Brief table of contents

Part 1: An introduction to management and cost accounting: cost terms, systems design and cost behaviour 1

1. Management accounting and the business environment 2
2. An introduction to cost terms, concepts and classifications 23
3. Cost behaviour: analysis and use 61
4. Job-order and service department costing 101
5. Process costing 157

Part 2: Information for decision making 193

6. Cost–volume–profit relationships 194
7. Profit reporting under variable costing and absorption costing 241
8. Performance measurement and reporting on segments 273
9. Activity-based costing 319
10. Relevant costs for decision making 377

Part 3: Planning and control 436

11. Profit planning and the role of budgeting 437
12. Standard costs and variance analysis 481
13. Flexible budgets and performance reporting 521
14. Capital investment decisions 579
15. Pricing and intra-company transfers 645

Part 4: Value metrics and performance management in a strategic context 690

16. Strategic management accounting and the balanced scorecard 691
17. Management control, risk and corporate governance 725
18. Business process management: towards the lean operation 760
19. Strategic perspectives on cost management 801

SmartBook xxiv
Create and Custom Publishing xxv

Part 1: An introduction to management and cost accounting: cost terms, systems design and cost behaviour 1

1 Management accounting and the business environment 2
The work of management and the need for management accounting information 3
Planning 3
Directing and motivating 4
Controlling 4
The end results of managers' activities 4
The planning and control cycle 5
Decision making 5
Comparison of financial and management accounting 6
Emphasis on the future 6
Relevance and flexibility of data 6
Less emphasis on precision 7
Segments of an organization 7
International Financial Reporting Standards (IFRS) 8
Management accounting – not mandatory 8
Basic organizational structure 8
Decentralization 8
Line and staff relationships 9
Expanding and changing role of management accounting 9
The sources of management accounting knowledge 10
International diversity in management accounting traditions 10
Globalization and international competition 11
Changes in the business environment and management accounting 12
New business processes and technologies 12
Enterprise resource planning systems 12
Deregulation, privatization and re-regulation 13
The increased importance of service sector management 13
Managing for value 14
Embedding ESG and corporate social responsibility into strategy 15
Environmental management accounting (EMA) 15
Corporate governance, professional and business ethics 16
Some implications for the roles of management accountants 17

2 An introduction to cost terms, concepts and classifications 23
General cost classifications 24
Manufacturing costs 25
Non-manufacturing costs 26
Product costs versus period costs 26
Cost classifications on financial statements 28
The statement of financial position 28
The statement of profit or loss 29
Schedule of cost of goods manufactured 30
Product costs: a closer look 32
Inventoriable costs 33
An example of cost flows 33
Costing in service organizations: a first look 35
Cost classifications for predicting cost behaviour 35
Variable cost 36
Fixed cost 37
Cost classifications for assigning costs to cost objects 38
Direct cost 38
Indirect cost 38

[NO SCAM] Get FULL Ebook order By email at palemonking@gmail.com

Cost classifications for decision making 38
Differential cost and revenue 38
Opportunity cost 40
Sunk cost 40

3 Cost behaviour: analysis and use 61
Types of cost behaviour patterns 62
Variable costs 62
The activity base 63
True variable versus step-variable costs 64
The linearity assumption and the relevant range 65
Fixed costs 66
Types of fixed costs 67
The trend toward fixed costs 68
Is labour a variable or a fixed cost? 68
Fixed costs and the relevant range 69
Mixed costs 70
The analysis of mixed costs 71
The high–low method 73
The scattergraph method 75
The least-squares regression method 76
Multiple regression analysis 79
The contribution format 79
Why a new statement of profit or loss format? 80
The contribution approach 80

4 Job-order and service department costing 101
Process and job-order costing 102
Process costing 102
Job-order costing 103
Job-order costing: an overview 104
Measuring direct materials cost 104
Job cost sheet 105
Measuring direct labour cost 107
Application of manufacturing overhead 107
Choice of an allocation base for overhead cost 110
Computation of unit costs 110
Summary of document flows 111
Job-order costing: the flow of costs 111
The purchase and issue of materials 112
Labour cost 113
Manufacturing overhead costs 114
The application of manufacturing overhead 114
Non-manufacturing costs 116
Cost of goods manufactured 117
Cost of goods sold 117
Summary of cost flows 118
Problems of overhead application 120
Underapplied and overapplied overhead 121
Disposition of underapplied or overapplied overhead balances 123
A general model of product cost flows 124
Multiple predetermined overhead rates 124
Job-order costing in service companies 124
The predetermined overhead rate and capacity 125

5 Process costing 157
Comparison of job-order and process costing 158
Similarities between job-order and process costing 158
Differences between job-order and process costing 159
A perspective of process cost flows 159
Processing departments 159
The flow of materials, labour and overhead costs 161
Materials, labour and overhead cost entries 161
Equivalent units of production 164
Weighted-average method 164
Production report – weighted-average method 166
FIFO method 172
Equivalent units – FIFO method 172
Comparison of equivalent units of production under the weighted-average and FIFO methods 172
Production report – FIFO method 174
A comparison of costing methods 177
Standard costing method 177
Operation costing 179

Part 2: Information for decision making 193

6 Cost–volume–profit relationships 194
The basics of cost–volume–profit (CVP) analysis 196
Contribution margin 196
Contribution margin ratio (CM ratio) 198
Some applications of CVP concepts 199

[NO SCAM] Get FULL Ebook order By email at palemonking@gmail.com

Change in fixed cost and sales volume 200
Change in variable costs and sales volume 200
Change in fixed cost, sales price and sales volume 201
Change in variable cost, fixed cost and sales volume 202
Change in regular sales price 202
Importance of the contribution margin 203
Break-even analysis 203
Break-even computations 203
Break-even computations using Excel 205
CVP relationships in graphic form 205
Preparing the CVP graph 205
Target profit analysis 207
The CVP equation 207
The contribution margin approach 208
The margin of safety 208
CVP considerations in choosing a cost structure 209
Cost structure and profit stability 209
Operating leverage 210
Automation: risks and rewards from a CVP perspective 212
Structuring sales commissions 213
The concept of sales mix 214
The definition of sales mix 214
Sales mix and break-even analysis 214
Assumptions of CVP analysis 216

7 Profit reporting under variable costing and absorption costing 241
Overview of absorption and variable costing 242
Absorption costing 242
Variable costing 242
Unit cost computations 243
Profit comparison of absorption and variable costing 244
Extended comparison of profit data 247
Effect of changes in production on profit 251
Variable costing 251
Absorption costing 251
The impact on the manager 255
Choosing a costing method 256
External reporting 256
Decision making 256
Advantages of variable costing and the contribution approach 256
Impact of JIT methods 257

8 Performance measurement and reporting on segments 273
Decentralization in organizations 274
Decentralization and segment reporting 275
Cost, profit and investment centres 275
Responsibility centres 276
Segment reporting and profitability analysis 276
Levels of segmented statements 278
Revenue and contribution margin 280
Traceable and common fixed costs 280
Traceable costs can become common costs 281
Segment margin 282
There is more than one way to segment a company 283
Hindrances to proper cost assignment 284
Omission of costs 284
Inappropriate methods for allocating costs among segments 285
Arbitrarily dividing common costs among segments 285
Rate of return for measuring managerial performance 286
The return on investment (ROI) formula 286
Operating profit and operating assets 286
Plant and equipment: net book value or gross cost? 287
Controlling the rate of return 288
Increase revenue 290
Reduce expenses 290
Reduce operating assets 291
Criticisms of ROI 291
Residual income – another measure of performance 291
Motivation and residual income 292
Divisional comparison and residual income 293
The problem of single-period metrics: the bonus bank approach 294

9 Activity-based costing 319
How costs are treated under activity-based costing (ABC) 321
Non-manufacturing costs and ABC 321
Manufacturing costs and ABC 321
The costs of idle capacity in ABC 322
Designing an ABC system 322
Identifying activities to include in the ABC system 325

[NO SCAM] Get FULL Ebook order By email at palemonking@gmail.com

The mechanics of ABC 326
Tracing overhead costs to activities and cost objects 326
Assigning costs to activity cost pools 327
Computation of activity rates 329
Targeting process improvements: activity-based management 331
Assigning costs to cost objects 333
Overhead costs computed using the ABC system 333
Product margins and customer profitability computed using the ABC system 334
Comparison of traditional and ABC product costs 335
Product margins computed using the traditional cost system 335
The differences between ABC and traditional product costs 336
ABC product costs – an action analysis 338
Ease of adjustment codes 338
The action analysis view of the ABC data 339
Service costing and management: the benefits of an ABC approach 342
Time-driven ABC 343
ABC and external reports 344
A simplified approach to ABC 344

10 Relevant costs for decision making 377
Cost concepts for decision making 378
Identifying relevant costs and benefits 378
Different costs for different purposes 379
Sunk costs are not relevant costs 379
Book value of old equipment 380
Future costs that do not differ are not relevant costs 382
An example of irrelevant future costs 382
Why isolate relevant costs? 383
Adding and dropping product lines and other segments 384
An illustration of cost analysis 384
A comparative format 386
Beware of allocated fixed costs 386
The make or buy decision 387
An example of make or buy 388
The matter of opportunity cost 389
Special orders 390
Utilization of constrained resources 391
Contribution in relation to a constrained resource 391
Managing constraints 392
The problem of multiple constraints in the short run: linear programming 394
Sensitivity analysis 396
Shadow prices 396
The limitations of the linear programming model as a management accounting technique 396
Joint product costs and the contribution approach 396
The pitfalls of allocation 398
Sell or process further decisions 398
Activity-based costing and relevant costs 400

Part 3: Planning and control 436

11 Profit planning and the role of budgeting 437
The basic framework of budgeting 439
Definition of budgeting 439
Personal budgets 439
Differences between planning and control 439
Advantages of budgeting 439
Responsibility accounting 440
Choosing a budget period 440
The participative or self-imposed budget 441
The matter of human relations 442
The budget committee 443
The master budget inter-relationships 444
Sales forecasting – a critical step 445
Preparing the master budget 445
The sales budget 447
The direct materials budget 448
The direct labour budget 449
The manufacturing overhead budget 450
The ending finished goods inventory budget 451
The selling and administrative expense budget 452
The cash budget 453
The budgeted statement of profit or loss 454
The budgeted statement of financial position 455
Expanding the budgeted statement of profit or loss 457
