distribute \$5,200 to Matt and \$2,800 to Jerry. Jerry is in the 32% marginal tax bracket and Matt is in the 24% marginal tax bracket. Their marginal tax brackets will not change as a result of profit or loss from this business. How much tax will Matt pay in the second year (rounded to the nearest dollar) due to this business if they organize the business as an S corporation?
- \$10,920
 - \$9,464
 - \$4,056
 - \$3,276
 - \$1,456

ANSWER: c

Matt's share of the profit would be \$33,800 ($\$52,000 \times 65\%$) but is reduced by his \$16,900 loss ($\$24,700$ share of first-year loss - \$7,800 deductible first-year loss) that is carried forward to the second year. \$4,056 [$(\$33,800 - \$16,900) \times 24\%$]. The distribution reduces basis but is not taxed.

LO: 1.5

DIFFICULTY: Hard

71. Jerry and Matt decide to form a business. Jerry will contribute \$4,200 for a 35% interest and Matt will contribute \$7,800 for a 65% interest. The business will take out a \$25,000 loan to cover the balance of their working capital needs. They expect that the business will have a loss of \$38,000 for the first year. In the second year, the business will have a profit of \$52,000 and it will distribute \$5,200 to Matt and \$2,800 to Jerry. Jerry is in the 32% marginal tax bracket and Matt is in the 24% marginal tax bracket. Their marginal tax brackets will not change as a result of profit or loss from this business. What is Jerry's stock basis at the end of the second year if they organize the business as an S corporation?
- \$0

- b. \$6,300
- c. \$27,950
- d. \$15,050
- e. \$15,400

ANSWER: b

Jerry's basis at the end of the first year was zero [\$4,200 invested - \$4,200 deductible loss]. The excess \$9,100 loss is carried forward to the second year. His basis at the beginning of the second year is zero but is increased for his \$18,200 (\$52,000 x 35%) share of profits. It is reduced for the \$2,800 distribution to him and his \$9,100 loss carried forward from the first year. His basis at the end of the second year is \$6,300 ($0 + \$18,200 - \$2,800 - \$9,100$).
