The Boston Tea Party was largely a response to the British government's decision to eliminate the lucrative colonial tea trade.

British government's decision to remove all of its soldiers from the colonies.

British government's decision to tax the colonists' personal incomes.

British government's actions in carrying out the

Boston Massacre.

Which of the following best summarizes the colonies' path to declaring independence?

Even at the time of the declaration of independence, only a small minority of wealthy elites desired independence from Great Britain, but they had sufficient power to force others to go along.	Even at the time of the declaration of independence, only a small minority of wealthy elites desired independence from Great Britain, but they had sufficient power to force others to go along.
---	---

The idea of independence had long been popular in the colonies, dating back to the era of the French and Indian War. It took the colonists a decade to build a strong enough military that they felt comfortable declaring independence.	The colonists were internally divided between southern planters who desired independence and northern merchants who feared it would be bad for business.
Originally, most colonists wanted better treatment from Britain, but a cycle of colonial protest and British repression radicalized many colonists and led them to declare independence.	Which of the following is an example of a confederation?
A group of states agree to create a new government over them, which they will allow to manage some issues of common interest, but otherwise the states will remain independent.

Why was the Declaration of Independence a remarkable political statement for its time?

It convinced southern states to abolish slavery.	
It persuaded the British government to give back all of the tax revenue it had collected from the colonies.	
It ended the Revolutionary War by offering a compromise with the British government.

The Virginia Plan proposed a system of representation in the national legislature that was based on

equal representation between the states.

equal representation between the states.

the population of each state in one house and equal representation in the other.

the population of each state or the proportion of each state's revenue contribution, or both.

the strength of each state's militia, with the size of the militia being proportional to their seats in the legislature.

the strength of each state's militia, with the size of the militia being proportional to their seats in the legislature.

At the Philadelphia Constitutional Convention, the proposed plan to create a congress where representation was distributed according to population was called the _____ Plan.

Virginia	New Hampshire
-----------------	----------------------

Marshall	New Jersey
States like Delaware, Connecticut, and New York opposed the Virginia Plan because they	
disliked the Bill of Rights that was contained within the Virginia Plan.	
wanted to eliminate the state governments rather than give them the constitutional status.	
wanted every plan for a new government to include a provision protecting the institution of slavery for at least 25 years.	

feared that large states would dominate the new government if representation were to be determined by population.

What did the New Jersey Plan propose for Congress?

Representation would be equal for each state.	Representation would be based on population.
Representation would be proportionate to the share of taxes paid by each state to the federal government.	Representatives to Congress would be appointed by the state legislatures.

During the Philadelphia

Convention, the New Jersey Plan was supported by _____ states.

less populous	slaveholding
free	southern

The issue of representation was addressed in the Great Compromise by giving each state

the opportunity to elect its

own governors and state legislatures.

an equal number of senators and a number of representatives based on the state's population. an equal number of votes in the Electoral College but votes in the Senate based on population. a veto over constitutional amendments and the right to propose their own constitutional amendments.

this would make members of the Senate more responsive to the preferences of their constituents.

Why did the delegates at the Philadelphia Convention turn down the idea of including a list of citizens' rights in the Constitution?

	They believed that such a list would limit economic development by preventing the federal government from doing what it thought necessary to grow the economy.
	They believed that such a list would be unnecessary because the federal government was already limited to its expressed powers.
	They believed that citizens should vote directly on which rights should be protected rather than having the convention's delegates decide.
	They believed that such a list would make government too weak to protect national security.

The House has the power to overturn a president's veto but the Senate does not.	The House has the power to originate revenue bills but the Senate does not.
--	--

The framers designed the Senate to be a check against excessive democracy by doing which of the following?	Senators were originally appointed by state legislatures.
---	--

Senators have shorter terms than members of the House of Representatives.	Senators are directly elected by the people.
--	---

Senators are the only officials immune from impeachment.

The Constitution gives the president several powers. Which of the following is not one of them?

veto congressional enactments	
convene Congress in special session	
call for new Congressional elections.	
grant pardons and reprieves	

The Constitution expressly grants which of the following powers to Congress?

confining the powers of the federal government to certain narrowly defined areas and by adding a bill of rights to the Constitution.

creating an internal system of checks and controls within government.

preventing government from collecting revenue through taxation.

Which of the following statements best summarizes the Federalists' view on representation?

Citizens are too apathetic and uninformed to be given the right to vote and so the aristocracy must do what they think best.

Representative democracy can never provide good representation for its citizens, and direct democracy is the best way to achieve popular sovereignty.

In order to provide good representation, the represented must be a true picture of the people and this can only be achieved in small, relatively homogeneous republics.

The best system of representation allows citizens to elect individuals possessing ability, experience, and talent superior to their own.

What was Madison referring to when he wrote that a double security arises to the rights of the people?

the fact that the Constitution protects the rights of the people by allowing citizens to vote directly on the law and on elected representatives	the fact that the Constitution protects Americans from foreign invasions by allowing for both a national army and state militias

While most amendment efforts failed because they attempted to address a specific public problem, successful amendments changed the structure or composition of government.

While most amendment efforts have failed because they attempted to address issues related to voting rights, successful amendments addressed issues related to the regulation of interest groups and parties.

There has never been a successful attempt to amend the Constitution through the formal procedure spelled out in Article V.

Describe some of the problems under the Articles of Confederation that led to the drafting of a new constitution. In your answer, be sure to discuss national defense, foreign affairs, and the national government's power under the Articles of Confederation as well as Shays's Rebellion.

Describe and analyze the conflicts and compromises that occurred during the drafting of the Constitution. What was the main source of conflict between large and small states, and how did the Great Compromise resolve it? What was the nature of the conflict regarding slavery during the Philadelphia Convention? How did the Three-Fifths Compromise address this conflict?

Without a national military, the nationâ€™s borders were difficult to protect against this potentially hostile foreign power.b.Foreign affairs: The federal government was unable to enforce existing treaties and there was no national military. Furthermore, competition among the states for foreign commerce allowed the European powers to play the states off one another, which created confusion on both sides of the Atlantic.c.National power: The Articles of Confederation allowed for only a weak federal government, with state governments retaining most of the powers of government. This situation became alarming when â€œradicalâ€ forces began to exert considerable influence in a number of state governments.d.Shaysâ€™s Rebellion: In 1787, Daniel Shays led a mob of farmers in a rebellion against the government of Massachusetts. It is quite possible that the Constitutional Convention would never have taken place without this event. The rebellion showed that the Congress under the Confederation was unable to act decisively in a time of crisis.</div></td></tr><tr style=3D"mso-yfti-irow:0;mso-yfti-firstrow:yes;page-break-inside:avoid"><td width=3D139 valign=3Dtop style=3D"width:103.9pt;padding:5.6pt 5.4pt 5.6pt 5.4pt"><p class=3DMsoListParagraph style=3D"margin-left:0pt;mso-add-space:auto;text-indent:-25.5pt;mso-text-indent-alt:0cm;mso-list:l5 level1 lfo2;mso-level-numbering:continue;mso-level-reset-level:level1"> </p></td><td width=3D555 valign=3Dtop style=3D"width:416.12pt;padding:5.6pt 5.4pt 5.6pt 5.4pt"><div>There are four components to this question. a.Conflict between large and small states: Large and small states were divided over representation. The Virginia Plan framework, which called for representation in the national legislature based on the population of each state, was supported by large states. The New Jersey Plan framework, which called for equal state representation in the national legislature regardless of population, was supported by small states. b.The Great Compromise: Under this compromise, in the

House of Representatives, representatives would be apportioned according to the population in each state. This was what delegates from the large states had sought. However, in the Senate, each state would have equal representation regardless of its size.

c.Slavery: Whatever they thought of slavery, most delegates from the northern states opposed counting enslaved people in the distribution of congressional seats. Southern delegates stated that they would never enter the Union if enslaved people were not counted as part of the basis for representation.

d.Three-Fifths Compromise: Northerners and southerners eventually reached agreement through the Three-Fifths Compromise. The seats in the House of Representatives would be apportioned according to a "population" in which five enslaved people would count as three free persons. The enslaved people would not be allowed to vote, of course, but the number of representatives would be apportioned accordingly.

There are three components to this question.

a.Why the Founders included these: The Founders incorporated the separation of powers and federalism in order to guard against the possible misuse of governmental power.

b.Discussing separation of powers: The separation of powers refers to the division of governmental power among several institutions that must cooperate in decision making. Another important feature of the separation of powers is the principle of giving each of the branches a distinctly different constituency (e.g., the president chosen, indirectly, by electors; the House chosen by popular vote; the Senate chosen by state legislatures; and the judiciary chosen by presidential appointment). The separation of powers requires a system of checks and balances (mechanisms through which each branch of government is able to participate in and influence the activities of the other branches). Examples of these features include the presidential veto power over congressional legislation, the power of the Senate to approve presidential appointments, and judicial review of congressional enactments.

c.Discussing federalism: Federalism is a system of government in which power is divided, by a constitution, between a central government and regional governments. Compared with the Articles of Confederation, federalism was a step toward greater centralization of power. The framers' concern with national supremacy was expressed in Article VI, in the supremacy clause. Thus, they devised a system of two sovereigns, the states and the nation, with the hope that competition between the two would be an effective limitation on the power of both.

a.Representation: One major area of contention between the two sides was representation. Antifederalists asserted that representatives must be "a true picture of the people." They argued this could be achieved only in small, relatively homogeneous republics such as the existing states. Federalists saw no reason that representatives should be precisely like those they represented. In their view, one of the great advantages of representative government was precisely the possibility that the people would choose as their representatives individuals possessing ability, experience, and talent superior to their own.

b.Tyranny: A second important issue was the threat of tyranny. From the Antifederalist perspective, the greatest danger was that the few would use their power to tyrannize the many. For this reason, Antifederalists were critical of the unelected institutions in the Constitution (such as the Senate, the executive, and the federal judiciary). The Federalists were fearful of majority tyranny. From the Federalist perspective, it was precisely those features of the Constitution that the Antifederalists attacked as potential sources of tyranny that actually offered the

best hope of averting the threat of oppression. c. Governmental power: A third major difference was the issue of governmental power. Antifederalists favored limiting and enumerating the powers granted to the national government in relation both to the states and to the people at large. Antifederalists also demanded that a bill of rights be added to the Constitution to place limits on the government's power. Federalists favored the construction of a government with broad powers to defend the nation against foreign foes, guard against domestic strife and insurrection, promote commerce, and expand the nation's economy.

There are two components to this question:

a. Four methods of amendment in Article V: Method 1 involves passage in House and Senate by two-thirds vote, then ratification by majority vote of the legislatures of three-fourths of the states. Method 2 involves passage in House and Senate by two-thirds vote, then ratification by conventions in three-fourths of the states. Method 3 involves passage in a national convention called by Congress in response to petitions by two-thirds of the states, then ratification by majority vote of the legislatures of three-fourths of the states. Method 4 involves passage in a national convention, then ratification by conventions called for the purpose in three-fourths of the states. Since no amendment has ever been proposed by national convention, Methods 3 and 4 have never been employed.

b. Kinds of successful amendments: Since 1789, more than 11,000 amendments have been formally introduced in Congress. Of these, 27 of these were eventually ratified by the states. Most amendment efforts have failed because they simply attempted to use the Constitution instead of ordinary legislation to deal with a specific public problem. The 25 successful amendments are concerned with the structure or composition of government.
